He promises her the world, but when she discovers she is pregnant--and that her lover is married--she refuses to be bought. North Carolina's black bears were once a threatened species, but now their numbers are rising in and around Asheville. But what happens when conservation efforts for a species are so successful that there's a boom in the population? Can humans and bears live compatibly? What are the long-term effects for the bears? Author Amy Cherrix follows the scientists who, in cooperation with local citizen scientists, are trying to answer to these questions and more. Part field science, part conservation science, *Backyard Bears* looks at black bears—and other animals around the globe—who are rapidly becoming our neighbors in urban and suburban areas. What are the long-term effects for the bears? Author Amy Cherrix follows the scientists who, in cooperation with local citizens, are trying to answer to these questions and more.
