Hiking Big Bend National Park

"Meet the growing demand for memory-enhancement programs with this ready-to-use course for boosting brain function! If you have thought about creating a memory enhancement course but don't know where to start -- or you need to spice up your existing program -- then this Strengthen Your Mind Program is the resource for you. Become an instant expert with all the latest research on brain health and memory at your fingertips -- along with fun, interactive games, exercises, and quizzes for participants to use to learn about and practice both old and new mental activities."--Publisher's website.

Karst Management

This book traces the epic clash of values between traditional scenery-and-tourism management and emerging ecological concepts in the national parks, America's most treasured landscapes. It spans the period from the creation of Yellowstone National Park in 1872 to near the present, analyzing the management of fires, predators, elk, bear, and other natural phenomena in parks such as Yellowstone, Yosemite, Grand Canyon, and Great Smoky Mountains. Based largely on original documents never before researched, this is the most thorough history of the national parks ever written. Focusing on the decades after the National Park Service was established in 1916, the author reveals the dynamics of policy formulation and change, as landscape architects, foresters, wildlife biologists, and other Park Service professionals contended for dominance and shaped the attitudes and culture of the Service. The book provides a fresh look at the national parks and an

analysis of why the Service has not responded in full faith to the environmental concerns of recent times. Richard West Sellars, a historian with the National Park Service, has become uniquely familiar with the history, culture, and dynamics of the Service--including its biases, internal alliances and rivalries, self-image, folklore, and rhetoric. The book will prove indispensable for environmental and governmental specialists and for general readers seeking an in-depth analysis of one of America's most admired federal bureaus.

Unbroken

New Horizons Through Reading and Literature

Crossword puzzles encourage students in grades three through six to recall facts provided in informational passages on each of the fifty United States.

INIS Atomindex

This book illustrates the diversity of hypogene speleogenetic processes and void-conduit patterns depending on variations of the geological environments by presenting regional and cave-specific case studies. The cases include both well-known and newly recognized hypogene karst regions and caves of the world. They all focus on geological, hydrogeological, geodynamical and evolutionary contexts of hypogene speleogenesis. The last decade has witnessed the boost in recognition of the possibility, global occurrence, and practical importance of hypogene karstification (speleogenesis), i.e. the development of solutional porosity and permeability by upwelling flow, independent of recharge from the overlying or immediately adjacent surface. Hypogene karst has been identified and documented in many regions where it was previously overlooked or misinterpreted. The book enriches the basis for generalization and categorization of hypogene karst and thus improves our ability to adequately model hypogene karstification and predict related porosity and permeability. It is a book which benefits every researcher, student, and practitioner dealing with karst.

American Photography

The Texas Outlook

The Encyclopedia of Caves and Karst Science contains 350 alphabetically arranged entries. The topics include cave and

karst geoscience, cave archaeology and human use of caves, art in caves, hydrology and groundwater, cave and karst history, and conservation and management. The Encyclopedia is extensively illustrated with photographs, maps, diagrams, and tables, and has thematic content lists and a comprehensive index to facilitate searching and browsing.

HARVER JUNIOR WORLD ENCYCLOPEDIA

Creative Haven Summer Scenes Coloring Book

Discover the beauty and diversity of America's great outdoors in this tour of its most iconic national parks. Explore Florida's river-laced Everglades, travel down the white water rapids of the Grand Canyon, trek across the deserts of Death Valley and scale the soaring summits of the Rocky Mountains with this book that brings you up close to nature's greatest adventures. Packed with maps and fascinating facts about the flora and fauna unique to each park, this fully-illustrated coast-to-coast journey documents the nation's most magnificent and sacred places—and shows why they should be preserved for future generations to enjoy. Parks include: Acadia, Badlands, Big Bend, Biscayne, Bryce Canyon, Channel Islands, Death Valley, Denali, Everglades, Glacier, Glacier Bay, Grand Canyon, Great Smoky, Mountains, Hawaii volcanoes, Isle Royal, Mesa Verde, Olympic, Sequoia and Kings Canyon, Virgin Islands, Yellowstone and Yosemite.

50 Great States Read & Solve Crossword Puzzles

The National Parks Poster Coloring Book

The First Drawing

Learning Activities for Reading

Describes the 1994 discovery made in Chauvet, France, of a cave with Stone Age rock paintings, and discusses the significance of cave art to people living in prehistoric as well as modern times.

New Mexico Magazine

Relates the story of a U.S. airman who survived when his bomber crashed into the sea during World War II, spent forty-seven days adrift in the ocean before being rescued by the Japanese Navy, and was held as a prisoner until the end of the war.

Communication

National Parks of the USA

Contents include observation games, arts & crafts, imagination games, mazes & puzzles, word games and trivia, as well as things to do when you arrive home.

Travel in the United States

Activity book featuring Yellowstone/Teton/Glacier-themed mazes, word-finds, jumbles, connect-the-dots.

Talking Walls

Encyclopedia of Caves and Karst Science

Painters of the Caves

Selects nonfiction titles and presents a synopsis of the book and activities to perform before, during, and after reading the title

The Physical Sciences

Strengthen Your Mind

Focusing specifically on the management of karst environments, this volume draws together the world's leading karst experts to provide a vital source for the study and management of this unique physical setting. Although karst landscapes cover 12% of the Earth's terrain and provide 25% of the world's drinking water, the resource management of karst environments has only previously received indirect attention. Through a comprehensive approach, Karst Management focuses on engineering issues associated with surface karst such as quarries, dams, and agriculture, subsurface topics such as the management of groundwater, show caves, cave biota, and geo-archaeology projects. Chapters that focus on karst as an integrated system look at IUCN World Heritage sites, national parks, policy and regulation, measuring systematic disturbance, information management, and public environmental education. The text incorporates the most up-to-date research from leading karst scientists. This volume provides important perspectives for university students, educators, geoengineers, resource managers, and planners who are interested in or work with this unique physical landscape.

Cave Minerals of the World

New Mexico Geology

These 31 charming summer scenes will delight colorists yearning for sunshine every day of the year! Detailed original designs include seascapes, gardens in bloom, and idyllic farm vistas as well as romantic picnics, sunsets, and a wedding on the beach. Pages are perforated and printed on one side only for easy removal and display. Specially designed for experienced colorists, Summer Scenes and other Creative Haven® adult coloring books offer an escape to a world of inspiration and artistic fulfillment. Each title is also an effective and fun-filled way to relax and reduce stress.

Lesson Plans, Ideas, and Activities for Teaching Functional Reading Skills

Imagine you were born before the invention of drawing, more than thirty thousand years ago. You would live with your

whole family in a cave and see woolly mammoths walk by! You might even see images of animals hidden in the shapes of clouds and rocks. You would want to share these pictures with your family, but wouldn't know how. Who would have made the world's first drawing? Would it have been you? In *The First Drawing*, Caldecott Medal winner Mordicai Gerstein imagines the discovery of drawing and inspires the young dreamers and artists of today.

Hypogene Karst Regions and Caves of the World

Discover tranquility and peace by coloring in beautiful landscape and wildlife scenes from America's national parks based on the renowned photographs of Ian Shive. Some of the world's most beautiful and iconic landscapes are preserved within the US National Park System, and Ian Shive, praised as the "leading chronicler of America's national parks," has been capturing these vistas for years. This National Parks Poster Coloring Book will feature poster-sized and styled line-art renderings of Shive's most iconic images from the national parks. A full-color poster complements the line drawings and provides inspiration from the greatest of all painters—Mother Earth. Ignite your creativity through the exploration of nature, and color your way through the National Park System.
