A faithful reproduction of the 1967 Floyd Clymer publication of the official factory BMW (Bayerische Motoren Werke) Workshop Manual for the R50, R50S, R60 and R69S twin cylinder motorcycles. It also includes the supplement issued by the factory for the USA versions R50US, R60US and R69US. --- There are exhaustive tables of technical data, tolerances and fits and all of the expected data from a factory publication for the repair and overhaul of all major and minor mechanical and electrical components, making it an invaluable resource for collectors and restorers of these classic BMW motorcycles. --- There are 257 illustrations and each procedure is explained in a step-by-step method using an appropriate illustration. The translation from German to English is, at times, a little quirky but the profuse illustrations make up for any difficulty in understanding what needs to be done! --- True to the original, this reproduction is published in four languages, English, German, French and Spanish making this a universal publication and required reading for any owner. Out-of-print and unavailable for many years, this book is highly sought after on the secondary market and we are pleased to be able to offer this reproduction as a service to all BMW enthusiasts worldwide.

Focusing on the common faults which crop up repeatedly and giving detailed, simple instructions regarding repairs, this book is uniquely invaluable for owners who wish to try their hand at their own maintenance, especially those who may previously have been prevented from doing so by a lack of technical know-how or specific knowledge.

Imagine, if you can, the world of business - without corporate strategy. Remarkably, fifty years ago that's the way it was. Businesses made plans, certainly, but without understanding the underlying dynamics of competition, costs, and customers. It was like trying to design a large-scale engineering project without knowing the laws of physics. But in the 1960s, four mavericks and their posses instigated a profound shift in thinking that turbocharged business as never before, with implications far beyond what even they imagined. In *The Lords of Strategy*, renowned business journalist and editor Walter Kiechel tells, for the first time, the story of the four men who invented corporate strategy as we know it and set in motion the modern, multibillion-dollar consulting industry: Bruce Henderson, founder of Boston Consulting Group Bill Bain, creator of Bain & Company Fred Gluck, longtime Managing Director of McKinsey & Company Michael Porter, Harvard Business School professor Providing a window into how to think about strategy today, Kiechel tells their story with novelistic flair. At times inspiring, at times nearly terrifying, this book is a revealing account of how these iconoclasts and the organizations they led revolutionized the way we think about business, changed the very soul of the corporation, and transformed the way we work.
