Saxon Math Course 3

A ghost saved twelve-year-old Maddie's life when she was an infant, her Granny Lane claims, so Maddie must always remember that she is special. But it's hard to feel special when you've spent your life shuffled from one foster home to another. And now that she's at the East Tennessee Children's Home, Maddie feels even less special. She longs for a place to call home. She even has a "book of houses" in which she glues pictures of places she'd like to live. Then one day, a new girl, Murphy, shows up at the Home armed with tales about exotic travels, being able to fly, and boys who recite poetry to wild horses. When Murphy offers Maddie something she has never had before, Maddie begins to wonder if she has finally found someone who feels like home.

Saxon Math is easy to plan and rewarding to teach. The focus on providing teachers with strategies for developing an understanding of HOW and WHY math works builds a solid foundation for higher-level mathematics. - Publisher.

"The" Athenaeum

"Twenty-twenty hindsight" means perfect understanding of events only after they

have happened. In his book, Mosiuoa Sekese looks back on his life in the old and new South Africa and gives his own perceptive interpretation of the past events. Sekese suffered discrimination and prejudice under the old apartheid government as well as the new, democratic regime. His story is highly personal, but provides the reader with unique insights into the social and educational challenges that South Africa continues to grapple with. "I had a quick read and I find the content heartbreaking but fascinating. Especially as a white South African you are drawing me into a world that I always knew existed, but which few people have the guts and conviction to paint into words." - Louise Heystek-Emerton: CEO Wordwise/Khuluma Awethu
