## **Myth-Fortunes**

Through a theoretical examination of the preventive turn in criminal law and justice which has gained momentum in Anglo-American criminal justice systems since the late-twentieth century, *The Preventive Turn in Criminal Law* demonstrates how recent transformations in criminal law and justice are intrinsically related to and embedded in the way liberal society and liberal law have been imagined, developed, and conditioned by its social, political, and historical context. Henrique Carvalho identifies a tension between the idea of punishment as an expression of individual justice, and prevention as a manifestation of the need for security and the promotion of welfare. Tracing this tension back to an intrinsic ambivalence within the modern conception of individual liberty, which is both repressed and preserved by liberal conceptions of responsibility and punishment, Carvalho proves that as long as this ambivalence remains unexamined, liberal law has the potential to both promote and undermine individual justice. Engaging with the dominant contemporary literature on criminal law, prevention, risk, security, and criminalisation, this volume deploys a theoretical perspective developed through a critical analysis of both classical and contemporary works of social and political theory. The book reveals that the pervasiveness of prevention in 21st century criminal justice systems represents not only the consequence of new and

unprecedented features of contemporary politics and society, but also the manifestation of essential aspects of the liberal legal and political tradition.

### **A Lovers' Tale**

Examination of the early literature attests to the fact that the study of copolymerization was initiated when polymer science was in its infancy. It has continued to grow to a subject of major importance and has been a source of interest to both academic and industrialist alike. The wide spectrum of structures and properties available in the statistical copolymer has made this a fruitful field of exploration, but one particular and more restricted form which has held its own fascination for many is the limiting case of the strictly alternating copolymer. This is formed, in the ideal situation, when two monomers in a reaction mixture add consecutively to create a polymer chain with a regular {ABABAB} structure, irrespective of the monomer feed ratio. When this happens the resulting copolymer will always have the same composition, a feature which can be advantageous but also somewhat restrictive, as the ability to vary the properties is then limited. Within a series entitled Speciality Polymers it seems appropriate then to deal with this subject, particularly as no previous attempt has been made to draw together the various facets of alternating copolymerization into one volume. It also seems timely to present a more unified picture of the subject which will also illustrate the progress made.

## **Alternating Copolymers**

John B. Judis, one of our most insightful political commentators, most rational and careful thinkers, and most engaged witnesses in Washington, has taken on a challenge that even the most concerned American citizens shrink from: forecasting the American political climate at the turn of the century. *The Paradox of American Democracy* is a penetrating examination of our democracy that illuminates the forces and institutions that once enlivened it and now threaten to undermine it. It is the well-reasoned discussion we need in this era of unrestrained expert opinions and ideologically biased testimony. The disenchantment with our political system can be seen in decreasing voter turnout, political parties co-opted by consultants and large contributors, the corrupting influence of "soft money," and concern for national welfare subverted by lobbying organizations and special-interest groups. Judis revisits particular moments—the Progressive Era, the New Deal, the 1960s—to discover what makes democracy the most efficacious and, consequently, most inefficacious. What has worked in the past is a balancing act between groups of elites—trade commissions, labor relations boards, policy groups—whose mandates are to act in the national interest and whose actions are governed by a disinterested pursuit of the common good. Judis explains how the displacement of such elites by a new lobbying community in Washington has given rise to the cynicism that corrodes the current political system. *The Paradox of American Democracy* goes straight to the heart of every political debate in this country.

The series Topics in Current Chemistry Collections presents critical reviews from the journal Topics in Current Chemistry organized in topical volumes. The scope of coverage is all areas of chemical science including the interfaces with related disciplines such as biology, medicine and materials science. The goal of each thematic volume is to give the non-specialist reader, whether in academia or industry, a comprehensive insight into an area where new research is emerging which is of interest to a larger scientific audience. Each review within the volume critically surveys one aspect of that topic and places it within the context of the volume as a whole. The most significant developments of the last 5 to 10 years are presented using selected examples to illustrate the principles discussed. The coverage is not intended to be an exhaustive summary of the field or include large quantities of data, but should rather be conceptual, concentrating on the methodological thinking that will allow the non-specialist reader to understand the information presented. Contributions also offer an outlook on potential future developments in the field. ## **The Wealth Therapy Theory**

Mitch Grant just wanted a job, and maybe a little respect, but at fifteen, he found both just beyond his reach. Too young to be legally employed, he knew that the only cash likely to come his way would have to pass “under the table”—through some discreet, off-the-books business arrangement. And that meant talking to the Chair, a shoe salesman at the mall famous for his skill in getting customers from “just looking” to the cash register. The Chair had hired Mitch once before for a temporary assignment—too temporary for the cash-strapped Mitch. When he goes to see the Chair this time, however, it’s the super-slick salesman who desperately needs help. The Chair is finally cracking under the strain of all that service with a smile. So Mitch proposes a deal—a way for the Chair, and other beleaguered mall workers, to combat the endless humiliation they suffer at the feet of their customers, while helping Mitch with his cash shortage. The Chair agrees to the terms, and soon Mitch has recruited his friends Page, Marcus, and Jimmy to “staff” a bold—and brash—new venture. Demand for their services skyrockets and along with it, the authorities’ alarm. Words like gang, Mall Mafia, and even terrorist start to fly. Mitch soon realizes that his small business has spiraled out of control—big time!
