A Patriot's History of the United States

Announcing the prequel! From Heidi Murkoff, author of the world's bestselling pregnancy and parenting books, comes the must-have guide every expectant couple needs before they even conceive - the first step in *What to Expect: What to Expect Before You're Expecting*. Medical groups now recommend that all hopeful parents plan for baby-making at least three months before they begin trying. And who better to guide want-to-be mums and dads step-by-step through the preconception (and conception) process than Heidi Murkoff? It's all here. Everything couples need to know before sperm and egg meet. Packed with the same kind of reassuring, empathic and practical information and advice that readers have come to expect from *What to Expect*, only sooner. Which baby-friendly foods to order up (say yes to yams) and which fertility-busters to avoid (see you later, saturated fat); lifestyle adjustments that you'll want to make (cut back on cocktails and caffeine) and those you can probably skip (that switch to boxer shorts). How to pinpoint ovulation, keep on-demand sex sexy, and separate conception fact from myth. Plus, when to seek help and the latest on fertility treatments - from IVF to surrogacy and more. Complete with a fill-in fertility journal to keep track of the baby-making adventure and special tips throughout for hopeful dads. Next step? *What to Expect When You're Expecting*, of course.

Will Evans's writings should find a special niche in the small but significant body of literature from and about traders to the Navajos. Evans was the proprietor of the Shiprock Trading Company. Probably more than most of his fellow traders, he had a strong interest in Navajo culture. The effort he made to record and share what he learned certainly was unusual. He published in the Farmington and New Mexico newspapers and other periodicals, compiling many of his pieces into a book

manuscript. His subjects were Navajos he knew and traded with, their stories of historic events such as the Long Walk, and descriptions of their culture as he, an outsider without academic training, understood it. Evans's writings were colored by his fondness for, uncommon access to, and friendships with Navajos, and by who he was: a trader, folk artist, and Mormon. He accurately portrayed the operations of a trading post and knew both the material and artistic value of Navajo crafts. His art was mainly inspired by Navajo sandpainting. He appropriated and, no doubt, sometimes misappropriated that sacred art to paint surfaces and objects of all kinds. As a Mormon, he had particular views of who the Navajos were and what they believed and was representative of a large class of often-overlooked traders. Much of the Navajo trade in the Four Corners region and farther west was operated by Mormons. They had a significant historical role as intermediaries, or brokers, between Native and European American peoples in this part of the West. Well connected at the center of that world, Evans was a good spokesperson.

Jamie Glowacki—potty-training expert, Pied Piper of Poop, and author of the popular guide, *Oh Crap! Potty Training*—shares her proven 6-step plan to help you toilet train your preschooler quickly and successfully. Worried about potty training? Let Jamie Glowacki, potty-training expert, show you how it's done. Her 6-step, proven process to get your toddler out of diapers and onto the toilet has already worked for tens of thousands of kids and their parents. Here's the good news: your child is probably ready to be potty trained EARLIER than you think (ideally, between 20–30 months), and it can be done FASTER than you expect (most kids get the basics in a few days—but Jamie's got you covered even if it takes a little longer). If you've ever said to yourself: ** How do I know if my kid is ready? ** Why won't my child poop in the potty? ** How do I avoid "potty power struggles"? ** How can I get their daycare provider on board? ** My kid was doing so well—why is he regressing? ** And what about nighttime?! *Oh Crap! Potty Training* can solve all of these (and other) common issues. This isn't theory, you're not bribing with candy, and there are no gimmicks. This is real-world, from-the-trenches potty training information—all the questions and all the ANSWERS you need to do it once and be done with diapers for good.

Shadow of the Titanic

For thirty years, Peter Singer's *Practical Ethics* has been the classic introduction to applied ethics. For this third edition, the author has revised and updated all the chapters and added a new chapter addressing climate change, one of the most important ethical challenges of our generation. Some of the questions discussed in this book concern our daily lives. Is it ethical to buy luxuries when others do not have enough to eat? Should we buy meat from intensively reared animals? Am I doing something wrong if my carbon footprint is above the global average? Other questions confront us as concerned citizens: equality and discrimination on the grounds of race or sex; abortion, the use of embryos for research and euthanasia; political violence and terrorism; and the preservation of our planet's environment. This book's lucid style and provocative arguments make it an ideal text for university courses and for anyone willing to think about how she or he ought to live.

