Schools across the United States and Canada are disrupting the adverse effects of poverty and supporting students in ways that enable them to succeed in school and in life. In this second edition, Parrett and Budge show you how your school can achieve similar results. Expanding on their original framework's still-critical concepts of actions and school culture, they incorporate new insights for addressing equity, trauma, and social-emotional learning. These fresh perspectives combine with lessons learned from 12 additional high-poverty, high-performing schools to form the updated and enhanced Framework for Collective Action. Emphasizing students' social, emotional, and academic learning as the hub for all action in high-performing, high-poverty schools, the authors describe how educators can work within the expanded Framework to address the needs of all students, but particularly those who live in poverty. Equipped with the Framework and a plethora of tools to build collective efficacy (self-assessments, high-leverage questions, action advice, and more), school and district leaders--as well as teachers, teacher leaders, instructional coaches, and other staff--can close persistent opportunity gaps and reverse longstanding patterns of low achievement.

From the bestselling author of *Dragons Love Tacos* comes a whimsical re-telling of the chupacabra folktale, written in a blend of English and Spanish. A long time ago, a girl named Carla lived on a goat farm with her father, Hector. One night, a goat

Get Free 6th Grade Staar Math Word Problems

disappeared from the farm and turned up flat as a pancake. Only one creature could do that--El Chupacabras, the goatsucker! Legend has it that El Chupacabras is a fearsome beast, but you can't believe everything you hear and sometimes the truth is even more interesting. Told in equal parts English and Spanish by bestselling author Adam Rubin, and cinematically illustrated by acclaimed Hollywood creature creator Crash McCreery, this lighthearted take on a modern legend is not told in the traditional bilingual style. Each sentence is half-Spanish/half-English followed by a repetition of the same line translated the other way around. This mirroring technique allows the languages to intermingle equally. A fun and unique way to introduce either Spanish or English to new readers. A note from author Adam Rubin: "I decided to tell this story in an unusual way to explore the beauty of harmony. It's easy to dismiss the unfamiliar, but compassion takes a little more effort. With so many people trumpeting divisiveness right now, it's more important than ever to teach kids that there is more than one way to understand the world."

Using Informative Assessments towards Effective Literacy Instruction

PSAT Math Workbook

Grading systems often reward on-time task completion and penalize disorganization and bad behavior. Despite our best intentions, grades seem to reflect student compliance more than student learning and engagement. In the process, we inadvertently subvert the learning process. After careful research and years of experiences with grading as a teacher and a parent, Cathy Vatterott examines and debunks traditional practices and policies of grading in K-12 schools. She offers a new paradigm for standards-based grading that focuses on student mastery of content and gives concrete examples from elementary, middle, and high schools. Rethinking Grading will show all educators how standards-based grading can authentically reflect student progress and learning—and significantly improve both teaching and learning. Cathy Vatterott is an education professor and researcher at the University of Missouri-St. Louis, a former middle school teacher and principal, and a parent of a college graduate. She has learned from her workshops that "grading continues to be the most contentious part . . . conjuring up the most intense emotions and heated disagreements." Vatterott is also the

A Lesson Plan for Teachers (New and Old!)

Jake recounts his second grade introduction to Link Baxter, SuperBully, who becomes his class project partner, with surprising results. When Jake was three years old at Miss Lulu's Dainty Diaper Day Care Center, what did he know about bullies? Nothing. But he learned fast! Why? Because Jake was kind of smart and not a tattletale, and he had no big brother to protect him. He was a perfect bully magnet. But everything changed the year Jake was in second grade. That's when SuperBully Link Baxter moved to town. Jake had his hands full just trying to survive, until class project time. Who did the teacher assign to be Link's partner? You guessed it. Jake has to use all his smarts -- and his heart as well -- to turn himself from Jake Drake, Bully Magnet, to Jake Drake, Bully Buster.
