Christmas Planner

New York, late 1840s, and in the wild, noisy, brash and beautiful circus of Silas P. Swift a shadowy, mesmeric woman entrances crowds because she can unlock the secrets of troubled minds. Above them all her daughter sweeps and soars: acrobat and tightrope-walker. People cannot take their eyes from the mysterious woman in the Big Top who can help so many others - but she cannot unlock dark, literally unspeakable, memories of her own. In London memories fester in the mind of an old and venomous duke of the realm. He plots, with an unscrupulous lawyer (and a huge financial reward) against the mother and the daughter: to kill one, and to abduct the other and bring her across the Atlantic to him: She is mine. The actress and mesmerist Cordelia Preston and her daughter Gwenlliam live with their unusual family in the exciting new city among exciting new ideas: the telegraph, the daguerrotype, anaesthesia, table-tapping. And among the dangerous street-gangs of New York also, whose raw violence meets Cordelia and Gwenlliam and those that they love, with unexpected results.

Every Knee Shall Bow - Romans 14

YOU CAN'T MAKE THIS STUFF UP! Here is a hilarious collection that catches real-life knuckleheads in outrageous acts of brazen stupidity, giving new meaning to that famous four-letter word: "DUH"! * The Oregon resident who was waxing his 1984 Pontiac--and somehow managed to shove the antenna up his nose . . . GRANDMOTHER OF EIGHT MAKES HOLE IN ONE * The Atlanta Braves pitcher who was treated for five-inch-long welts after he tried to iron his polo shirt while wearing it . . . MINERS REFUSE TO WORK AFTER DEATH * The inmate at a Chesapeake Correctional Facility who filed a five million dollar lawsuit against himself . . . DRUNK GETS NINE MONTHS IN VIOLIN CASE * The woman who couldn't stand the discomfort of having a callus on her right foot, so she blew off her big toe with a shotgun . . . Radio personality John "Kato" Machay's lively compilation of news stories, headlines, and courtroom gaffes proves hands down that truth is dumber than fiction! REMEMBER: To err may be human, but to laugh out loud is divine.

The Conceptual Foundations of the Statistical Approach in Mechanics

Classic 1912 article reformulated the foundations of the statistical approach in mechanics. Largely still valid, the treatment covers older formulation of statistico-mechanical investigations, modern formulation of kineto-statistics of the gas model, and more. 1959 edition.

Seawifs Technical Report Series. Volume 38; Seawifs Calibration and Validation Quality Control Procedures

This document provides five brief reports that address several quality control procedures under the auspices of the Calibration and Validation Element (CVE) within the Sea-viewing Wide Field-of-view Sensor (SeaWiFS) Project. Chapter 1 describes analyses of the 32 sensor engineering telemetry streams. Anomalies in any of the values may impact sensor performance in direct or indirect ways. The analyses are primarily examinations of parameter time series combined with statistical methods such as auto- and cross-correlation functions. Chapter 2 describes how the various onboard (solar and lunar) and vicarious (in situ) calibration data will be analyzed to quantify sensor degradation, if present. The analyses also include methods for detecting the influence of charged particles on sensor performance such as might be expected in the South Atlantic Anomaly (SAA). Chapter 3 discusses the quality control of the ancillary environmental data that are routinely received from other agencies or projects which are used in the atmospheric correction algorithm (total ozone, surface wind velocity, and surface pressure; surface relative humidity is also obtained, but is not used in the initial operational algorithm). Chapter 4 explains the procedures for screening level-1, level-2, and level-3 products. These quality control operations incorporate both automated and interactive procedures which check for file format errors (all levels), navigation offsets (level-1), mask and flag performance (level-2), and product anomalies (all levels). Finally, Chapter 5 discusses the

match-up data set development for comparing SeaWiFS level-2 derived products with in situ observations, as well as the subsequent outlier analyses that will be used for evaluating error sources. This title covers the osteopathic approach to patient management for pregnant women (pre and post partum), and for patients presenting with a variety of visceral conditions such as asthma, chronic breathing problems, various gastrointestinal tract disorders such as irritable bowel syndrome, other conditions such as post operative scarring and pain, and many others. It also addresses the improvement of management of general musculo-skeletal problems such as back pain, neck pain and so on, by incorporating visceral and fascial perspectives into those examinations and treatment protocols. Current clinical knowledge, and ethical and medical constraints are discussed throughout. Supported by clear illustrations and clinical case studies this book makes an excellent resource for all practitioners and students of osteopathy.

A Kiss of Winter

The legacies of drug kingpins are both egregious and legendary. Through vast networks of mercenaries, corrupt officials, terrorists, and smugglers, organized drug cartels traffic billions of dollars in heroin, cocaine, MDMA, and methamphetamine across international borders. El Chapo, Pablo Escobar, Frank Lucas, Paul Le Roux, and other kingpins have left indelible marks on the communities they used for drug trafficking, and their far-reaching impact can take years to undo by even the most vigilant law enforcement efforts. This collection details the breadth of their crimes, and includes media literacy questions and terms that challenge readers to assess how journalistic principles are applied to news coverage of kingpins and narco trafficking.
