WINNER OF THE FOOTBALL BOOK OF THE YEAR AT THE BRITISH SPORTS BOOK AWARDS SHORTLISTED FOR THE 2016 WILLIAM HILL SPORTS BOOK OF THE YEAR 'This football book is about something even more important than the "beautiful game"; it is a story of the human spirit.' - Mick Hume, The Times Adrian Doherty was not a typical footballer. For one thing, he was blessed with extraordinary talent. Those who played alongside and watched him in the Manchester United youth team in the early 1990s insist he was as good as Ryan Giggs - possibly even better. Giggs, who played on the opposite wing, says he is inclined to agree. Doherty was also an eccentric - by football standards, at least. When his colleagues went to Old Trafford to watch the first team on Saturday afternoons, he preferred

to take the bus into Manchester to go busking. He wore second-hand clothes, worshipped Bob Dylan, read about theology and French existentialism and wrote songs and poems. One team-mate says "it was like having Bob Dylan in a No 7 shirt". On his 17th birthday, Doherty was offered a five-year contract - unprecedented for a United youngster at that time - and told by Alex Ferguson that he was destined for stardom. But what followed over the next decade is a tale so mysterious, so shocking, so unusual, so amusing but ultimately so tragic, that you are left wondering how on earth it has been untold for so long. The stories of Doherty's contemporaries, that group of Manchester United youngsters who became known as the "Class of '92", are well known. Giggs ended up as the most decorated player in United's history; David Beckham became the most recognisable footballer on the planet; Gary Neville, Paul Scholes and others are household names. The story you don't know is about the player who, having had the world at his feet, died the day before his 27th birthday following an accident in a canal in Holland.

This report reviews China's water scarcity situation, assesses the policy and institutional requirements for addressing it, and recommends key areas for strengthening and reform. It is a synthesis of the main findings and recommendations from analytical work and case studies prepared under the World Bank Analytical and Advisory Assistance (AAA) program entitled 'Addressing China's Water Scarcity: from Analysis to Action.' These studies focus on several strategically important thematic areas for China where additional research was needed, as identified by the research team and advisory group based on a review of pressing issues. These areas are governance, water rights, pricing, ecological compensation, pollution control, and emergency response. The approach has been to evaluate Chinese and international experience to identify policy and institutional

factors that have proven effective in promoting the adoption of water conservation and pollution reduction technologies. The research was based on literature reviews, qualitative and quantitative policy analyses, household surveys, field trips, and case studies to develop feasible recommendations for a plan of action based on realities on the ground.

Ward's Automotive Yearbook 2005

The Return of the Moguls chronicles an important story in the making, one that will affect more than just the newspaper business—it has the power to change democracy as we know it. Over the course of a generation, the story of the daily newspaper has been an unchecked slide from record profitability and readership to plummeting profits, increasing irrelevance, and inevitable obsolescence. The forces killing major dailies, alternative weeklies, and small-town shoppers are well understood—or seem obvious in hindsight, at least—and the catalog of publications that have gone under reads like a who's who of American journalism. During the past half-century, old-style press barons gave way to a cabal of corporate interests unable or unwilling to invest in the future even as technological change was destroying their core business. The Taylor family sold the Boston Globe to the New York Times Company in 1993 for a cool \$1.1 billion. Twenty years later, the Times Company resold it for just \$70 million. The unexpected twist to the story, however, is not what they sold it for but who they sold it to: John Henry, the

principal owner of the Boston Red Sox. A billionaire who made his money in the world of high finance, Henry inspired optimism in Boston because of his track record as a public-spirited business executive—and because his deep pockets seemed to ensure that the shrunken newspaper would not be subjected to further downsizing. In just a few days, the sale of the Globe was overtaken by much bigger news: Jeff Bezos, the founder of Amazon and one of the world's richest people, had reached a deal to buy the Washington Post for \$250 million. Henry's ascension at the Globe sparked hope. Bezos's purchase seemed to inspire nothing short of ecstasy, as numerous observers expressed the belief that his lofty status as one of our leading digital visionaries could help him solve the daunting financial problems facing the newspaper business. Though Bezos and Henry are the two most prominent individuals to enter the newspaper business, a third preceded them. Aaron Kushner, a greeting-card executive, acquired California's Orange County Register in July 2012 and then pursued an audacious agenda, expanding coverage and hiring journalists in an era when nearly all other newspaper owners were trying to avoid cutting both. The newspaper business is at a perilous crossroads. This essential book explains why, and how today's new crop of media moguls might help it to survive.

This edited volume maps the development of the use of political campaigning and marketing techniques in countries of the former Communist Bloc over the last thirty years. Focusing on the shift from propaganda to political marketing, and from manipulation to persuasion, the book consists of a series of case studies of countries in Central Europe, Eastern Europe, the Baltics, and the Balkans that outline the history, development and current state of political marketing in each

country. The authors explore political parties and their behaviour ahead of elections, and show the changes in political culture and practices that parties have undergone in order to create more or less successful campaigns.

