CA IPC IT-SM MCQ Book

The Boston Consulting Group

Management accountancy has a dynamic role to play in the competitive strategy of modern global businesses. This book sets out key strategic principles and then assesses how management accountancy can affect and direct these strategies. Engaging case studies reveal how theories and concepts translate into real business practice. Throughout, the book emphasizes: - how accounting initiatives can trigger assessment and improvement of performance management - the importance of managerial decision making to good business practice - how today's management accountancy measures against current research
Written for advanced undergraduate, postgraduate and MBA students taking courses on management accounting and performance measurement and management, the book will be also of interest to management and business consultants, professional accountants and accounting academics.

D & B Consultants Directory

A behind-the-scenes, revelatory history of the controversial consulting firm traces its decades-long influence in both business and political arenas, citing its role in the establishment of mainstream practices and modern understandings about capitalism while evaluating the failures that have compromised its reputation. 60,000 first printing.

Women Want More

The world faces social, political, and economic turmoil on an unprecedented scale—along with unsettling levels of turbulence and volatility. Market leadership today is less of a predictor of leadership tomorrow. Therefore, senior executives today must strive to own the future. In *Own the Future*, The Boston Consulting Group, one of the world's most prestigious and innovative management consulting firms, offers a roadmap. Drawing on the firm's experience advising organizations on how to achieve and sustain competitive advantage, this book offers 50 ideas to help readers chart their organization's path to future leadership. The articles are organized along ten attributes critical to success in the current environment—adaptive, global, connected, sustainable, customer-first, fit to win, value-driven, trusted, bold, and inspiring. The future may be unknowable, but The Boston Consulting Group offers insights from its 50 years of practice on how readers can position their organization to win—to change the game and to own the future.

Rethinking Development Challenges for Public Policy

Covers topical issues for Africa's development, economics and politics of climate change, water management, public service delivery, and delivering aid. The authors argue that these issues should be included in the post-MDG paradigm and add an important voice to recent moves by academics and practitioners to engage with each other.

Globalisation and Advertising in Emerging Economies

Brazil, Russia, India and China are four of the largest and most dynamic contemporary emerging economies in the world. Strong economic growth in each of these economies has been accompanied by the expansion of the advertising and consumer goods sectors. Using a series of country studies, this book explores the dynamics of global capitalism from the perspective of global advertising. The book highlights the on-going expansion of advertising and consumerism against the wider socio-economic, political and cultural contexts. It provides fresh insights about contemporary global priorities, and argues that advertising plays a key role linking culture and the economy. By presenting individual case studies of advertising campaigns, it offers examples of the globalisation of specific brands. Environmental implications of the expansion of advertising and its role in stimulating consumerism are explored in the context of the four emerging economies. The book compares and contrasts the individual country profiles, and makes an assessment of the validity of the argument regarding their projected importance and the likelihood of their future dominance of the global economy.

The Contemporary Consultant

The Dun & Bradstreet magazine for small-business management.

Hardball

In *Women Want More*, Michael Silverstein and Kate Sayre, two of the world's leading authorities on the retail business, argue that women are the key to fixing the economy. Based on a groundbreaking study and offering tremendous insight into the purchasing habits and power of women, *Women Want More* doesn't just offer a glimpse into consumer behavior; it reveals what consumer behavior says about human psychology and desire.

Globality

A collection of the best thinking from one of the most innovative management consulting firms in the world For more than forty years, The Boston Consulting Group has been shaping strategic thinking in business. The Boston Consulting Group on Strategy offers a broad and up-to-date selection of the firm's best ideas on strategy with fresh ideas, insights, and practical lessons for managers, executives, and entrepreneurs in every industry. Here's a sampling of the provocative thinking you'll find inside: "You have to be the scientist of your own life and be astonished four times: at what is, what always has been, what once was, and what could be." "The majority of products in most companies are cash traps . . . [They] are not only worthless, but a perpetual drain on corporate resources." "Use more debt than your competition or get out of the business." "When information flows freely, reputation, more than reciprocity, becomes the basis for trust." "As a strategic weapon, time is the equivalent of money, productivity, quality, even innovation." "When brands become business systems, brand management becomes far too important to leave to the marketing department." "The winning organization of the future will look more like a collection of jazz ensembles than a symphony orchestra." "Most of our organizations today derive from a model whose original purpose was to control creativity." "Rather than being an obstacle, uncertainty is the very engine of transformation in a business, a continuous source of new opportunities." "IP assets lack clear property lines. Every bit of intellectual property you can own comes with connections to other valuable innovations."