Books of the Brave

Since its original publication in 1949, Irving A. Leonard's pioneering *Books of the Brave* has endured as the classic account of the introduction of literary culture to Spain's New World. Leonard's study documents the works of fiction that accompanied and followed the conquistadores to the Americas and goes on to argue that popular texts influenced these men and shaped the way they thought and wrote about their New World experiences. For the first time in English, this edition combines Leonard's text with a selection of the documents that were his most valuable sources--nine lists of books destined for the Indies. Containing a wealth of information that is sure to spark future study, these lists provide the documentary evidence for what is perhaps Leonard's greatest contribution: his demonstration that royal and inquisitorial prohibitions failed to control the circulation of books and ideas in colonial Spanish America. Rolena Adorno's introduction signals the lasting value of *Books of the Brave* and brings the reader up to date on developments in cultural-historical studies that have shed light on the role of books in Spanish American colonial culture. Adorno situates Leonard's work at the threshold between older, triumphalist views of Spanish conquest history and more recent perspectives engendered by studies of native American peoples. With its rich descriptions of the book trade in both Spain and America, *Books of the Brave* has much to offer historians as well as literary critics. Indeed, it is a highly readable and engaging book for anyone interested in the cultural life of

What happens when the bottlenecks that stand between supply and demand in our culture go away and everything becomes available to everyone? "The Long Tail" is a powerful new force in our economy: the rise of the niche. As the cost of reaching consumers drops dramatically, our markets are shifting from a one-size-fits-all model of mass appeal to one of unlimited variety for unique tastes. From supermarket shelves to advertising agencies, the ability to offer vast choice is changing everything, and causing us to rethink where our markets lie and how to

get to them. Unlimited selection is revealing truths about what consumers want and how they want to get it, from DVDs at Netflix to songs on iTunes to advertising on Google. However, this is not just a virtue of online marketplaces; it is an example of an entirely new economic model for business, one that is just beginning to show its power. After a century of obsessing over the few products at the head of the demand curve, the new economics of distribution allow us to turn our focus to the many more products in the tail, which collectively can create a new market as big as the one we already know. The Long Tail is really about the economics of abundance. New efficiencies in distribution, manufacturing, and marketing are essentially resetting the definition of what's commercially viable across the board. If the 20th century was about hits, the 21st will be equally about niches.

117 marathons, 52 days, 32 pairs of shoes, 57 years old: A fascinating glimpse inside the mind of an ultramarathon runner and the inspirational saga of his phenomenal journey running across America. The ultimate endurance athlete, Marshall Ulrich has run more than 100 foot races averaging over 100 miles each, completed 12 expedition-length adventure races, and ascended the Seven Summits - including Mount Everest - all on his first attempt. Yet his run from California to New York- the equivalent of running two marathons and a 10K every day for nearly two months straight - proved to be his most challenging effort yet. Featured in the recent documentary film, Running America, Ulrich clocked the 3rd fastest transcontinental crossing to date and set new records in multiple divisions. In Running on Empty, he shares the gritty backstory, including brushes with death, run-ins with the police, and the excruciating punishments he endured at the mercy of his maxed-out body. Ulrich also reached back nearly 30 years to when the death of the woman he loved drove him to begin running - and his dawning realization that he felt truly alive only when pushed to the limits. Filled with mind-blowing stories from the road and his sensational career, Ulrich's memoir imbues an incredible read with a universal message for athletes and nonathletes alike: face the toughest challenges, overcome debilitating setbacks, and find deep fulfillment in something greater than achievement [Watch a Video](#)

A classic and impassioned account of the first revolution in the Third World. This powerful, intensely dramatic book is the definitive account of the Haitian Revolution of 1794-1803, a revolution that began in the wake of the Bastille but became the model for the Third World liberation movements from Africa to Cuba. It is the story of the French colony of San Domingo, a place where the brutality of master toward slave was commonplace and ingeniously refined. And it is the story of a barely literate slave named Toussaint L'Ouverture, who led the black people of San Domingo in a successful struggle against successive invasions by overwhelming French, Spanish, and English forces and in the process helped form the first independent nation in the Caribbean.

