### **The Second Machine Age: Work, Progress, and Prosperity in a Time of Brilliant Technologies**

This volume features the latest research and practical data from the premier event for the microelectronics failure analysis community. The papers cover a wide range of testing and failure analysis topics of practical value to anyone working to detect, understand, and eliminate electronic device and system failures.

### **Professional Team Foundation Server 2013**

ESSENTIALS OF BUSINESS COMMUNICATION, 9TH EDITION presents a streamlined approach to business communication that includes unparalleled resources and author support for instructors and students. ESSENTIALS OF BUSINESS COMMUNICATION provides a four-in-one learning package: authoritative text, practical workbook, self-teaching grammar/mechanics handbook, and premium Web site. Especially effective for students with outdated or inadequate language skills, the Ninth Edition offers extraordinary print and digital exercises to help students build confidence as they review grammar, punctuation, and writing guidelines. Textbook chapters teach basic writing skills and then apply these skills to a variety of e-mails, memos, letters, reports, and resumes. Realistic model documents and structured writing assignments help students build lasting workplace skills. The Ninth Edition of this award-winning text features increased coverage of electronic messages and digital media, redesigned and updated model documents to introduce students to the latest business communication practices, and extensively updated exercises and activities. Patient Safety: Perspectives on Evidence, Information and Knowledge Transfer provides background on the patient safety movement, systems safety, human error and other key philosophies that support change and innovation in the reduction of medical error. The book draws from multidisciplinary areas within the acute care environment to share models that support the proactive changes necessary to provide safe care delivery. The publication discusses how the tenets of safety (described in the beginning of the book) can be actively applied in the field to make evidence, information and knowledge (EIK) sharing processes reliable, effective and safe. This is a wide-ranging and important book that is designed to raise awareness of the latent risks for patient safety that are present in the EIK identification, acquisition and distribution processes, structures, and systems of many healthcare institutions across the world. The expert contributors offer systemic, evidence-based improvement processes, assessment concepts and innovative activities to identify these risks to minimize their potential to adversely impact care. These ideas are presented to create opportunities for the field to design and use strategies that enable meaningful implementation and management of EIK. Their thoughts will enable healthcare staff to see EIK as a tangible element contributing toward sustainable patient safety improvements.

"TRB's Transportation Research Record: Journal of the Transportation Research Board, No. 2360 contains 10 papers that study holistic approaches to maintenance and preservation of transportation infrastructure; guidelines for thermographic inspection of concrete bridge components in shaded conditions; bridge preservation by action type; fatigue testing and structural health monitoring of retrofitted web stiffeners on steel highway bridges; and, vulnerability of bridges exposed to scour. This issue also examines performance measures for bridge preservation; risk modeling of advanced deterioration in bridge management systems; modeling hurricane hazards and damage on Florida bridges; developing bridge management

components that facilitate decision making; and, a method to assess bonding characteristics of membrane layers in wearing course on orthotropic steel bridge decks."--Pub. online blurb.

## **Yearbook of International Organizations 2013-2014**

A New York Times Bestseller. A “fascinating” (Thomas L. Friedman, New York Times) look at how digital technology is transforming our work and our lives. In recent years, Google’s autonomous cars have logged thousands of miles on American highways and IBM’s Watson trounced the best human Jeopardy! players. Digital technologies—with hardware, software, and networks at their core—will in the near future diagnose diseases more accurately than doctors can, apply enormous data sets to transform retailing, and accomplish many tasks once considered uniquely human. In *The Second Machine Age* MIT’s Erik Brynjolfsson and Andrew McAfee—two thinkers at the forefront of their field—reveal the forces driving the reinvention of our lives and our economy. As the full impact of digital technologies is felt, we will realize immense bounty in the form of dazzling personal technology, advanced infrastructure, and near-boundless access to the cultural items that enrich our lives. Amid this bounty will also be wrenching change. Professions of all kinds—from lawyers to truck drivers—will be forever upended. Companies will be forced to transform or die. Recent economic indicators reflect this shift: fewer people are working, and wages are falling even as productivity and profits soar. Drawing on years of research and up-to-the-minute trends, Brynjolfsson and McAfee identify the best strategies for survival and offer a new path to prosperity. These include revamping education so that it prepares people for the next economy instead of the last one, designing new collaborations that pair brute processing power with human ingenuity, and embracing policies that make sense in a radically transformed landscape. A fundamentally optimistic book, *The Second Machine Age* alters how we think about issues of technological, societal, and economic progress.

