Surviving Life As a Dumbass

The first book in English by an acclaimed Danish writer: "beautiful, faceted, haunting stories . . . [from] a rising star" (Junot Díaz) *Karate Chop*, Dorthe Nors's acclaimed story collection, is the debut book in the collaboration between Graywolf Press and A Public Space. These fifteen compact stories are meticulously observed glimpses of everyday life that expose the ominous lurking under the ordinary. While his wife sleeps, a husband prowls the Internet, obsessed with female serial killers; a bureaucrat tries to reinvent himself, exposing goodness as artifice when he converts to Buddhism in search of power; a woman sits on the edge of the bed where her lover lies, attempting to locate a motive for his violence within her own self-doubt. Shifting between moments of violence (real and imagined) and

mundane contemporary life, these stories encompass the complexity of human emotions, our capacity for cruelty as well as compassion. Not so much minimalist as stealthy, Karate Chop delivers its blows with an understatement that shows a master at work.

From the Roman Praetorian Guard to the English shire-reeve to the U.S. marshals, lawmen have a long and varied history. At first, such groups were often corrupt, guilty of advancing a political agenda rather than protecting citizens. It was about the turn of the twentieth century that police officers as we know them came into being. At this time, a number of police reforms such as civil service and police unions were developed. Citizen committees were formed to oversee police function. About this same time, the technology of motion pictures was being advanced. Movies evolved from silent films with a limited budget and short running time to films with sound whose budget was ever rising and whose audience demanded longer, more complex story lines. From the infancy of moviemaking, lawmen of various types were popular subjects. Bounty hunters, sheriffs, private eyes, detectives and street officers—often portrayed by some of Hollywood's biggest names—have been depicted in every conceivable way. Compiled from a

comprehensive examination of the material in question, this volume provides a critical-historical analysis of law enforcement in American cinema. From High Noon to The Empire Strikes Back, it examines the police in their many incarnations with emphasis on the ways in which lawmen are portrayed and how this portrayal changes over time. Each film discussed reveals something about society, subtly commenting on social conditions, racial issues and government interventions. Major historical events such as the Great Depression, World War II and the McCarthy trials find their way into many of these films. Significant film genres from science fiction to spaghetti western are represented. Films examined include Easy Street (1917), a nominal comedy starring Charlie Chaplin; Star Packer, a 1934 John Wayne film; The Maltese Falcon (1941) with Humphrey Bogart; Dirty Harry, a 1971 Clint Eastwood classic; Leslie Nielsen's spoof Naked Gun (1988); and 1993's Tombstone featuring Kurt Russell. The filmography contains a synopsis along with information on director, screenplay, starring actors and year of production. Photographs and an index are also included.

Cancer sucks, death sucks even more. But we humans don't have the power to stop either of them from messing with our lives. They enter our lives whenever and wherever they choose to. Cancer is so common that each one of us have known someone who has dealt with the disease; some of us have lost a loved one to

cancer. Common does not always mean simple, and it also does not mean we know everything about it. The diagnosis of cancer, regardless of the disease's curability, is almost always nerve-racking, even for healthcare providers like the main character of this book who is a veteran nurse. This book is written in first person; the subject is a middle aged woman who had been separated from her boyfriend some thirty years ago and then after three decades when she searches for an oncologist for treatment of an aggressive cancer that she was recently diagnosed, she finds her ex-boyfriend's name and decides to see him. That brings back the memory of their past together, and she starts going through her old diary she had written some thirty years in the past. Part of the story is set in Nepal (from the diary) and the other part is set in the USA (this takes place after her cancer diagnosis). The main character of the story was born with 'Manglik' cosmic influencer, meaning that the planet Mars "mangal Graha" was in such position in the solar system at the time of her birth that it would have strong negative effect on her husband if she married a man who was non-Manlik (a person born at the time when the planet Mars was not in such position.) What happens next changes the lives of the main characters.

Winner of the 1997 Drue Heinz Literature Prize This collection is filled with narrative and character grounded in the meaning and value the earth gives to human existence. In one story, a woman sleeps with the village priest, trying to gain back the land the church took from her family; in another, relatives in the Azores fight over a plot of land owned by their expatriate American cousin. Even apparently small images are cast in terms of the earth: Milton, one narrator explains, has made apples the object of a misunderstanding by naming them as Eden's fruit: "In the Bible, no fruit is named in the Garden of Eden - and to this day apples are misunderstood. The Things I Want Most

This is a book that's long overdue: One that provides information that has never before been published, compiled or analyzed in a way that's designed to help fighters. This is a guide to the science of kicking and punching that can settle the debates about which techniques are the most effective and why. It will help a fighter to fight, an instructor to teach and martial artists to advance by working things out for themselves. There is no magic involved in the martial arts. The force and power that is displayed by an expert fighter is the consequence of rigorous training in the accurate application of physical laws. Understanding how to use these laws of physics to create massive impact forces will provide a personal insight into the practice of correct technique and form. This unique piece of work will act as a technical reference that provides the facts and figures that fighters seek, including records of the maximum force and speed achieved by some of the best present day warriors, helping to answer many of the most difficult questions in the martial arts.