What to Expect: Before You're Expecting

Running on Empty

Everyone wants happiness and success, yet the pursuit of both has never been more elusive. As work and personal demands rise, we try to keep up by juggling everything better, moving faster, and doing more. While we might succeed in the short term, this approach comes at a high cost in the long term: it hurts our well-being, our relationships, and—paradoxically—our productivity. In this life-changing book, Emma Seppälä explains that the reason we are burning ourselves out is that we fall for outdated theories of success. We are taught that getting ahead means doing everything that's thrown at us with razor-sharp focus and iron discipline, that success depends on our drive and talents, and that achievement cannot happen without stress. The Happiness Track demolishes these counterproductive theories. Drawing on the latest scientific research on happiness, resilience, willpower, compassion, positive stress, creativity, and mindfulness, Seppälä demonstrates that being happy is the most productive thing we can do to thrive—whether at work or at home. She shares practical strategies for applying these scientific findings to our daily lives. A fulfilling, successful, and anxiety-free life is within your reach. The Happiness Track will show you the way. Happiness Is the Fast Track to

Success “Are you a hard-driving, multitasking, conscientiously striving professional? Then your ideas about success are probably all wrong—and you need The Happiness Track, Dr. Emma Seppälä’s investigation into the counter-intuitive factors that create career and life success. The best news of all? All these skills are well within your grasp.”—Daniel H. Pink, author of *Drive* and *A Whole New Mind*

“Emma Seppälä convinces us that reconfiguring our brain for happiness can change the way our lives unfold and the way we approach success. A worthwhile read for anyone who wants to achieve a successful and fulfilling life.”—Amy Cuddy, professor at Harvard Business School and author of *Presence*

“Backed by extensive research in psychology and neuroscience, *The Happiness Track* offers a wealth of insight on changing how we approach our work, our personal lives, and our relationships. It’s a carefully researched, engaging look at how to improve ourselves without losing our authenticity or our sanity.”—Adam Grant, Wharton professor and New York Times bestselling author of *Give and Take* and *Originals*

“Through her research-backed strategies, Emma Seppälä teaches us not only how to thrive in our chosen profession, but how to stay true to ourselves—and enjoy every moment of the process.”—Susan Cain, cofounder of *Quiet Revolution* and New York Times bestselling author of *Quiet*

“For decades we’ve been tied to theories of success that have burned us out and driven us into the ground—because we don’t know of any alternatives. *The Happiness Track* provides us with a highly readable, science-backed solution to obtaining sustainable success, the sort of success we are all really striving for, that leaves us fulfilled, happy, and healthy.”—Scott Barry Kaufman, Ph.D., scientific director at the Imagination Institute at the University of Pennsylvania

Why is it so hard to make lasting changes in our companies, in our communities, and in our own lives? The primary obstacle is a conflict that's built into our brains, say Chip and Dan Heath, authors of the critically acclaimed bestseller *Made to Stick*. Psychologists have discovered that our minds are ruled by two different systems - the rational mind and the emotional mind—that compete for control. The rational mind wants a great beach body; the emotional mind wants that Oreo cookie. The rational mind wants to change something at work; the emotional mind loves the comfort of the existing routine. This tension can doom a change effort - but if it is overcome, change can come quickly. In *Switch*, the Heaths show how everyday people - employees and managers, parents and nurses - have united both minds and, as a result, achieved dramatic results:

- The lowly medical interns who managed to defeat an entrenched, decades-old medical practice that was endangering patients
- The home-organizing guru who developed a simple

technique for overcoming the dread of housekeeping • The manager who transformed a lackadaisical customer-support team into service zealots by removing a standard tool of customer service In a compelling, story-driven narrative, the Heaths bring together decades of counterintuitive research in psychology, sociology, and other fields to shed new light on how we can effect transformative change. Switch shows that successful changes follow a pattern, a pattern you can use to make the changes that matter to you, whether your interest is in changing the world or changing your waistline.

IN the early morning hours of April 15, 1912, the icy waters of the North Atlantic reverberated with the desperate screams of more than 1,500 men, women, and children—passengers of the once majestic liner Titanic. Then, as the ship sank to the ocean floor and the passengers slowly died from hypothermia, an even more awful silence settled over the sea. The sights and sounds of that night would haunt

