## **Don Rosa Classics: The Complete Captain Kentucky**

Mild-mannered Drake Mallard leads a pretty average life: relaxing at home, helping his daughter Gosalyn with her homework, and palling around with his best buddy Launchpad McQuack. But this suburban pastoral doesn't make for very exciting comics. Good thing Drake is secretly the daring duck of mystery, the crime-fighting powerhouse, Darkwing Duck! (Whew, for a moment there we were worried this would be the most boring solicitation copy in history!) Darkwing Duck, alongside Launchpad, Gosalyn and their many allies, fought the forces of darkness in his beloved city of St. Canard for years, keeping the citizens safe from an endless supply of increasingly ridiculous supervillains. Then, just as suddenly as he appeared, Darkwing slipped into the shadows, not to be seen or heard from again. But what sinister scenario could send St. Canard's stalwart sentinel into seclusion? Just how safe was the city he left behind? And what's going on with the creepy robotic "protectors" the mysterious Quackwerks Corporation has rolled out to take Darkwing's place? When the utopian shine begins to wear off, St. Canard will need her superhero once againÉ but is the Duck Knight ready to take on his most malevolent menace yet? Collecting the entire out-of-print and sold-out comic book series for the first time in one volume, this 400-page blockbuster is big enough to knock out a

With St. Canard's mayor abandoning the city for the less dangerous shores of Duckburg, someone has to lead the city, and who better than her persistent protector, Darkwing Duck? That's right, Darkwing Duck is running for mayor! But before the masked mallard can hang up his gas guns and become the daring duck of democracy, he'll have to face St. Canard's latest threat, as wave after wave of all-new bad guys come gunning for him! Can Darkwing possibly fend them off while fighting an unexpected mayoral challenge from his best friend, Launchpad McQuack? And who is the malignant malefactor manipulating the mayor's race, anyway? The epic conclusion to the Darkwing Duck saga, with an all-new epilogue that sets the stage for the next chapter!

Implement machine learning and deep learning methodologies to build smart, cognitive AI projects using Python Key Features A go-to guide to help you master AI algorithms and concepts 8 real-world projects tackling different challenges in healthcare, e-commerce, and surveillance Use TensorFlow, Keras, and other Python libraries to implement smart AI applications Book Description This book will be a perfect companion if you want to build insightful projects from leading AI domains using Python. The book covers detailed implementation of projects from all the core disciplines of AI. We start by covering the basics of how to create smart systems using machine learning and deep learning techniques. You will assimilate various neural network architectures such as CNN, RNN, LSTM, to solve critical new world challenges. You will learn to train a model to detect diabetic retinopathy conditions in the human eye and create an intelligent system for performing a video-to-text translation. You will use the transfer learning technique in the healthcare domain and implement style transfer using GANs. Later you will learn to build AI-based recommendation systems, a mobile app for sentiment analysis and a powerful chatbot for carrying customer services. You will implement AI techniques in the cybersecurity domain to generate

Captchas. Later you will train and build autonomous vehicles to self-drive using reinforcement learning. You will be using libraries from the Python ecosystem such as TensorFlow, Keras and more to bring the core aspects of machine learning, deep learning, and AI. By the end of this book, you will be skilled to build your own smart models for tackling any kind of AI problems without any hassle. What you will learn

- Build an intelligent machine translation system using seq-2-seq neural translation machines
- Create AI applications using GAN and deploy smart mobile apps using TensorFlow
- Translate videos into text using CNN and RNN
- Implement smart AI Chatbots, and integrate and extend them in several domains
- Create smart reinforcement, learning-based applications using Q-Learning
- Break and generate CAPTCHA using Deep Learning and Adversarial Learning

Who this book is for This book is intended for data scientists, machine learning professionals, and deep learning practitioners who are ready to extend their knowledge and potential in AI. If you want to build real-life smart systems to play a crucial role in every complex domain, then this book is what you need. Knowledge of Python programming and a familiarity with basic machine learning and deep learning concepts are expected to help you get the most out of the book
