Thinking Through Communication

Critical Issues in Education examines three questions that are at the core of the education debate in the United States: What interests should schools serve? What knowledge should schools teach? How do we develop the human environment of schools? When answering these queries the authors advocate the use of critical thinking, which includes dialogue and dialectic reasoning. Dynamic and interactive, dialogue requires listening and assessment, while dialectic stimulates the development of a creative response that encompasses both sides of an issue. When applied, these approaches engender an informative and stimulating discussion. In order to explore the depth of current educational issues, the Ninth Edition considers 15 topics, providing supporting evidence and reasoning for two divergent views. These issues include violence in schools, the role of technology, gender equity, multiculturalism, inclusion and disability, and school choice. Both civic and professional discussions regarding improvements will have consequences for students, teachers, and society. As a result, educational views and the social landscape in which they reside deserve critical study.

Rereading America

Keeping the Republic gives students the power to examine the narrative of what's going on in American politics, distinguish fact from fiction and balance from bias, and influence the message through informed citizenship. Keeping the Republic draws students into the study of American politics, showing them how to think critically about "who gets what, and how" while exploring the twin themes of power and citizenship. Students are pushed to consider how and why institutions and rules determine who wins and who loses in American politics, and to be savvy consumers of political information. The thoroughly updated Eighth Edition considers how a major component of power is who controls the information, how it is assembled into narratives, and whether we come to recognize fact from fiction. Citizens now have unprecedented access to power - the ability to create and share their own narratives - while simultaneously being even more vulnerable to those trying to shape their views. The political landscape of today gives us new ways to keep the republic, and some high-tech ways to lose it. Throughout the text and its features, authors Christine Barbour and Gerald Wright show students how to effectively apply the critical thinking skills they develop to the political information they encounter every day. Students are challenged to deconstruct prevailing narratives and effectively harness the political power of the information age for themselves. Up-to-date with 2018 election results and analysis, as well as the impact of recent Supreme Court rulings, shifting demographics, and emerging and continuing social movements, Keeping the Republic, Eighth Edition is a much-needed resource to help students make sense of politics in America today.