Most learn about martial arts through movies and print publications, primarily fictional. "Fiction is drama, the blood of drama is conflict, and martial arts are rooted in conflict," writes James Grady in chapter one. Good fiction uses martial arts well, while poor writing skills can be plain boring! This anthology is a collection of fifteen articles that cover the richness and depth of Asian martial arts in both movies and literature. After look over the array of topics, I decided to utilize writings by James Grady for the two introductory chapters. Grady is an internationally renowned writer and investigative journalist known for his nail-biting thriller novels. His early novel was adapted to film as *Three days of the Condor* (1975) starring Robert Redford. Grady has since written over a dozen wonderful novels and in between wrote two excellent pieces for the *Journal of Asian Martial Arts*: one dealing with movies and another with literature. The following chapters are greatly enriched by the informative contents in Grady's chapters. Details about movie-making are provided in the interview with producer Andre Morgan (*Enter the Dragon*, *Walter Texas Ranger*, *Martial Law*, etc.), plus the inside scoop in the publishing and film industries in the interview with multifaceted Curtis Wong. Actor/producer/kickboxing champion Don Wilson provides insights from both sides of the camera in his interview. Among the chapters are Albert Dalia's exposition of China's "wandering martial hero" stories that have roots reaching back two thousand years; Christopher Bates' excerpt from *Xiang Kairan's Tales of Chivalrous and Altruistic Heroes*; and Olivia Mok's research and translations of sections of *Fox Volant of the Snowy Mountain*, a Louis Cha's novel of

1959. In the latter, Mok extricates references to dianxue—the methods of attacking vital points. We also have fiction focusing on Japanese and Chinese martial traditions by John Donohue, Peter Graebner, John DeRose, and John Gilbey's (aka, Robert W. Smith)—each highlighting combative experience, theory and technique with cultural trimmings. Interviews with Barry Eisler and Author Rosenfeld give insight into scholar/practitioners whose published novels contain text colored by their knowledge of the martial arts and culture. We hope you'll find this book captivating, exciting, heroic, spellbinding, content rich, fascinating, penetrating . . .

martial arts—like Karate, Kung-Fu, Judo, or Aikido—were developed to embody and apply philosophical ideas. The Japanese martial tradition of Budo, for instance, was influenced by the three philosophical traditions of Shinto, Confucianism, and Zen Buddhism, and these philosophies are still taught in Japanese martial arts schools all across the world. As Damon Young explains in his chapter, the Japanese martial arts customs of courtesy are derived from Shinto purity, Confucian virtues, and the loving brutality of Zen. In his interview with Bodidharma (included in the book), Graham Priest brings out aspects of Buddhist philosophy behind Shaolin Kung-Fu—how fighting monks are seeking Buddhahood, not brawls. But as Scott Farrell's chapter reveals, Eastern martial arts have no monopoly on philosophical traditions. Western chivalry is an education in and living revival of Aristotelian ethical theories. The Western martial art of fencing is explored by Nick Michaud, who looks at the morality of selfishness in fencing, and Christopher Lawrence and Jeremy Moss, who try to pin down what makes fencing unique: is it the sword, the techniques, the footwork, the aristocratic aura, or something else? Jack Fuller argues that his training in Karate was an education in Stoicism. Travis Taylor and Sasha Cooper reveal the utilitarian thinking behind Jigoro Kano's Judo. Kevin Krein maintains that the martial arts are a reply to the existentialist's anxiety about the meaninglessness of life. Patricia Peterson examines Karate's contribution to feminism, and Scott Beattie analyzes the role of space in the martial arts school. Joe Lynch pits the Western ideas of Plato against the Eastern ideas of the Shaolin monks. Bronwyn Finnigan and Koji Tanaka uncover the meaning of human action

as it appears in Kendo. Rick Schubert explains the meaning of mastery in the fighting arts. Moving to ethical issues, Tamara Kohn discovers what we owe to others in Aikido. Chris Mortensen questions whether his own Buddhist pacifism is compatible with being a martial artist. In different ways, Gillian Russell and John Haffner and Jason Vogel assess the ways in which martial arts can morally compromise us. How can the sweaty and the brutal be exquisitely beautiful? Judy Saltzman looks into the curious charm of fighting and forms, with help from Friedrich Nietzsche.

Lashkar-e-Taiba is among the most powerful militants groups in South Asia and increasingly viewed as a global terrorist threat on par with al-Qaeda. Considered Pakistan's most powerful proxy against India, the group gained public prominence after its deadly ten-person suicide assault on Mumbai in November 2008. By the time the last Lashkar terrorist was dead after nearly 60 hours, it appeared the world was facing a new menace. Boasting transnational networks stretching across several continents, there has been serious debate since 9/11 of whether Lashkar is an al-Qaeda affiliate. The deliberate targeting of Westerners and Jews during the Mumbai attacks raised questions about whether Lashkar was moving deeper into al-Qaeda's orbit and perhaps on a trajectory to displace Osama bin Laden's network as the next major global jihadi threat. Lashkar's expansion has serious security implications for India, Pakistan, Europe and the United States and its activities threaten to damage US-Pakistan relations. Despite growing calls for action, Pakistan is yet to take any serious steps toward dismantling Lashkar for fear of drawing it further into the insurgency raging there and because of its continued utility against India. More than a militant outfit, Lashkar also controls a vast

The first English-language book ever written about Lashkar, it draws on in-depth field research, including interviews with senior Lashkar leaders, rank-and-file members, and officials of the Pakistani security services--some of who have helped nurture the group over the years.
