Crisis Management in Acute Care Settings

A Gentle Guide To Research Methods

The MGH Textbook of Anesthetic Equipment by Warren Sandberg, MD, Richard Urman, MD, and Jesse Ehrenfeld, MD, provides expert coverage on the latest and best anesthetic equipment. Technology-driven changes, together with the high risks associated with anesthesia delivery, require that you understand everything from physics fundamentals to special situations to troubleshooting so you can safely and effectively use all the equipment and instrumentation in today's operating rooms. This one-stop, full-color reference, edited by an expert team from Massachusetts General Hospital, skillfully brings you up to speed. Ensure your patients receive the best care possible with excellent coverage of all monitoring techniques including transesophageal echocardiography. Improve patient safety with information on

temperature monitoring and control. Update your knowledge of emergency room airway equipment to ensure the best results. Decide which equipment is best suited for anesthesia delivery both inside and outside the hospital.

Northern Illinois University Shooting; DeKalb, Illinois

The only book devoted to this increasingly important issue, Perioperative Safety helps you reduce risk in a setting where even small errors can lead to life-threatening complications. Expert author Donna Watson addresses essential safety principles and concepts, covering patient safety with topics such as the latest safety strategies and initiatives, perioperative safe medication use, preventing infections, anesthesia safety, normothermia management, and electrosurgery. Coverage of staff and workplace safety helps you minimize risk with bloodborne pathogens, latex allergy, the use of lasers, and radiation exposure. Case studies show the application of safety concepts in real-world situations. Unique! The only book devoted to the increasingly important issue of perioperative safety, where small errors can lead to life-threatening complications. Unique! Highly qualified writers are some of the leading experts in the perioperative field, so material is up to date and emphasizes the most important information. Unique! Clinical Points boxes call attention to key points in promoting safety for both patients and staff in the perioperative setting. Unique! Case studies describe real-life scenarios related to promoting patient safety. Figures and tables are used to support important content.

Advancing Dietetics and Clinical Nutrition E-Book

Professional Portfolios - E-Book

The objective of this study was to identify on-duty firefighter fatalities, occurring in the U.S. in 1994, and analyze the circumstances surrounding firefighter fatalities. The study is intended to help identify potential approaches that could reduce the number of deaths that occur each year. In addition to the 1994 findings, this study includes a special analysis of wildland firefighting fatalities, which claimed an unusually high number of lives this year, and an analysis of risk management and recognition in the fatal incidents.

Insights Into Teachers' Thinking And Practice

The demand for anesthesiologists outside of the operating room continues to grow as the number of minimally invasive procedures proliferates and the complexity of diagnostic procedures undertaken outside of the OR increase. Non-Operating Room Anesthesia is an easy-to-access, highly visual reference that facilitates an in-depth understanding of NORA

procedures and protocols needed to minimize risk and complications and to maximize growth opportunities. Effectively assess and manage risks and differences in procedures through in-depth discussions addressing the unique challenges and issues associated with non-traditional settings. Review the most recent knowledge with updated coverage of the use of the electrophysiology lab (EPL) and cardiac catheterization laboratory (CCL) in the care of the critically ill patient; patient assessment; and anesthetic considerations. Prepare for varying anesthetic conditions in non-OR settings with in-depth discussions on communication, management, and laboratory preparation for anticipated concerns or complications. Glean all essential, up-to-date, need-to-know information about NORA with coverage that surpasses the depth and scope of review articles and other references. Focus on the practical guidance you need thanks to a user-friendly color-coded format, key points boxes, drug descriptions, checklist boxes (for monitors, equipment, and drugs), and over 400 color photos that help you visualize each procedure and setting.

Managing Human Resource And Industrial Relations

The three-volume set, LNCS 2667, LNCS 2668, and LNCS 2669, constitutes the refereed proceedings of the International Conference on Computational Science and Its Applications, ICCSA 2003, held in Montreal, Canada, in May 2003. The three volumes present more than 300 papers and span the whole range of computational science from foundational issues in computer science and mathematics to advanced applications in virtually all sciences making use of computational techniques. The proceedings give a unique account of recent results in computational science.

Statistical Methods and Safety Data Analysis and Evaluation

Many students are unaware of how to get the most out of their research, whether in career terms or in terms of asking good research questions. This book addresses this issue, as well as dealing with how to move from the big picture to a specific research question.

Critical infrastructure protection significant homeland security challenges need to be addressed

A collection of original research conducted by scholars from Europe and North America. The papers consider the evolution of research on teachers' thinking, the nature of professional knowledge, and philosophical and moral dimensions of teachers' thinking.