Global Marketing Strategies

Two leading physicians' prescription for solving our health care problems: organizing the fragmented system that delivers care. One of the most daunting challenges facing the new U.S. administration is health care reform. The size of the system, the number of stakeholders, and ever-rising costs make the problem seem almost intractable. But in *Chaos and Organization in Health Care*, two leading physicians offer an optimistic prognosis. In their frontline work as providers, Thomas Lee and James Mongan see the inefficiency, the missed opportunities, and the occasional harm that can result from

the current system. The root cause of these problems, they argue, is chaos in the delivery of care. If the problem is chaos, the solution is organization, and in this timely and outspoken book, they offer a plan. In many ways, this chaos is caused by something good: the dramatic progress in medical science—the explosion of medical knowledge and the exponential increase in treatment options. Imposed on a fragmented system of small practices and individual patients with multiple providers, progress results in chaos. Lee and Mongan argue that attacking this chaos is even more important than whether health care is managed by government or controlled by market forces. Some providers are already tightly organized, adapting management principles from business and offering care that is by many measures safer, better, and less costly. Lee and Mongan propose multiple strategies that can be adopted nationwide, including electronic medical records and information systems for sharing knowledge; team-based care, with doctors and other providers working together; and disease management programs to coordinate care for the sickest patients.

Lords of Strategy

"I had the privilege of working closely with Marvin and McKinsey for many years. This book makes Marvin come to life and perpetuates him as a role model." -Peter F. Drucker "A wonderful book about a wonderful man. In many ways, Marvin's McKinsey framed the hypotheses in our own search for excellence—for example, passion for values, belief in people as the prime resource, and willingness to let people experiment. As well as I thought I knew Marvin, however, this remarkable book, drawing on the collective memories of those who worked most closely with him, taught me a ton about how extraordinary the man really was and what made him that way. Many have called Drucker the man who invented management; I think history will conclude that both he and Marvin Bower share that pedestal." -Bob Waterman, coauthor of *In Search of Excellence* "Marvin Bower became a legend, not just within McKinsey & Company, but within professional services and the business world more broadly. In everything he did and said, he embodied the professional approach and the importance of values. This book sheds remarkable insight on a remarkable man and on the power of constancy of purpose." -Ian Davis, Worldwide Managing Director, McKinsey & Co. "It is as Marvin would have wanted it—simple, honest, fact-based, wonderful stories with a long-term perspective. An insightful read about the father of management consulting." -Lois Juliber, retired COO, Colgate-Palmolive "This book provides fascinating insight into the early days of modern management consulting. It is an extremely enlightening look at the origin of one of America's most important professions and one of America's most innovative leaders." -Thomas H. Lee, founder, Chairman, and President, Thomas H. Lee Partners L.P.

Henderson on Corporate Strategy

Imagine, if you can, the world of business - without corporate strategy. Remarkably, fifty years ago that's the way it was.

Businesses made plans, certainly, but without understanding the underlying dynamics of competition, costs, and customers. It was like trying to design a large-scale engineering project without knowing the laws of physics. But in the 1960s, four mavericks and their posses instigated a profound shift in thinking that turbocharged business as never before, with implications far beyond what even they imagined. In *The Lords of Strategy*, renowned business journalist and editor Walter Kiechel tells, for the first time, the story of the four men who invented corporate strategy as we know it and set in motion the modern, multibillion-dollar consulting industry: Bruce Henderson, founder of Boston Consulting Group Bill Bain, creator of Bain & Company Fred Gluck, longtime Managing Director of McKinsey & Company Michael Porter, Harvard Business School professor Providing a window into how to think about strategy today, Kiechel tells their story with novelistic flair. At times inspiring, at times nearly terrifying, this book is a revealing account of how these iconoclasts and the organizations they led revolutionized the way we think about business, changed the very soul of the corporation, and transformed the way we work.

