This series concentrates on women and the soldiers in the ranks whose lives they shared, assembling a wide body of evidence of their romantic entanglements and domestic concerns. The new military history of recent decades has demanded a broadening of the source base beyond elite accounts or those that concentrate solely on battlefield experiences. Armies did not operate in isolation, and men's family ties influenced the course of events in a variety of ways.

Campfollowing women and children occupied a liminal space in campaign life. Those who travelled "on the strength" of the army received rations in return for providing services such as laundry and nursing, but they could also be grouped with prostitutes and condemned as a 'burden' by officers. Parents, wives, and offspring left behind at home remained in soldiers' thoughts, despite an army culture aimed at replacing kin with regimental ties. Soldiers' families' suffering, both on the march and back in Britain, attracted public attention at key points in this period as well. This series provides, for the first time in one place, a wide body of texts relating to common soldiers' personal lives: the women with whom they became involved, their children, and the families who

cared for them. It brings hitherto unpublished material into print for the first time, and resurrects accounts that have not been in wide circulation since the nineteenth century. The collection combines the observations of officers, government officials and others with memoirs and letters from men in the ranks, and from the women themselves. It draws extensively on press accounts, especially in the nineteenth century. It also demonstrates the value of using literary depictions alongside the letters, diaries, memoirs and war office papers that form the traditional source base of military historians. This sixth volume covers the period 1856-1880.

People have forgotten the gospel of service. The producing power per man has fallen off from fifteen to twenty percent. We have all been keen on developing consumption. We have devoted nine-tenths of our thought, energy and effort to developing consumption. This message is to beg of every reader to give more thought to developing production, to the reviving of a desire to produce and the realization of joy in production. - Foreword.

Preserving New York is the largely unknown inspiring story of the origins of New York City's nationally acclaimed landmarks law. The decades of struggle behind the law, its intellectual origins, the men and women who fought for it, the forces that shaped it, and the buildings lost and saved on the way to its ultimate passage, span from 1913 to 1965. Intended for the interested public as well as students of New York City history, architecture, and preservation itself, over 100 illustrations help reveal a history richer and more complex than the accepted myth that the landmarks law sprang from the wreckage of the great Pennsylvania Station. Images include those by noted historic photographers as well as those from newspaper accounts of the time. Forgotten civic leaders such as Albert S. Bard and lost buildings including the Brokaw Mansions, are unveiled in an extensively researched narrative bringing this essential episode in New York's history to future generations tasked with protecting the city's landmarks. For the first time, the story of how New York won the right to protect its treasured buildings, neighborhoods and special places is brought together to enjoy, inform, and inspire all who love New York.

"In recent years the debate on multiculturalism in the UK and other Western societies has focused principally on Islam, and the specific 'problems' said to be posed by Muslims have been invoked to justify the claim that multiculturalism has failed. That claim is opened to scrutiny and challenged in this unique collection through a series of explorations of specific issues and controversies - including the question of the veil, crime, political Islam, the role of Muslim women, sexuality and the Danish cartoons affair - and through more general reflections on the nature of multiculturalism. By exploring the nature of cultural differences and sensitivities and examining the way conflicts have played out, this challenging book makes a wide-ranging contribution to debate and a more constructive inter-cultural engagement. The contributors draw upon the disciplines of social science, ethics, theology, philosophy and education to examine the nature of the issues and flashpoints and

Governments and Rebellions in Southeast Asia

The 650th anniversary of the foundation of Wingfield College was the occasion for a special two-day symposium marking the culmination of a three-year UEA-funded research project into the college and castle. The building projects of the late medieval aristocracy focused on their homes and the monasteries, churches or chantry foundations under their patronage where their family were buried and commemorated. This commemoration allowed a visual celebration of their achievements, status and lineage, the scale and prestige of which reflected on the fortunes of the family as a whole. Wingfield is explored in the context of both the actual building of the castle, chantry chapel and the college, and that of the symbolic function of these as a demonstration of aristocratic status. The contributions to this book examine many topics which have hitherto been neglected, such as the archaeology of the castle, which had never been excavated, the complex history of the college's architecture, and the detailed study of the monuments in the church. The latest techniques are used to reconstruct the college and castle, with a DVD to demonstrate these. And the context of the family and its fortunes are explored in chapters on the place of the de la Poles in fifteenth century history, as