Anesthesia Equipment E-Book

Critical incidents all too often explode onto the social conscious and challenge our sense of security. This comprehensive handbook brings together a range of experts who provide a foundation for the field of critical incident analysis by examining specific incidents 9/11, the Virginia Tech massacre, the H1N1 pandemic, the BP oil spill, and more--through various methodological and disciplinary lenses.

Department of Reactor Technology Annual Progress Report 1 January-31 December 1978

The implementation of National registration requires Australian and New Zealand Nurses and Midwives to perform annual Continuing Professional Development. They must also document evidence of skills acquisition, activities, reflection, identification and prioritisation of their learning needs in a portfolio. With the global trend towards e-Portfolios, many higher education institutions encourage the use of e-Portfolios as a tool to enhance learning and demonstrate career development. Nursing and Midwifery Portfolios: evidence of continuing competence 2e has been thoroughly revised with a focus on e-Portfolios to provide tools to structure, reflect, plan, develop and communicate professional achievements for nurses and midwives. A new chapter on Reflection highlights the value of including reflection within portfolios as a critical element towards addressing learning needs for individuals. Australian and New Zealand regulatory frameworks: By providing direct application to the local regulatory context, including applied examples, this book gives the reader the opportunity to understand the perspective of their local regulator – thus assisting them in producing a product that addresses the needs of the regulator. A range of portfolio approaches: Through understanding a range of portfolio approaches, the reader can gauge which approach best meets their needs. Examination of the nature and role of evidence: This assists the reader to understand the need for a range of evidence and how the different types of evidence contribute specific aspects necessary to substantiate the broader argument of competence. Through the use of quality evidence, the reader can compile a more compact but effective portfolio. Performance and career planning: The direct link made in this book between portfolios, performance and career planning means that the value of this book extends beyond being a tool for undergraduate and postgraduate students. Rather this text is designed to assist a range of clinicians and managers, in assisting them either plan their own careers, or influence others in developing careers inline with the future needs of their organisation. Primary market: Undergraduate Nursing and Midwifery students Secondary markets: Practicing Registered Nurses and Midwives. Also applicable to other health science students undertaking courses leading to regulated health professions.

Critical Incidents in Teaching (Classic Edition)

Issues in Surgery, Perioperative, and Anesthesia Research and Practice: 2011 Edition

Human Factors Models for Aviation Accident Analysis and Prevention

The ability to remove a trapped victim from a vehicle or other machinery is vital for fire and rescue personnel. Based on the 2008 edition of NFPA 1006, Standard for Technical Rescuer Professional Qualifications, this text provides rescue technicians with the knowledge and step-by-step technical instruction needed to fully understand all aspects of vehicle extrication incidents. Vehicle Extraction: Levels I & II: Principles and Practice: Addresses the latest hybrid and all-electric vehicles, such as the Chevy Volt and the Nissan Leaf, Provides extensive coverage of agricultural extrication for incidents involving tractors and other machinery, and Includes National Fire Fighter Near-Miss Reports, where applicable, to stress safety and lessons learned. Important Notice: The digital edition of this book is missing some of the images or content found in the physical edition.

Computational Science and Its Applications - ICCSA 2003

INIS Atomindex

The investigation and modelling of aviation accident causation is dominated by linear models. Aviation is, however, a complex system and as such suffers from being artificially manipulated into non-complex models and methods. This book addresses this issue by developing a new approach to investigating aviation accident causation through information networks. These networks centralise communication and the flow of information as key indicators of a system's health and risk. This holistic approach focuses on the system environment, the activity that takes place within it, the strategies used to conduct this activity, the way in which the constituent parts of the system (both human and non-human) interact and the behaviour required. Each stage of this book identifies and expands upon the potential of the information network approach, maintaining firm focus on the overall health of a system. The book's new model offers many potential developments and some key areas are studied in this research. Through the centralisation of barriers and information nodes the method can be applied to almost any situation. The application of Bayesian mathematics to historical data populations provides scope for studying error migration and barrier manipulation. The book also provides application of these predictions to a flight simulator study for the purposes of validation. Beyond this it also discusses the applicability of the approach to industry. Through working with a legacy airline the methods discussed are used as the basis for a new and prospective safety management system.

Government Reports Announcements

High standards of interpersonal communication are fundamental to effective health care delivery. Communication Skills Training for Health Professionals succeeds in providing the sound theoretical basis and practical approach needed to implement a higher standard of care through better communication. This is an essential part of the relationship between the health care provider and both the client and carer, and of course, between providers themselves. By giving an explanation of the underlying rationale for CST, together with the principles of training programme design, implementation, transfer and evaluation, the book becomes essential as a resource, applicable in any health care setting.

National Fire Incident Reporting System Version 5.0 Fire Data Analysis Guidelines and Issues

This accessible and clearly structured book, written by experienced researchers and practitioners, provides a one-stop introduction to the most common qualitative, quantitative and desk-based research designs and methods in health and social care.