## **Farmageddon**

Farm animals have been disappearing from our fields as the production of food has become a global industry. We no longer know for certain what is entering the food chain and what we are eating – as the UK horsemeat scandal demonstrated. We are reaching a tipping point as the farming revolution threatens our countryside, health and the quality of our food wherever we live in the world. Farmageddon is a fascinating and terrifying investigative journey behind the closed doors of a runaway industry across the world – from the UK, Europe and the USA, to China, Argentina, Peru and Mexico. It is both a wake-up call to change our current food production and eating practices and an attempt to find a way to a better farming future.

### **The Poetics of Otherness**

Developed countries and certain regions of economically emerging nations have displaying a rapidly growing population of the oldest-oldónonagenarians, centenarians, and supercentenarians. As this trend continues, we must redirect some of our research on aging to the experience of advanced old age and discovering individual and community factors that improve the quality of life during this life stage. This state-of-the science, multidisciplinary Annual provides a comprehensive discussion of the factors promoting healthy survival and/or ensuring a good quality of life for the oldest elderly. It features an international representation that includes Denmark, Finland, France, Italy, the Netherlands, the United Kingdom,

Sweden, Japan, and North America. The Annual disseminates the most current research regarding this population and notes gaps in our knowledge. The book addresses ongoing demo-epidemiological changes regarding longevity, estimates of oldest-old populations, and prevalence of chronic and degenerative diseases, frailty, and old-age dependency. The meaning of healthy longevity as a theoretical concept is explored. Grounded in the fundamental issue of whether or not the prevalence of poor health or poor quality of life inevitably increases with age, recent research and ongoing studies from a variety of perspectives are presented from several nations. The book clarifies the known and hypothetical factors favoring healthy longevity, from genes to social integration. Additionally, chapters explore gender differences in age trajectories and changes over time. Special attention is given to the social and cognitive dimensions of healthy longevity. Key Features: Disseminates new scholarly research about a rapidly growing segment of the populationóthe oldest old Offers multidisciplinary and international perspectives about the factors that promote healthy survival and improve quality of life Addresses the social and cognitive dimensions of healthy longevity Provides important information regarding health care costs for this population Includes the research of seasoned and emerging scholars

## **Latin American Economic Outlook 2013 SME Policies for Structural Change**

This book looks at the gendering of the political system in Japan and the effects of that system on gender equality in national-level politics specifically and wider society more generally. It examines the approach taken by the long-ruling Liberal Democratic Party (LDP) to issues of gender equality in Japan, and the repercussions of that approach on women's political experiences and representation. This book covers a range of themes including the role of the LDP and other major political parties in constructing the modern Japanese political system, the under-representation of women in Japanese politics, women's experiences in party politics and the gendering of government policies. Using in-depth interviews with women members of the national Diet, the book sheds light on how political women negotiate the male-dominated world of Japanese politics.

### **Incontinence: New Insights for the Healthcare Professional: 2013 Edition**

This first comprehensive biography of Jewish American writer and humorist Harry Golden (1903-1981)--author of the 1958 national best-seller *Only in America*--illuminates a remarkable life intertwined with the rise of the civil rights movement, Jewish popular culture, and the sometimes precarious position of Jews in the South and across America during the 1950s. After recounting Golden's childhood on New York's Lower East Side, Kimberly Marlowe Hartnett points to his stint in prison as a young man, after a widely publicized conviction for investment fraud during the Great Depression, as the root of his empathy for the underdog in any story. During World War II, the cigar-smoking, bourbon-loving raconteur landed in Charlotte, North Carolina, and founded the *Carolina Israelite* newspaper, which was published into the 1960s. Golden's writings on race relations and equal rights attracted a huge popular readership. Golden used his celebrity to editorialize for civil rights as the momentous story unfolded. He charmed his way into friendships and lively correspondence with Carl Sandburg, Adlai Stevenson, Robert Kennedy, and Billy Graham, among other notable Americans, and he appeared on the *Tonight Show* as well as other national television programs. Hartnett's spirited chronicle captures Golden's message of social inclusion for a new audience today.
