Summer isn't looking good for Alana Alcott, an urban teacher of gifted students. She's been court ordered to teach summer school with Outward Bound instructor Mike Reynolds. Their students? Five unruly foster kids whose stories of abandonment mirror Alana's own childhood more than she wants to admit. Mike, in particular, initially chafes on Alana's nerves. She sees him as an overgrown Boy Scout, promoting a nature-to-nurture philosophy that may or may not help their troubled students. And troubled they certainly are, with problems ranging from behavioral issues to a looming gang recruitment. As Mike and Alana struggle to help their young charges connect with nature in the bleak concrete landscape of the projects, the two teachers find themselves increasingly attracted to each other. The demands of their students, however, interrupt their blossoming romance at every turn. Alana, meanwhile, finds herself forced to confront her own past-and the mother who abandoned her. Over the course of one short summer, seven lives will change, for good or ill. If Mike and Alana can help it, their students will find hope

Rory Woodward thought he would never set foot in Eagle River again. He left years ago to get away from his family, the Redstones. Now, with word that his grandmother is dying, he must leave his peaceful life as an author in San Francisco to come home and pay his respects. Staber Montana never enjoyed the life of leisure the Redstones have. He has spent most of his life fending for himself while dealing with his drug-abusing, overpossessive mother and alcoholic brother. He has never kept a healthy relationship because his mother would scare away potential mates. More than anything, he wishes he could escape his life. Rory and Staber may come from two different lives and backgrounds while growing up in the same town, but their paths are about to cross at the most wonderful time of the year. The astonishing novel *Brave New World*, originally published in 1932, presents Aldous Huxley's vision of the future -- of a world utterly transformed. Through the most efficient scientific and psychological engineering, people are genetically designed to be passive and therefore consistently useful to the ruling class. This powerful work of speculative fiction sheds a blazing critical light on the present and is considered to be Huxley's most enduring masterpiece. Sixteen-year-old Max and 10-year-old Tessa were fully prepared for another horrible summer vacation. But this year was different. Where they went couldn't be found

on any map or in any truck stop coupon book. They passed through a portal to a place called Turtle Island, an alternate version of America that diverged from our history before the pilgrims landed at Plymouth Rock. It was there where they met world famous action movie star Jordie Paine -- star of such films as I Plan to Kill You Now and the sequel, I Plan to Kill You Now, Too, the ninja film, Chuck Butcher: Sword Wielding Jackal, as well as the light-hearted romp, Harry Hinklehoffer and the Giant Dancing Toad of East Nebraska -- who would be their guide in this strange new world. Jordie, they later learned, brought the Masters family to Turtle Island for a very specific reason. Because they look just like the ruthless first family of Turtle Island, the Masters are pawns in a coup to overthrow the dictator. But things don't go as planned and the Masters wind up in the Survival Games, Turtle Island's national pastime/system of justice where criminals competitors, or crimpetitors, compete for their freedom. In this scifi comedy, the stakes are very simple -- if they win, they rule, if they lose, they must suffer the consequences.