Tb-Management MtgExc Cust Ex

New tools for managing complexity Does your organization manage complexity by making things more complicated? If so, you are not alone. According to The Boston Consulting Group's fascinating Complexity Index, business complexity has increased sixfold during the past sixty years. And, all the while, organizational complicatedness—that is, the number of structures, processes, committees, decision-making forums, and systems—has increased by a whopping factor of thirty-five. In their attempt to respond to the increasingly complex performance requirements they face, company leaders have created an organizational labyrinth that makes it more and more difficult to improve productivity and to pursue innovation. It also disengages and demotivates the workforce. Clearly it's time for leaders to stop trying to manage complexity with their traditional tools and instead better leverage employees' intelligence. This book shows you how and explains the implications for designing and leading organizations. The way to manage complexity, the authors argue, is neither with the hard solutions of another era nor with the soft solutions—such as team building and feel-good “people initiatives”—that often follow in their wake. Based on social sciences (notably economics, game theory, and organizational sociology) and The Boston Consulting Group's work with more than five hundred companies in more than forty countries and in various industries, authors Yves Morieux and Peter Tollman recommend six simple rules to manage complexity without getting complicated. Showing why the rules work and how to put them into practice, Morieux and Tollman give managers a much-needed tool to reinvigorate people in the face of seemingly endless complexity. Included are detailed examples from companies that have achieved a multiplicative effect on performance by using them. It's time to manage complexity better. Employ these six simple rules to foster autonomy and cooperation and to effectively handle business complexity. As a result, you will improve productivity, innovate more, reengage your workforce, and seize opportunities to create competitive advantage.

Management

Chaos and Organization in Health Care

Discusses techniques for business managers for planning company growth, overcoming competition, dealing with inflation, improving the organization of the corporation, and coping with personnel problems

Vault Guide to Top Internships

Thinking in New Boxes

Provides a profile of the emerging middle class, primed to transform the global marketplace, explaining who these consumers are, what they buy and why, how they think and shop, and how their needs and tastes are changing.

D & B Reports

You think you have a winning strategy. But do you? Executives are bombarded with bestselling ideas and best practices for achieving competitive advantage, but many of these ideas and practices contradict each other. Should you aim to be big or fast? Should you create a blue ocean, be adaptive, play to win—or forget about a sustainable competitive advantage altogether? In a business environment that is changing faster and becoming more uncertain and complex almost by the day, it's never been more important—or more difficult—to choose the right approach to strategy. In this book, The Boston Consulting Group's Martin Reeves, Knut Haanæs, and Janmejaya Sinha offer a proven method to determine the strategy approach that is best for your company. They start by helping you assess your business environment—how unpredictable it is, how much power you have to change it, and how harsh it is—a critical component of getting strategy right. They show how existing strategy approaches sort into five categories—Be Big, Be Fast, Be First, Be the Orchestrator, or simply Be Viable—depending on the extent of predictability, malleability, and harshness. In-depth explanations of each of these approaches will provide critical insight to help you match your approach to strategy to your environment, determine when and how to execute each one, and avoid a potentially fatal mismatch. Addressing your most pressing strategic challenges, you'll be able to answer questions such as: • What replaces planning when the annual cycle is obsolete? • When can we—and when should we—shape the game to our advantage? • How do we simultaneously implement different strategic approaches for different business units? • How do we manage the inherent contradictions in formulating and executing

different strategies across multiple businesses and geographies? Until now, no book brings it all together and offers a practical tool for understanding which strategic approach to apply. Get started today.

McKinsey's Marvin Bower

Presents detailed information on top internships in the United States, including facts about employers, with location, contact information, application deadlines, qualifications and job descriptions.

Strategic Management

While information technology (IT) companies have a special affinity for the Internet, they are not necessarily using Internet marketing to its fullest potential. Addressing the specific Internet marketing needs of IT companies and written for IT marketing pros, this how-to guide shows how to make the best of a Web site, get the most out of online advertising and e-mail marketing, build a Web community, and participate in affiliate marketing programs. Numerous case studies from IT companies are used to illustrate the concepts.

