Ever since the one time Andie Weber threw caution to the wind - and paid the price for it - she's learned that it's safer and smarter to live life playing by the rules. Now she's got a great apartment, a steady job, and a wonderful boyfriend in Colin; he's sweet, stable, and essentially perfect - except maybe for the fact that his best friend is Chase. Chase McGuire lives his carefree, unstructured life strictly for himself. Dripping sarcasm and oozing wit, he refuses to censor his feelings or opinions for anyone, making no apologies for either and wearing his abrasiveness like a badge of honor. No one has ever gotten under Andie's skin the way Chase does - and vice versa. So when Andie and Chase find themselves forced to take a two-day road trip together, they are already dreading an inevitable all-out war. But as the trip progresses, and the undeniable friction that has always defined their relationship slowly begins to wear away their preconceived notions of each other, Andie and Chase discover they both have a lot to learn about life, courage, happiness, and the age-old battle between logic and love.

Guide to Science Teaching in Secondary Schools

This Intergovernmental Panel on Climate Change Special Report (IPCC-SREX) explores the challenge of understanding and managing the risks of climate extremes to advance climate change adaptation. Extreme weather and climate events, interacting with exposed and vulnerable human and natural systems, can lead to disasters. Changes in the frequency and severity of the physical events affect disaster risk, but so do the spatially diverse and temporally dynamic patterns of exposure and vulnerability. Some types of extreme weather and climate events have increased in frequency or magnitude, but populations and assets at risk have also increased, with consequences for disaster risk. Opportunities for managing

risks of weather- and climate-related disasters exist or can be developed at any scale, local to international. Prepared following strict IPCC procedures, SREX is an invaluable assessment for anyone interested in climate extremes, environmental disasters and adaptation to climate change, including policymakers, the private sector and academic researchers.
