The Modern Review

The Northeastern Reporter

In this fascinating book, New Yorker business columnist James Surowiecki explores a deceptively simple idea: Large groups of people are smarter than an elite few, no matter how brilliant—better at solving problems, fostering innovation, coming to wise decisions, even predicting the future. With boundless erudition and in delightfully clear prose, Surowiecki ranges across fields as diverse as popular

Maths Plus - A Book of Mental Mathematics

S. Chand's Smart Maths book 7

To develop logical thinking in students the subject matter is presented in a logical step-by-step method, using very simple language and a large number of illustrative examples. The treatment in the books consists of first establishing a concept, followed by simple objective type solved and unsolved questions to cement the concept and build confidence. This is followed by progressively more difficult solved and unsolved exercises in sufficient numbers to cover all points in the chapter. Each exercise consists of objective type questions of 1 mark, short