Consulting Magazine

Introduces basic concepts in strategy, discusses costs, depreciation, pricing, shortages, debt, budgets, equity, and dividends, and provides examples of successful business strategies

Six Simple Rules

Today, time is the cutting edge. In fact, as a strategic weapon, contend George Stalk, Jr., and Thomas M. Hout, time is the equivalent of money, productivity, quality, even innovation. In this path-breaking book based upon ten years of research, the authors argue that the ways leading companies manage time—in production, in new product development, and in sales and distribution—represent the most powerful new sources of competitive advantage. With many detailed examples from companies that have put time-based strategies in place, such as Federal Express, Ford, Milliken, Honda, Deere, Toyota, Sun Microsystems, Wal-Mart, Citicorp, Harley-Davidson, and Mitsubishi, the authors describe exactly how reducing elapsed time can make the critical difference between success and failure. Give customers what they want when they want it, or the competition will. Time-based companies are offering greater varieties of products and services, at lower costs, and with quicker delivery times than their more pedestrian competitors. Moreover, the authors show that by refocusing their organizations on responsiveness, companies are discovering that long-held assumptions about the behavior of costs and

customers are not true: Costs do not increase when lead times are reduced; they decline. Costs do not increase with greater investment in quality; they decrease. Costs do not go up when product variety is increased and response time is decreased; they go down. And contrary to a commonly held belief that customer demand would be only marginally improved by expanded product choice and better responsiveness, the authors show that the actual results have been an explosion in the demand for the product or service of a time-sensitive competitor, in most cases catapulting it into the most profitable segments of its markets. With persuasive evidence, Stalk and Hout document that time consumption, like cost, is quantifiable and therefore manageable. Today's new-generation companies recognize time as the fourth dimension of competitiveness and, as a result, operate with flexible manufacturing and rapid-response systems, and place extraordinary emphasis on R&D and innovation. Factories are close to the customers they serve. Organizations are structured to produce fast responses rather than low costs and control. Companies concentrate on reducing if not eliminating delays and using their response advantage to attract the most profitable customers. Stalk and Hout conclude that virtually all businesses can use time as a competitive weapon. In industry after industry, they illustrate the processes involved in becoming a time-based competitor and the ways managers can open and sustain a significant advantage over the competition.

Beyond the MBA Hype

This book offers a complete discussion of product development in the pharmaceutical and biotechnology industries from discovery, to product launch, through life cycle management. The book is organized for optimal usefulness in the education and training of health care professionals (MD, PharmD, PhD), at universities. The format is a set of figures, tables and lists, along with detailed narrative descriptions, including real-life examples, illustrations, controversies in industry, and references. The editors and authors of the book are industry and research experts in a variety of disciplines.

Beyond Great

When BIC, manufacturer of disposable ballpoint pens, wanted to grow, it looked for an idea beyond introducing new sizes and ink colors. Someone suggested lighters. LIGHTERS? With an idea that seemed crazy at first, that bright executive, instead of seeing BIC as a pen company—a business in the PEN “box”—figured out that there was growth to be found in the DISPOSABLE “box.” And he was right. Now there are disposable BIC lighters, razors, even phones. The company opened its door to a host of opportunities. IT INVENTED A NEW BOX. Your business can, too. And simply thinking “out of the box” is not the answer. True ingenuity needs structure, hard analysis, and bold brainstorming. It needs to start THINKING IN NEW BOXES—a revolutionary process for sustainable creativity from two strategic innovation experts from The Boston Consulting Group (BCG). To make sense of the world, we all rely on assumptions, on models—on what Luc de Brabandere and Alan Iny call “boxes.” If we are unaware of our boxes, they can blind us to risks and opportunities. This innovative book

challenges everything you thought you knew about business creativity by breaking creativity down into five steps: • Doubt everything. Challenge your current perspectives. • Probe the possible. Explore options around you. • Diverge. Generate many new and exciting ideas, even if they seem absurd. • Converge. Evaluate and select the ideas that will drive breakthrough results. • Reevaluate. Relentlessly. No idea is a good idea forever. And did we mention Reevaluate? Relentlessly. Creativity is paramount if you are to thrive in a time of accelerating change. Replete with practical and potent creativity tools, and featuring fascinating case studies from BIC to Ford to Trader Joe's, *Thinking in New Boxes* will help you and your company overcome missed opportunities and stay ahead of the curve. This book isn't a simpleminded checklist. This is *Thinking in New Boxes*. And it will be fun. (We promise.) Praise for *Thinking in New Boxes* "Excellent . . . While focusing on business creativity, the principles in this book apply anywhere change is needed and will be of interest to anyone seeking to reinvent herself."—Blogcritics "Thinking in New Boxes is a five-step guide that leverages the authors' deep understanding of human nature to enable readers to overcome their limitations and both imagine and create their own futures. This book is a must-read for people living and working in today's competitive environment."—Ray O. Johnson, Ph.D., chief technology officer, Lockheed Martin "Thinking In New Boxes discusses what I believe to be one of the fundamental shifts all companies/brands need to be thinking about: how to think creatively, in order to innovate and differentiate our brands. We need to thrive and lead in a world of accelerating change and this book challenges us to even greater creativity in our thinking. One of the best business books I've read in a long time."—Jennifer Fox, CEO, Fairmont Hotels & Resorts "As impressive as teaching new tricks to old dogs, *Thinking in New Boxes* is both inspirational and practical—a comprehensive, step-by-step guide to sharpening one's wits in order to harness creativity in the workplace."—Peter Gelb, general manager, Metropolitan Opera From the Hardcover edition.