Organizational Stress

Indexes are arranged by geographic area, activities, personal name, and consulting firm name.

Report of the Presidential Commission on the Space Shuttle Challenger Accident

Issues in Surgery, Perioperative, and Anesthesia Research and Practice: 2011 Edition is a ScholarlyEditions™ eBook that delivers timely, authoritative, and comprehensive information about Surgery, Perioperative, and Anesthesia Research and Practice. The editors have built Issues in Surgery, Perioperative, and Anesthesia Research and Practice: 2011 Edition on the vast information databases of ScholarlyNews.™ You can expect the information about Surgery, Perioperative, and Anesthesia Research and Practice in this eBook to be deeper than what you can access anywhere else, as well as consistently reliable, authoritative, informed, and relevant. The content of Issues in Surgery, Perioperative, and Anesthesia Research and Practice: 2011 Edition has been produced by the world's leading scientists, engineers, analysts, research institutions, and companies. All of the content is from peer-reviewed sources, and all of it is written, assembled, and edited by the editors at ScholarlyEditions™ and available exclusively from us. You now have a source you can cite with authority, confidence, and credibility. More information is available at <http://www.ScholarlyEditions.com/>.

Consultants and Consulting Organizations Directory

Autism

An expanded and revised new E-book edition of the respected evidence-based practice (EBP) foundation text. Evidence-based Practice across the Health Professions, 2nd Edition E-book provides health professions students with the basic knowledge and skills necessary to become evidence-based clinicians. Years after its 2009 publication, Evidence-based Practice across the Health Professions remains one of the few truly multidisciplinary evidence-based practice textbooks meeting the needs of undergraduate and postgraduate students enrolled in inter-professional courses. Fully revised and expanded, the second edition of this key health textbook picks up where the first left off: demystifying the practice of finding and using evidence to inform decision-making across a range of professions and roles within the healthcare sector. Evidence-based Practice across the Health Professions, 2nd Edition E-book covers an additional three health disciplines - now totalling 12 - and features a new chapter on the important role of organisations in promoting evidence-based practice. Additional new content includes a greater emphasis on reflection, new clinical scenarios and additional examples of systematic reviews. The authors' focused, user-friendly approach helps students understand the importance and implications of evidence-based practice, and addresses the growing importance of collaborative practice and the reality of multidisciplinary health teams in the overall healthcare environment. Worked examples of a wide range of case scenarios and appraised papers (some are discipline-specific and others are multidisciplinary). Designed to be used by students from a wide range of health professions, thus facilitating the student's ability to understand the needs of multi-disciplinary health-care teams in a real-life setting. Includes a detailed chapter on implementing evidence into practice and other topics that are not typically addressed in other texts, such as a chapter about how to communicate evidence to clients and another that discusses the role of clinical reasoning in evidence-based practice. Summary points at the end of each chapter. Supported by an Evolve resource package that contains revision questions that utilize a range of question formats. Three new health disciplines covered - human movement & exercise science, pharmacy and paramedicine - with new clinical scenarios. New chapter - Embedding evidence-based practice into routine clinical care. Elsevier's Evolve - an expanded suite of online assets to provide additional teaching and student resources. New examples of appraising and using systematic reviews of qualitative evidence (meta-synthesis). Nine new contributors including paramedicine, CAMS, qualitative EBP and nursing. New larger format and internal design.

Vehicle Extrication: Levels I & II: Principles and Practice

Reviews the circumstances surrounding the Challenger accident to establish the probable cause or causes of the accident. Develops recommendations for corrective or other action based upon the Commission's findings and determinations. Color photos, charts and tables.

Analysis Report on Firefighter Fatalities in the United States in 1994

This book addresses all issues relevant to error prevention and safe practice in the acute and emergency health-care setting. It begins with the basic principles of human behavior and decision making and then partitions into three sections where the individual, the team, and the organizational influences within the health-care system are discussed in greater depth. Case reports and proven strategies help to ground psychological theory in daily practice. This book has emerged from a long-standing cooperation between clinicians and psychologists and blends the strengths of both professions into a readily accessible text.

Proposals That Work

Human-computer Interaction

Offering highly visual, easy-to-read coverage of the full range of anesthesia equipment in use today, this authoritative reference is your go-to text for objective, informed answers to ensure optimal patient safety. Anesthesia Equipment, 3rd Edition, provides detailed information on the intricate workings of each device or workstation, keeping you fully up to date and helping you meet both equipment and patient care challenges. Remains unequalled in both depth and breadth of coverage, offering readable, concise guidance on all aspects of today's anesthesia machines and equipment. Details the latest machines, vaporizers, ventilators, breathing systems, vigilance, ergonomics, and simulation. Improves your understanding of the physical principles of equipment, the rationale for its use, delivery systems for inhalational anesthesia, systems monitoring, hazards and safety features, maintenance and quality assurance, special situations/equipment for non-routine adult anesthesia, and future directions for the field. Includes ASA Practice Parameters for care, and helps you ensure patient safety with detailed advice on risk management and medicolegal implications of equipment use. Highlights the text with hundreds of full-color line drawings and photographs, graphs, and charts.

