An important new study that seeks to establish what Victorian writers said about Greek culture and how their interpretations both molded and reflected the attitudes and values of the Victorian age. "Turner's readable, intelligent, thorough, witty, and magisterial book discovers and narrates a fundamental strain in British intellectual life from the late eighteenth century until the beginning of World War I. It is THE book on its subject. . . . Turner's study has changed, changed utterly, the Victorian landscape."-Richard Tobias, Victorian Poetry

The ancient Chinese scholars are fond of applying the Yin and Yang diagram to correlate almost everything. This book continues that tradition and uses the model to study other non-"dialectical" theories and models. The major finding qua contribution in this publication is to point out that the four diagrams are equivalent to the BaGua or BaGuaTu (BG), a set of eight ancient China symbolic notations/gossip. Another finding is that dialectical/crab and frog motion remark is just the opposite of a non-dialectical/crab and frog motion (usually deductive, linear, or cause and effect) remark, or, at best, they must meet half-way. The two major tasks of this book are to, first, apply the author's one-dot theory, which is shored up by the crab and frog motion model, to convert other theories and models as well as studies and, second, apply his theory and model to reinvent some well-known western-derived theories and models and studies, such as game theory. The attempt is to narrow down the gap between the East and the West scholarship/XueShu, broadly defined, making the book of interest to Eastern and Western philosophers and scholars alike.

One-dot Theory Described, Explained, Inferred, Justified, and Applied

The inspiration author Michael B. Hammer received when speaking with others about the Israeli-Palestinian problem led to The Dot on the I in History: On Gentiles and Jews—Scrolling the Internet with the goal of helping others better understand the problem. When the issues involve intertribal, interracial, interreligious, and international human relationships lasting over several generations, they often become so complex one does not see the forest for trees, unless one knows where and when the seeds were planted. That is what history is all about. This book aspires to explain what Judaism, Christianity, and Islam have in common, how they differ, and how they have evolved. You'll also learn how the Internet has affected and changed those involved in the Middle East conflict. With this information, you will have a better understanding of the real reasons for such world-changing events as what took place on 9/11.

A History of the Literature of Ancient Greece

“Fascinating . . . memorable . . . revealing . . . perhaps the best of Carl Sagan’s books.”—The Washington Post Book World (front page review) In *Cosmos*, the late astronomer Carl Sagan cast his gaze over the magnificent mystery of the Universe and made it accessible to millions of people around the world. Now in this stunning sequel, Carl Sagan completes his revolutionary journey through space and time. Future generations will look back on our epoch as the time when the human race finally broke into a radically new frontier—space. In *Pale Blue Dot*, Sagan traces the spellbinding history of our launch into the cosmos and assesses the future that looms before us as we move out into our own solar system and on to distant galaxies beyond. The exploration and eventual settlement of other worlds is neither a fantasy nor luxury, insists Sagan, but rather a necessary condition for the survival of the human race. “Takes readers far beyond *Cosmos* . . . Sagan sees humanity’s future in the stars.”—Chicago Tribune

The Cambridge Companion to Greek Comedy

This volume examines whether dramatic fragments should be approached as parts of a greater whole or as self-contained entities. It comprises contributions by a broad spectrum of international scholars: by young researchers working on fragmentary drama as well as by well-known experts in this field. The volume explores another kind of fragmentation that seems already to have been embraced by the ancient dramatists: quotations extracted from their context and immersed in a new whole, in which they work both as cohesive unities and detachable entities. Sections of poetic works circulated in antiquity not only as parts of a whole, but also independently, i.e. as component fractions, rather like quotations on facebook today. Fragmentation can thus be seen operating on the level of dissociation, but also on the level of cohesion. The volume investigates interpretive possibilities, quotation contexts, production and reception stages of fragmentary texts, looking into the ways dramatic fragments can either increase the depth of fragmentation or strengthen the intensity of cohesion.

Edinburgh Companion to Ancient Greece and Rome

Since the Renaissance of the 14th through 17th centuries, and particularly since the Enlightenment of the 18th century, the ancient creeds of faith have been under serious fire, and the struggle has not gone well for popular religion in America. The rapid advances made by the physical sciences in the 19th and 20th centuries and the corresponding reliance on scientific accomplishments in American life have been matched by the growing influence of reason in the way Americans think about religion. Except for pockets of resistance, these developments have negatively influenced the practical role of traditional religion in American life. These essays-published over a twenty-year period as newspaper editorials addressed to the general public-confront popular beliefs and morals with the challenge of human reason. At issue in this meeting of faith and reason is nothing less than the nature of religion in the twenty-first century. Will faith embrace reason to create a House where both dwell in harmony or will faith ignore the claims of reason and continue to live in an Enchanted Forest? Each essay, written in the practical language of the streets, attempts to dialogue with the general reader and gently provoke critical thinking on sensitive issues of belief.