Statistics for Food Scientists

The practical approaches championed in this book have led to increasing the quality on many successful products through providing a better understanding of consumer needs, current product and process performance and a desired future state. In 2009, Frank Rossi and Viktor Mirtchev brought their practical statistical thinking forward and created the course "Statistics for Food Scientists". The intent of the course was to help product and process developers increase the probability of their project's success through the incorporation of practical statistical thinking in their challenges. The course has since grown and has become the basis of this book. Presents detailed descriptions of statistical concepts and commonly used statistical tools to better analyze data and interpret results Demonstrates thorough examples and specific practical problems of what food scientists face in their work and how the tools of statistics can help them to make more informed decisions Provides information to show how statistical tools are applied to improve research results, enhance product quality, and promote overall product development

Performance Measurement and Management

Drug and Biological Development

"Argues that monitoring one's electronic business communication 24/7 is actually counterproductive and offers a plan for companies to take time to ""disconnect"" in order to boost their productivity."

Your Strategy Needs a Strategy

The \$10 Trillion Prize

Own the Future

This book complements The handbook of Management Consulting: The Contemporary Consultant: Insights from Leading Experts, 1e but can also be studied separately. The book consists of 20 cases including Harvard and Stanford cases. The cases present the broad range of topics that are pertinent to current management consulting. Each of the four parts of the text presents a cogent introduction by the editors, delineating topics that are critical for today's consultants to understand. The cases represent major practice areas of consulting and afford new insights into change processes and other current management issues facing consulting firms. These cases, together with the handbook, will prepare consultants and other business managers for a successful future in a highly competitive consulting environment.

The Boston Consulting Group on Strategy

Internet Marketing for Information Technology Companies

a collection of the best thinking from one of the most innovative management consulting firms in the world. For the past thirty-five years, The Boston Consulting Group has been shaping the way business is done the world over, and now, Perspectives on Strategy offers a unique opportunity to acquaint readers with a broad selection of the firm's contributions.

A compilation of seventy-five of BCG's most influential articles and thought pieces, this book is an indispensable source of fresh ideas, insights, and practical lessons for managers, executives, and entrepreneurs in every industry. Here is a sampling of what's inside: * "[Business] competition is a battle royal in which there are many contenders, each of whom must be dealt with individually. Victory, if achieved, is more often won in the mind of a competitor than in the economic arena." * "The majority of products in most companies are cash traps. . . . [They] are not only worthless, but a perpetual drain on corporate resources." * "Use more debt than your competition or get out of the business." * "Displacement of high-cost competitors by lower prices benefits the customer." * "As a strategic weapon, time is the equivalent of money, productivity, quality, even innovation." * "When brands become business systems, brand management becomes far too important to leave to the marketing department." * "The winning organization of the future will look more like a collection of jazz ensembles than a symphony orchestra." * "Most of our organizations today derive from a model whose original purpose was to control creativity." * "Dumping should be encouraged. It is a gift from the nation that provides the products." * "Taxes should be levied when, and only when, individuals disinvest in order to consume. Capital still at work should not be taxed at all." The Boston Consulting Group is an innovator in business strategy worldwide. In fact, BCG and its founder, Bruce D. Henderson, may be best known internationally as the creators and architects of the discipline of business strategy. Innovative business concepts originating at the firm include "cash cow," "experience curve," "segment-of-one(r) marketing," "time-based competition," and "capabilities-based competition." Now, for the first time, BCG's most influential writings are gathered in a comprehensive collection, offering serious-minded readers access to BCG's thinking on the theory, development, and practice of business strategy. One way BCG shares its insights on strategy is through a series of publications known as Perspectives. Perspectives offer sharply focused views and recommendations on strategic business topics. Distributed to executives worldwide, Perspectives are typically no more than 1,200 words in length. This book brings together many of the most influential Perspectives, as well as several acclaimed articles published in the Harvard Business Review. Both timely and timeless, the seventy-five pieces included here are among the most innovative, controversial, and stimulating to have appeared over the past three decades. An anthology of the most provocative thinking from one of the world's most esteemed management consulting firms, Perspectives on Strategy is essential reading for senior managers, executives, entrepreneurs, and students of strategy and business.

