(Piano). Did you use to play the piano? Would you like to play again? This is the first of two books of Play It Again: Piano . It will reunite you with the keyboard using real pieces from the piano repertoire to teach specific techniques and tips, to get you playing fluently once again. The level of pieces in this first book progresses from around UK grades 1 to 4 (elementary to intermediate). Aimed at "returning" players who have spent some time away from the keyboard, Play It Again: Piano gives you the confidence to revisit this fulfilling pastime and go beyond what you previously thought you could achieve. Each of the 28 pieces in Book 1 is accompanied by two full pages of easy-to-understand practice tips, all designed to get your fingers speeding comfortably across the keys once again! There are more comprehensive Piano Technique and Theory sections at the front and back of each book, so you can also delve deeper to regain a fuller understanding of music and technique. Each book is arranged in 4 progressive sections, with Book 1 moving from Elementary to Intermediate and Book 2 taking you from Late Intermediate to Late Advanced. Dip in and out wherever your level of playing suits: this two-book course starts with simple and elegant miniatures and concludes with the famously showy Prelude in C-sharp minor by Rachmaninoff! Confident pianists could start with Book 2, but there is a wealth of delightful repertoire and valuable practice tips in Book 1 it's always useful to go "back to basics." Baroque, Classical and Romantic works sit alongside Jazz, Ragtime, contemporary or traditional pieces at every level, so each lesson brings something different and you'll learn to play in a range of styles, some of which may be new to your fingers. If you often find yourself saying "I used to play the piano " but wish you still did, then Play It Again: Piano is the resource for you! Grade Eight Music Theory for ABRSM Candidates A complete course for students taking the ABRSM Grade 8 music theory exam. This book takes you through each topic with a step-by-step approach. The topic in each unit is explained in simple terms with several musical examples, and is then followed by a page of consolidation exercises so that you can immediately practice your new-found knowledge. Model answers are provided. The course covers the ABRSM syllabus for Grade Eight, which is an advanced level. The course is broken down into four sections, which mirror the way the exam paper is organised - The Trio Sonata, Keyboard Reconstruction, Composition and Score-based Analysis Questions. Question 1 in the ABRSM grade 8 music theory exam requires you to "fill in the gaps" in a Baroque Trio Sonata. In this section of the course, you will learn exactly what a Trio Sonata is, and how it is constructed, before having a go at building one yourself, step-by-step. You will learn how to cope with common stumbling blocks, such as minor keys, modulation and suspensions, as well as mastering the art of applying sensitive melodic decoration, added 7th and 9th chords and their idiosyncracies. You will also learn how to identify sections where sequences imitation or repetitive motifs are expected. A method for approaching the question in a systematic way is provided. In the keyboard reconstruction question, you are

given a handful of bars from a piano piece written in the Romantic era, and will need to supply the missing bars. This section of the course explains exactly how to do that, as well as highlighting some common pitfalls. You'll also learn how to adhere to the Romantic style, and how your knowledge of the "rules of harmony" will help you answer this question in a more effective way. The third section of the course covers composition. You will find out exactly what the examiner is expecting of you, in order to gain top marks for your composition. At this level, the examiner is expecting you to write something which is reasonably sophisticated, which means making use of a variety of recognised techniques. You will learn how to structure your piece into phrases with cadences, how to plan and execute modulations, how to adapt melodic ideas with sequences, imitation and rhythmic motifs and how to write "idiomatically" for the instrument in question. The last section of the course is general knowledge - you will learn how to answer a range of questions based on a score for either a chamber work, or an orchestral piece. You'll learn about how ensemble scores are organised, which instruments transpose and how, as well as a myriad of other skills such as intervals, writing out ornaments, or analysing harmony. Similar to the requirements at grade 7, the grade 8 paper generally expects your knowledge and interpretive skills to be wider, more descriptive, and more accurate at this grade. Perfect for self-study, or to use with your music teacher. Ample musical illustrations and exercises are included, with model answers provided. Each page has been carefully designed to be suitable for photocopying. This book is "bilingual," and contains both UK and USA musical terminology.

Grade Six Music Theory for ABRSM Candidates A complete course for students taking the ABRSM Grade 6 music theory exam. This book takes you through each topic with a step-by-step approach. The topic in each unit is explained in simple terms with several musical examples, and is then followed by a page of consolidation exercises so that you can immediately practice your new-found knowledge. Model answers are provided. The course covers the ABRSM syllabus for

Grade Six, which is a high intermediate level. The course is broken down into three sections, which mirror the way the exam paper is organised - harmony, composition and score-based analysis questions. In the harmony section, you will learn how chords are constructed, about their inversions and the way they are commonly put into progressions and cadences. You will learn how to harmonise a simple melody, by choosing chords that both sound good, and also agree with the "rules" of harmony set down in the classical era. Also in this section, you will learn how to read "figured bass", which is a short-hand system for notating chords. You will be able to produce a piece of 4-part harmony from a single figured bass line, and also learn how to create a figured bass line which will fit a given melody. You will learn how the figured bass system works, how to answer the exam questions, with plenty of tips to help you remember as you go along. In the composition section of the course, you will find out exactly what the examiner is expecting of you, in order to gain top marks for your composition. You will learn how to structure a melody, how to use the ideas from the provided given opening to create the rest of the piece, and how to write performance directions which are meaningful and musical. You will also learn about changing key (modulation) and the most effective way to do this. The last section of the course is general knowledge - you will learn how to answer a range of questions based on a score for either a chamber work, or an orchestral piece. You'll learn about how ensemble scores are organised, which instruments transpose and how, as well as a myriad of other skills such as intervals, writing out ornaments, or analysing harmony. Perfect for self-study, or to use with your music teacher. Ample musical illustrations and exercises are included, with model answers provided. Each page has been carefully designed to be suitable for photocopying. This book is "bilingual", and contains both UK and USA musical terminology.
