Physics for Scientists and Engineers

Time Charters is recognised as the most comprehensive reference work in its field. The book has been updated to include new developments that affect the law and practice of time charters. Maintaining the clear and logical format adopted in the previous editions, Time Charters provides access to the case law to enable users to find, easily and quickly, leading authorities on any particular question that might arise. There are also separate sections dealing with the Baltimore Form and the STB Form of Tanker Time Charter.

Acts and Resolves Passed by the General Assembly

Acclaimed as the standard reference work on the law relating to time charters, this new edition provides a comprehensive treatment of the subject, accessible and useful both to shipping lawyers and to shipowners, charterers, P&I Clubs and other insurers. It provides full coverage of both English and U.S. law, now updated with all the important decisions since the previous edition. The English decisions covered in the new edition include: The Kos (the Supreme Court on the effect of withdrawing a ship with cargo on board); The Athena (nature of off-hire; meaning of 'loss of time'/'time thereby lost'); The Kyla (damage to ship and frustration); The Silver Constellation, The Savina Caylyn and The Rowan (oil company approval of chartered ships); The Captain Stefanos, The Saldanha, The Triton Lark and The Paiwan Wisdom (effects of piracy); The Kildare and The Wren (damages for early

termination); The T S Singapore (off-hire where ship going 'towards but not to' the port ordered), and The Lehmann Timber, The Bulk Chile and The Western Moscow (owners' liens) The new edition also features many significant new U.S. decisions, including: Stolt-Nielsen v. Animal Feeds Intl. (Supreme Court rules class-action arbitration not permitted unless parties agree in arbitration agreement); ATHOS I (Circuit Court finds that safe berth provision in charterparty is a warranty and not merely a due diligence obligation); The M/V SAMHO DREAM (arbitrators direct petitioner to post \$14.2M security on respondent's counterclaim) and Maroc Fruit Board v. M/V VINSON (CP arbitration clause incorporated in bill of lading not "signed" or "contained in an exchange of letters or telegrams" under NY Convention).

For nearly 25 years, Tipler's standard-setting textbook has been a favorite for the calculus-based introductory physics course. With this edition, the book makes a dramatic re-emergence, adding innovative pedagogy that eases the learning process without compromising the integrity of Tipler's presentation of the science. For instructor and student convenience, the Fourth Edition of Physics for Scientists and Engineers is available as three paperback volumes... Vol. 1: Mechanics, Oscillations and Waves, Thermodynamics, 768 pages, 1-57259-491-8 Vol. 2:

Electricity and Magnetism, 544 pages, 1-57259-492-6 Vol. 3: Modern Physics: Quantum Mechanics, Relativity, and The Structure of Matter, 304 pages, 1-57259-490-X ...or in two hardcover versions: Regular Version (Chaps. 1-35 and 39): 0-7167-3821-X Extended Version (Chaps. 1-41): 0-7167-3822-8 To order the volume or version you need, use the links above to go to each volume or version's specific page. Download errata for this book: This errata is for the first printing of Tipler's PSE, 4/e. The errors have been corrected in subsequent printings of the book, but we continue to make this errata available for those students and teachers still using old copies from the first printing. Download as a Microsoft Word document or as a pdf file.

A must-have physical and manipulative therapy case book to facilitate confident diagnosis Cases in Differential Diagnosis for the Physical and Manipulative Therapies: a Case Based Approach is a high-quality Australian case book ideal for students studying physical and manipulative therapy. This physical and manipulative therapy textbook facilitates development of the skills students and therapists need to reach a final diagnosis or differential diagnosis with confidence. Cases in Differential Diagnosis for the Physical and Manipulative Therapies features more than 225 clinical presentations in differential diagnosis. All cases are presented in four life stages – infancy and childhood, adolescence, the adult years and the later or elderly years – and each life stage covers a broad range of differential clinical topics. With this physical and manipulative therapy text, students will gain valuable insight into scenarios commonly encountered in clinical practice, while developing and refining their diagnostic skills. Cases include unsteadiness and vertigo in the elderly, fever in infancy and childhood, reproductive disturbances in women, and eating disorders, substance abuse and behavioural disturbances in adolescence. Over 35 experts from diverse fields have contributed to Cases in Differential Diagnosis for the Physical and Manipulative Therapies, which also boasts comprehensive appendices featuring abbreviations, orthopaedic tests and extra questions. As physical and manipulative therapists often find themselves in the role of the primary contact practitioner, it is

imperative they are trained to identify underlying medical problems that may require referral to a medical practitioner. With this invaluable diagnostic resource they can do just that.

Atlas of Pediatric Surgical Techniques—a title in the new Surgical Techniques Atlas series edited by Drs Townsend and Evers—presents state-of-the-art updates on the full range of pediatric surgical techniques performed today. Dai H. Chung, MD and Mike Chen, MD offer you expert advice on a variety of procedures and help you expand your repertoire and hone your clinical skills. Access the fully searchable contents of the book and procedural videos online at expertconsult.com. Get coverage of hot topics like laparoscopic techniques, ECMO cannulation, and bariatric surgery. View 150 full-color anatomic drawings and step-by-step intraoperative photographs that highlight key surgical issues and techniques. Master key techniques through videos that show them performed by the physicians who pioneered them. Avoid complications thanks to discussions of pearls and pitfalls. Choose between open and closed alternatives and get better patient outcomes. Visually master a wide range of operative techniques, with authoritative guidance (series USP)

Easter is not about mauve hats nor chocolate Easter bunnies. What it is about is joy -- the joy (and therefore hope) of the resurrection from death of the Lord Jesus Christ. The thought behind this book was to gather stories related to Easter's message and blend them with some particularly piercing sermons given on Easter Day when perhaps some inspiration might have seeped through the cobblestones of society's day-to-day clatter. And surely life, society and daily thinking have changed immensely during the last 20 centuries, 20 years and perhaps even 20 minutes. Yet, if one reads the biblical texts, the overriding concerns of the people of that time do not differ much from our own. Jesus Christ's resurrection from death brought about a large-scale change in life's equation, however. The message is not hard to understand even in today's world. It is hoped that this modest book will remind readers of what they should already know.

Provides a process for seismic evaluation of existing buildings in any region of seismicity. Buildings are evaluated to either the Life Safety or Immediate Occupancy Performance Level. Provides instruction to the evaluating design professional on how to determine if a building is adequately designed and constructed to resist seismic forces. All aspects of building performances are considered in terms of foundation/geologic, structural, hazard, nonstructural issues. Reflects advancements in technology; incorporates design professional experience; incorporates lessons learned during recent earthquakes; and much more.