Competing Against Time

Great is no longer good enough. Beyond Great delivers a powerful new playbook of 9 core strategies to thrive in a post-COVID world where all the rules of the game are being re-written. Beyond Great answers to two fundamental questions which face business leaders today in a world shaped by daunting and disruptive technological, economic, and social change. First, what is outstanding performance in this new volatile era? Second, how do we build competitive advantage in a world with new and often uncertain rules? Supported by years of research and hands-on consulting practice, this book

presents a comprehensive framework for building a high performing, resilient, adaptive, and socially responsible global company. The book begins by taking an incisive look at these disruptive forces transforming globalization, including economic nationalism; the boom in data flows and digital commerce; the rise of China; heightened public concerns about capitalism and the environment; and the emergence of borderless communities of digitally connected consumers. Distilled from the study of hundreds of companies and interviews with dozens of business leaders, the authors have distilled nine core strategies - the new winning playbook of the 21st century. Beyond Great argues that business leaders today must lead with a new kind of openness, flexibility and light-footedness, constantly layering in new strategies and operational norms atop existing ones to allow for "always-on" transformation. Leaders must master a whole new set of rules about what it takes to be "global," becoming shapeshifters adept at handling contradiction, multiplicity, and nuance. This book will show them how.

Perspectives on Strategy from The Boston Consulting Group

Hardball takes leaders deep inside the world of hardball competition - a world where the players are zealously committed to winning and relentlessly driven to strengthen their competitive positions, creating a virtuous cycle that puts them far out of competitors' reach. Based on twenty-five years of experience advising and observing a range of companies, Stalk and Lachenauer reveal how hardball competitors achieve decisive victories - without bending the law and without compromising their obligations to customers and stakeholders. These companies often play rough, and they don't apologize for it. Yet they are also extraordinarily adept at the "soft" side of management - rallying talent and building culture through a laserlike focus on the few issues most critical to success. Using detailed and engaging stories from many industries, Hardball outlines seven classic hardball strategies: unleash massive and overwhelming force, exploit anomalies, threaten competitors' profit sanctuaries, take it and make it your own, entice competitors' into retreat, break industry compromises, and hardball M&A. The authors reveal who uses hardball strategies, under what circumstances each strategy is most effective, and how to orchestrate the attack.

Clausewitz on Strategy

Globalization is about Americans outsourcing product development and services to other countries. Globality is the next step, where rapidly developing economies from around the world are now competing with us head to head. The authors present a strong case that the economic climate in which we have lived is going to change in unprecedented ways. "their insights into the competitive battle in emerging markets are so keen." -William J. Holstein of The New York Times "Many American chief executives, it turns out, are aiming at emerging markets And they will find many insights into prevailing in those battles in this book." -William J. Holstein of The New York Times "for any corporate strategist pondering the challenges and opportunities of globalization, this book is an indispensable guide." -John Cummings of Business Finance "While the global economy has been a hot topic for at least two decades, it is in constant need of updating GLOBALITY does the job nicely." - BNET "[This] vividly detailed tome describes the latest shift in globalization from a one-way street of Western domination to an increasingly competitive global playing field, where businesses from once-discounted nations are solidifying their standing." - CIO Insight "Whatever the next New World Order turns out to be, the advice in GLOBALITY will come in useful, for multinationals and individual workers alike." -Business Pundit "A smart discourse on how local

companies in developing economies, such as China, India and Brazil, are bucking tradition and going for broke on their own terms" -BNET "This book is a must-read for leaders of companies in the developed world who want to get into the globality act and stay in it." - Cecil Johnson, McClatchy-Tribune News "Get ready for a new wave of challengers, 'bursting their way onto the big stage.' So say the three authors of this smart analysis about the latest developments in global competition" - Andrea Sachs of TIME