Between the 1880s and 1980s, British excavations at locations across Egypt resulted in the discovery of hundreds of thousands of ancient objects that were subsequently sent to some 350 institutions worldwide. These finds included unique discoveries at iconic sites such as the tombs of ancient Egypt's first rulers at Abydos, Akhenaten and Nefertiti's city of Tell el-Amarna and rich Roman Era burials in the Fayum. *Scattered Finds* explores the politics, personalities and social histories that linked fieldwork in Egypt with the varied organizations around the world that received finds. Case studies range from Victorian municipal museums and women's suffrage campaigns in the UK, to the development of some of the USA's largest institutions, and from university museums in Japan to new institutions in post-independence Ghana. By juxtaposing a diversity of sites for the reception of Egyptian cultural heritage over the period of a century, Alice Stevenson presents new ideas about the development of archaeology, museums and the construction of Egyptian heritage. She also addresses the legacy of these practices, raises questions about the nature of the authority over such heritage today, and argues for a stronger ethical commitment to its stewardship. Praise for

Scattered Finds 'Scattered Finds is a remarkable achievement. In charting how British excavations in Egypt dispersed artefacts around the globe, at an unprecedented scale, Alice Stevenson shows us how ancient objects created knowledge about the past while firmly anchored in the present. No one who reads this timely book will be able to look at an Egyptian antiquity in the same way again.' Professor Christina Riggs, UEA

About this Book / Bristol born Banksy is usually categorized as a Street Artist, although his art, in content and form, transcends a narrow understanding of this term. This publication primarily deals with Banksy as a contemporary Urban Artist and his relationship with consumer culture. It examines Banksy not only in light of his illicit work on the street, but also in regard to his gallery exhibitions. The study highlights representative works of his art, pieces which demonstrate his versatility, but also stand for different periods of his oeuvre. This book presents the first academic study of Banksy's art in English; with a history and discussion of the terms Graffiti, Street Art and Urban Art and a rich array of biographical information. It will be of interest to academics and the general public as well. About this Edition / Street Artist Banksy and former Young British artist Damien Hirst are two of the most popular representatives of British contemporary art. Situated in a triangle of art, consumerism and pop culture their work is among the most well-known. A

systematic academic study of their artistic viewpoints and references to consumer culture has long been missing, and Ulrich Blanché is finally closing this gap: He examines Hirst's and Banksy's art against the background of the London art scene since 1980. Blanché points out connections to Duchamp, Warhol and Koons, and reflects on the role of the observer, the meaning of location and, especially, the references between art, consumer culture and marketing in their pieces. This two volume edition is the translated and expanded version of the authors dissertational thesis.

Addressing China's Water Scarcity

The signing of Naby Keïta for almost £53m in August 2017 was the third time in the space of 14 months that Liverpool broke the transfer record for an African player. But while Senegal's Sadio Mané and Mohamed Salah of Egypt helped Jürgen Klopp's side reach the Champions League final in 2018, Guinea midfielder Keïta took time to adapt to his new surroundings. Tracking his first season in English football and featuring interviews with Klopp and those closest to Liverpool's three biggest African stars, Ed Aarons tells the story of the thrilling 2018/19 campaign that ended with the club's sixth European crown after just missing out to Manchester City in the thrilling Premier League title race. Yet the historic season which saw Mané and Salah share the Premier League's Golden Boot with Arsenal's Gabon striker Pierre-Emerick Aubameyang would not have been possible had it not been for those who blazed the trail before them. From Arthur Wharton - the first player born in Africa to appear in the Football League - to Steve Mokone, Albert Johanneson, Brian and Mark Stein, Peter Ndlovu, Christopher Wreh, Lucas Radebe, Jay Jay Okocha, Didier Drogba, Yaya Touré and Riyad Mahrez, Made in Africa tells the story of the pioneers who changed the face of English football forever.

Introduction to Private Equity, Debt and Real Assets

Degradation, dehumanization, instrumentalization, humiliation, and nonrecognition – these concepts point to ways in which we understand human beings to be violated in their dignity. Violations of human dignity are brought about by concrete practices and conditions; some commonly acknowledged, such as torture and rape, and others more contested, such as poverty and exclusion. This volume collates reflections on such concepts and a range of practices, deepening our understanding of human dignity and its violation, bringing to the surface interrelationships and commonalities, and pointing to the values that are thereby shown to be in danger. In presenting a streamlined discussion from a negative perspective, complemented by conclusions for a positive account of human dignity, the book is at once a contribution to the body of literature on what dignity is and how it should be protected as well as constituting an alternative, fresh and focused perspective relevant to this significant recurring debate. As the concept of human dignity itself crosses disciplinary boundaries, this is mirrored in the unique range of perspectives brought by the book's European and American contributors – in philosophy and ethics, law, human rights, literature, cultural studies and interdisciplinary research. This volume will be of interest to social and moral philosophers, legal and human rights theorists, practitioners and students.