The MGH Textbook of Anesthetic Equipment E-Book

This book provides a comprehensive account of the relevant physiology, pathophysiology, nutritional therapy and dietetic application for each specialist dietetic area. All major specialist areas involved in the the treatment of adults are covered. The first section deals with clinical governance, for example patient-centred care, clinical decision-making and developing evidence-based practice. The second section on advanced clinical practice describes 18 clinical conditions or dietetic areas in detail. There is detailed coverage of 18 clinical conditions or dietetic areas: The control of food intake and absorption of nutrients Drug nutrient interactions Food allergy - allergy and intolerance Irritable bowel disease (IBD) and colorectal cancer Short bowel syndrome Enteral nutrition Parenteral nutrition Thermal injury Nutrition and liver disease HIV Palliative care Renal disease Diabetes Obesity Cardiovascular disease Stroke Neurological conditions Mental health. Each chapter concludes with a section on possible future developments in the specialty, providing insight into 'hot topics', making this an essential text for all working in the field of Dietetics and Clinical Nutrition. Each clinical chapter follows a standard structure: Learning objectives Key points summarise important aspects Case studies with questions and answers help link theory to practice References and further reading suggestions encourage wider research.

Perioperative Safety E-Book

What are the instincts of a good teacher? Can they be taught? Good teachers use good techniques and routines, but techniques and routines alone do not produce good teaching. The real art of teaching lies in teachers' professional judgement because in teaching there is seldom one "right answer". This combination of experience, flexibility, informe

Sections 1-2. Keyword Index.--Section 3. Personal author index.--Section 4. Corporate author index.-- Section 5. Contract/grant number index, NTIS order/report number index 1-E.--Section 6. NTIS order/report number index F-Z.

Transportation

Covering all aspects of the proposal process, from the most basic questions about form and style to the task of seeking funding, this Sixth Edition has been completely updated and revised to offer clear advice backed up with excellent examples.

The SAGE Glossary of the Social and Behavioral Sciences

This book covers the proceedings of INTERACT 2001 held in Tokyo, Japan, July 2001. The conference covers human-computer interaction and topics presented include: interaction design, usability, novel interface devices, computer supported co-operative works, visualization, and virtual reality. The papers presented in this book should appeal to students and professionals who wish to understand multimedia technologies and human-computer interaction.

Exploring Crime Analysis

A manual for crime analysts and those interested in the profession, covering 20 essential crime analysis skills, written by some of the most experienced professionals in the field.

Management Review and Analysis Program, Indiana University Libraries, August 1, 1974-January 9, 1976

Non-Operating Room Anesthesia E-Book

Human Factors Methods and Accident Analysis is the first book to offer a practical guide for investigators, practitioners and researchers wishing to apply accident analysis methods. It is also unique in presenting a series of novel applications of accident analysis methods, including HF methods not previously used for these purposes (e.g. EAST, critical path analysis), as well as applications of methods in new domains.

Research Methods for Health and Social Care

Handbook of Critical Incident Analysis

The SAGE Glossary of the Social and Behavioral Sciences provides college and university students with a highly accessible, curriculum-driven reference work, both in print and on-line, defining the major terms needed to achieve fluency in the social and behavioral sciences. Comprehensive and inclusive, its interdisciplinary scope covers such varied fields as anthropology, communication and media studies, criminal justice, economics, education, geography, human services, management,

political science, psychology, and sociology. In addition, while not a discipline, methodology is at the core of these fields and thus receives due and equal consideration. At the same time we strive to be comprehensive and broad in scope, we recognize a need to be compact, accessible, and affordable. Thus the work is organized in A-to-Z fashion and kept to a single volume of approximately 600 to 700 pages.

REPORT ON LEGISLATIVE AND OVERSIGHT ACTIVITIES OF THE, JANUARY 2, 2007, 109-2 HOUSE REPORT 109-741

This book is a new comprehensive and thought-provoking resource that examines stress in organizational contexts. It reviews the sources and outcomes of job-related stress, the methods used to assess levels and consequences of occupational stress, along with the strategies that might be used by individuals and organizations to confront stress and its associated problems. It focuses on the future of work, where it is going and the role industrial and organizational psychologists can play in better understanding the dynamics of occupational stress. An excellent resource for Ph.D. students, academics and professionals.
