The approach used by Hoyle, Schaefer, and Douppnik in the new edition allows students to think critically about accounting, just as they will do while preparing for the CPA exam and in their future careers. With this text, students gain a well-balanced appreciation of the Accounting profession. As Hoyle 12e introduces them to the field's many aspects, it often focuses on past controversies and present resolutions. The text continues to show the development of financial reporting as a product of intense and considered debate that continues today and into the future. The writing style of the eleven previous editions has been highly praised. Students

easily comprehend chapter concepts because of the conversational tone used throughout the book. The authors have made every effort to ensure that the writing style remains engaging, lively, and consistent which has made this text the market leading text in the Advanced Accounting market. The 12th edition includes an increased integration of IFRS as well as updated accounting standards.

Many businesses around the world use technology as a means to set-up, run and improve their commercial performance but not all countries have sufficient access to technology. In fact the 'digital divide' between rich and poor countries is one of the major international challenges facing our society. Technology Business Incubation describes a concept whereby technological support and services are offered to start-up companies in the fields of engineering, science and technology to help them further their own research and develop viable businesses. Aimed at developed and developing countries this concept could provide a solution in bridging the knowledge gap. Written by Rustam Lalkaka, a well-known expert in the field, the toolkit provides invaluable information for carrying out feasibility studies; preparing business plans; choosing a location; finding sponsors; selecting managers and tenants; and monitoring a technology business incubator. An Introduction to Accountancy, 11th Edition

Management Accounting is written for students in international Business Management study programs. It covers the widely applied syllabus of Cost Accounting and Management Accounting at universities on bachelor's and master's level. The book is based on more than 20 years' academic teaching experience in Germany and at international universities in South Africa, Malaysia, China, the Netherlands and South Korea. In this text book, the application of methods and instruments comes first. Management Accounting follows a case study based approach. All cases are taken from previous exam papers and explained in detail. The text book starts with a case study of a manufacturing company and compares Financial Accounting to Management Accounting. It covers two point of views: (1) a General Management view, with aspects of business planning, cost-volume-profit analysis, degree of operating leverage, mergers and cross-border acquisitions and risk valuation. (2) a Cost Accounting view with Management Accounting systems, flexible budgeting, cost allocations, performance measurement and monitoring, reporting, calculation, manufacturing accounting (job order and process costing), activity based costing and multi-level contribution margin Accounting. On the UVK website, numerous exam tasks and complete solutions thereto are available in English.

The Demo Docs System of instruction replicates the classroom experience by providing more “I get it” moments outside of class. We’ve talked to tons of POA instructors and our editors have even taken the accounting course (numerous

times!) to figure out the following issue in this course that is consistent: & Students understand (or “get it”) right after you do a problem in class, but as soon as they leave class, with each passing hour, their ability to do the problems again and complete their homework diminishes to the point of them either having to come to office hours to get help, or they just quit and get behind in the course.& On top of this, you can end up getting behind in the course as well, in order to keep everyone on track.& The Demo Docs system helps to recreate the “I get it” moments outside of class-keeping both you and the students on track.
