The Global Testing Culture

Cambridge IGCSE® and O Level Business Studies Revised Coursebook

The past thirty years have seen a rapid expansion of testing, exposing students worldwide to tests that are now, more than ever, standardized and linked to high-stakes outcomes. The use of testing as a policy tool has been legitimized within international educational development to measure education quality in the vast majority of countries worldwide. The embedded nature and normative power of high-stakes standardized testing across national contexts can be understood as a

global testing culture. The global testing culture permeates all aspects of education, from financing, to parental involvement, to teacher and student beliefs and practices. The reinforcing nature of the global testing culture leads to an environment where testing becomes synonymous with accountability, which becomes synonymous with education quality. Underlying the global testing culture is a set of values identified from the increasing literature on world culture. These include: education as a human right, academic intelligence, faith in science, decentralization, and neoliberalism. Each of these values highlights different aspects of the dialogue in support of high-stakes standardized testing. The wide approval of these values and their ability to legitimate various aspects of high-stakes testing reinforces the taken-for-granted notion that such tests are effective and appropriate education practices. However, a large body of literature emphasizes the negative unintended consequences – teaching to the test, reshaping the testing pool, the inequitable distribution of school resources and teachers' attention, and reconstructing the role of the student, teacher, and parent – commonly found when standardized, census-based tests are combined with high-stakes outcomes for educators or students. This book problematizes this culture by providing critical perspectives that challenge the assumptions of the culture and describe how the culture manifests in national contexts. The volume makes it clear that testing, per se, is not the problem. Instead it is how tests are administered, used or misused, and linked to accountability that provide the global testing culture with its powerful ability to shape schools and society and lead to its unintended, undesirable consequences.

This book does exactly what its title suggests: it takes the theoretical and conceptual nature of leadership and positions it in the real world of school governance – where teachers, administrators and community stakeholders grapple with issues of change, diversity, influence, motivation, policy, and law. Organized around the widely accepted Interstate School Leaders Licensure Consortium (ISLLC) Standards, *Theory into Practice: Case Stories for School Leaders* offers a rich combination of current literature on educational leadership, real-life school-based situations, and a framework for decision-making. Designed for both current and aspiring school leaders, this book provides the perfect complement to

coursework and clinical experiences by offering case stories at all levels: from teacher leader, to building leader, to district leader. The case story format enables readers to experience a wide range of school-based issues from a variety of perspectives. Through this construct, the authors present a strong case for reflective leadership and thoughtful decision-making. Given the current climate of standards, standardization, and hyper-accountability in education, this book reminds readers that education – and educational leadership – remains an intensely human experience.

It is no easy task to adopt a child, especially across different races, nor is it easy to be adopted. Jake and Nkanyiso have to work much harder than either of them probably expected to become a family of two. Just as they are becoming settled after some trials, Nkanyiso informs his adopted father that a male teacher has been sexually harassing him at school. Jake does his best to protect his adopted son, but neither of them is really prepared for the onslaught when Jake complains to the school. Each of them has to deal with the others different world view. Jakes respect for Zulu customs does not extend to funding Nkanyisos mothers training to become an isangoma; money is too tight. Nkanyiso wants to believe that no spirit can harm him, as Jake says; but the dark sorcerer hounds him continually, and he starts to despair. It is a story of bad things happening to ordinary people. An adopted father and an adopted son against the background of a country still coming to terms with democracy.