Computational fluid flow is not an easy subject. Not only is the mathematical representation of physico-chemical hydrodynamics complex, but the accurate numerical solution of the resulting equations has challenged many numerate scientists and engineers over the past two decades. The modelling of physical phenomena and testing of new numerical schemes has been aided in the last 10 years or so by a number of basic fluid flow programs (MAC, TEACH, 2-E-FIX, GENMIX, etc). However, in 1981 a program (perhaps more precisely, a software product) called PHOENICS was released that was then (and still remains) arguably, the most powerful computational tool in the whole area of endeavour surrounding fluid dynamics. The aim of PHOENICS is to provide a framework for the modelling of complex processes involving fluid flow, heat transfer and chemical reactions. PHOENICS has now been in use for four years by a wide range of users across the world. It was thus perceived as

useful to provide a forum for PHOENICS users to share their experiences in trying to address a wide range of problems. So it was that the First International PHOENICS Users Conference was conceived and planned for September 1985. The location, at the Dartford Campus of Thames Polytechnic, in the event, proved to be an ideal site, encouraging substantial interaction between the participants.

Nigel Calder, a diesel mechanic for more than 25 years, is also a boatbuilder, cabinetmaker, and machinist. He and his wife built their own cruising sailboat, Nada, a project they completed in 1984. Calder is author of numerous articles for Yachting Monthly and many other magazines worldwide, as well as the bestselling Boatowner's Practical and Technical Cruising Manual and Boatowner's Mechanical and Electrical Manual, both published by Adlard Coles Nautical. Here, in this goldmine of a book, is everything the reader needs to keep their diesel engine running cleanly and efficiently. It explains how diesel engines work, defines new terms, and lifts the veil of mystery that surrounds such engines. Clear and logical, this extensively illustrated guide will enable the reader to be their own diesel mechanic. As Nigel Calder says: 'there is no reason for a boatowner not to have a troublefree relationship with a diesel engine. All one needs is to set the engine up correctly in the first place, to pay attention to routine maintenance, to have the knowledge to spot early warning signs of impending trouble, and to

When it comes to reading; the 2.000 most used words account for about 85% of all that is written. The most used 10.000 words account for 99% of all spoken and 98% of all written Italian text.

How Much Vocabulary Do You Need To Know?

While it's important to note it's impossible to pin down these numbers and statistics with 100% accuracy, these are a global average of multiple sources. According to scientific research, this is the amount of vocabulary needed for varying levels of fluency:

1. 250 words: the essential core of a language. Without these words, you cannot construct sentences.
2. 750 words: those that are used every single day by every person who speaks the language.
3. 2500 words: those that should enable you to express everything you could possibly want to say, although some creativity might be required.
4. 5000 words: the active vocabulary of native speakers without higher education. You will understand 95% of all written texts.
5. 10,000 words: the active vocabulary of native speakers with higher education.
6. 20,000 words: the amount you need to recognize passively in order to read, understand, and enjoy a work of literature such as a novel by a notable author.

Keeping above facts in mind, the value of a frequency dictionary is immense. At least, that is if you want to become fluent in a language fast. Study the most frequent words, build your vocabulary and progress naturally. Sounds logical, right?

This book examines the theology and ethics of land use, especially the practices of modern industrialized agriculture, in light of critical biblical exegesis. Nine interrelated essays explore the biblical writers'

pervasive concern for the care of arable land against the background of the geography, social structures, and religious thought of ancient Israel. This approach consistently brings out neglected aspects of texts, both poetry and prose, that are central to Jewish and Christian traditions. Rather than seeking solutions from the past, Davis creates a conversation between ancient texts and contemporary agrarian writers; thus she provides a fresh perspective from which to view the destructive practices and assumptions that now dominate the global food economy. The biblical exegesis is wide-ranging and sophisticated; the language is literate and accessible to a broad audience.
