Multistate and Multinational Guide to Estate Planning analyzes the legal aspects of individual wealth transfers across state and national boundaries. In addition, the Guide seeks to develop workable strategies for the attorney involved with a multijurisdictional client. Planning is a central concern of Multistate and Multinational Guide to Estate Planning. The set is divided into six parts. The first is an overview of the topic. Part II is concerned with professional issues, particularly malpractice problems across state and national lines. Part III investigates the ties that influence which law is chosen to resolve legal questions that arise in the multijurisdictional setting. Part IV addresses specific restrictions on testamentary freedom. Part V deals with the intricacies of choice of law involving wills, trusts and estates. Part VI addresses tax matters at the multistate and multinational levels.

Preventing acts of terrorism remains one of the major tasks of domestic governments and regional and international organisations. Terrorism transcends borders, so anti-terrorism law must cross the boundaries of domestic, regional and international law. It also crosses traditional disciplinary boundaries between administrative, constitutional, criminal, financial, immigration, international and military law, as well as the law of war. This second edition provides a comprehensive resource on how domestic, regional and international responses to terrorism have developed since 2001. Chapters that focus on a particular country or region in the Americas, Europe, Africa and Asia are complemented by overarching thematic chapters that take a comparative approach

to particular aspects of anti-terrorism law and policy.

In its first edition, *Global Trends in Mediation* was the first book to concentrate on mediation from a comparative perspective - reaching beyond the all-too-familiar Anglo-American view - and as such has enjoyed wide practical use among alternative dispute resolution (ADR) practitioners worldwide. This new edition has not only been updated throughout; it has also added two new jurisdictions (France and Quebec) and a very useful comparative table summarising the salient points from each of the fourteen jurisdictional chapters. Each jurisdictional chapter addresses critical structural and process issues in alternative dispute resolution such as the institutionalisation of mediation, mediation case law and legislation, the range and nature of disputes where mediation is utilised, court-related mediation, mediation practice standards, education, training and accreditation of mediators, the role of lawyers in mediation, online dispute resolution and future trends. All the contributors are senior dispute resolution academics or practitioners with vast knowledge and experience of dispute resolution developments in their countries and abroad.

The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts.