each of the vessel's 705 survivors for the rest of their days. Although we think we know the story of Titanic—the famously luxurious and supposedly unsinkable ship that struck an iceberg on its maiden voyage from Britain to America—very little has been written about what happened to the survivors after the tragedy. How did they cope in the aftermath of this horrific event? How did they come to remember that night, a disaster that has been likened to the destruction of a small town? Drawing on a wealth of previously unpublished letters, memoirs, and diaries as well as interviews with survivors' family members, award-winning journalist and author Andrew Wilson reveals how some used their experience to propel themselves on to fame, while others were so racked with guilt they spent the rest of their lives under the Titanic's shadow. Some reputations were destroyed, and some survivors were so psychologically damaged that they took their own lives in the years that followed. Andrew Wilson brings to life the colorful voices of many of those who lived to tell the tale, from famous survivors like Madeleine Astor (who became a bride, a widow, an heiress, and a mother all within a year), Lady Duff Gordon, and White Star Line chairman J. Bruce Ismay, to lesser known second- and third-class passengers such as the Navratil brothers—who were traveling under assumed names because they were being abducted by their father. Today, one hundred years after that fateful voyage, *Shadow of the Titanic* adds an important new dimension to our understanding of this enduringly fascinating story.

In this volume of 15 articles, contributors from a wide range of disciplines present their analyses of Disney movies and Disney music, which are mainstays of popular culture. The power of the Disney brand has heightened the need for academics to question whether Disney's films and music function as a tool of the Western elite that shapes the views of those less empowered. Given its global reach, how the Walt Disney Company handles the role of race, gender, and sexuality in social structural inequality merits serious reflection according to a number of the articles in the volume. On the other hand, other authors argue that Disney productions can

help individuals cope with difficult situations or embrace progressive thinking. The different approaches to the assessment of Disney films as cultural artifacts also vary according to the theoretical perspectives guiding the interpretation of both overt and latent symbolic meaning in the movies. The authors of the 15 articles encourage readers to engage with the material, showcasing a variety of views about the good, the bad, and the best way forward.

For the past three decades, many history professors have allowed their biases to distort the way America's past is taught. These intellectuals have searched for instances of racism, sexism, and bigotry in our history while downplaying the greatness of America's patriots and the achievements of "dead white men." As a result, more emphasis is placed on Harriet Tubman than on George Washington; more about the internment of Japanese Americans during World War II than about D-Day or Iwo Jima; more on the dangers we faced from Joseph McCarthy than those we faced from Josef Stalin. A Patriot's History of the United States corrects those doctrinaire biases. In this groundbreaking book, America's discovery, founding, and development are reexamined with an appreciation for the elements of public virtue, personal liberty, and private property that make this nation uniquely successful. This book offers a long-overdue acknowledgment of America's true and proud history.

David Crystal's classic English as a Global Language considers the history, present status and future of the English language, focusing on its role as the leading international language. English has been deemed the most 'successful' language ever, with 1500 million speakers internationally, presenting a difficult task to those who wish to investigate it in its entirety. However, Crystal explores the subject in a measured but engaging way, always backing up observations with facts and figures. Written in a detailed and fascinating manner, this is a book written by an expert both for specialists in the subject and for general readers interested in the English language.

A much-praised memoir of living and surviving mental illness as well as “a stereotype-shattering look at a tenacious woman whose brain is her best friend and her worst enemy” (Time). Elyn R. Saks is an esteemed professor, lawyer, and psychiatrist and is the Orrin B. Evans Professor of Law, Psychology, Psychiatry, and the Behavioral Sciences at the University of Southern California Law School, yet she has suffered from schizophrenia for most of her life, and still has ongoing major episodes of the illness. The Center Cannot Hold is the eloquent, moving story of Elyn's life, from the first time that she heard voices speaking to her as a young teenager, to attempted suicides in college, through learning to live on her own as an adult in an often terrifying world. Saks discusses frankly the paranoia, the inability to tell imaginary fears from real ones, the voices in her head telling her to kill herself (and to harm others), as well as the incredibly difficult obstacles she overcame to become a highly respected professional. This beautifully written

memoir is destined to become a classic in its genre.

Practical Ethics

A culture-rich picture book that proudly showcases the beauty of diversity while also celebrating all the wonderful things we have in common. From skin, hair, and eyes in a multitude of colors to different personalities and interests, God gave us all special traits and characteristics that make us uniquely ourselves. And we all have things in common too: like sharing fun and laughter on the playground, a sense of curiosity, big feelings, and so many other things that show how we are all more alike than we are different. Ready to celebrate all our likes and differences? So are we! And this diverse picture book—drenched in color and full of laughter and fun—will show you how. *One Big Heart* is: Written by Emmy-winning ABC News correspondent and *The World Is Awake* author Linsey Davis A multiethnic, multicultural, multiracial children's picture book that recognizes our unique differences while celebrating how alike we are as well An inspiring story of inclusion and connection Written from a Christian worldview The perfect read-aloud for kids ages 4-8
