Major accidents are rare events due to the many barriers, safeguards and defences developed by modern technologies. But they continue to happen with saddening regularity and their human and financial consequences are all too often unacceptably catastrophic. One of the greatest challenges we face is to develop more effective ways of both understanding and limiting their occurrence. This lucid book presents a set of common principles to further our knowledge of the causes of major accidents in a wide variety of high-technology systems. It also describes tools and techniques for managing the risks of such organizational accidents that go beyond those currently available to system managers and safety professionals. James Reason deals comprehensively with the prevention of major accidents arising from human and organizational causes. He argues that the same general principles and management techniques are appropriate for many different domains. These include banks and insurance companies just as much as nuclear power plants, oil exploration and production companies, chemical process installations and air, sea and rail transport. Its unique combination of principles and practicalities make this seminal book essential reading for all whose daily business is to manage, audit and regulate hazardous technologies of all kinds. It is relevant to those concerned with understanding and controlling human and organizational factors and will also interest academic readers and those working in industrial and government agencies.

The FHWA Technical Manual for Design and Construction of Road Tunnels - Civil Elements has been published to provide guidelines and recommendations for planning, design, construction and structural rehabilitation and repair of the civil elements of road tunnels, including cut-and-cover tunnels, mined and bored tunnels, immersed tunnels and jacked box tunnels. The latest edition of the AASHTO LRFD Bridge Design and Construction Specifications are used to the greatest extent applicable in the design examples. This manual focuses primarily on the civil elements of design and construction of road tunnels. It is the intent of FHWA to collaborate with AASHTO to further develop manuals for the design and construction of other key tunnel elements, such as, ventilation, lighting, fire life safety, mechanical, electrical and control systems. FHWA intends to work with road tunnel owners in developing a manual on the maintenance, operation and inspection of road tunnels. This manual is expected to expand on the two currently available FHWA publications: (1) Highway and Rail Transit Tunnel Inspection Manual and (2) Highway and Rail Transit Tunnel Maintenance and Rehabilitation Manual. Black and white print.

Collaborative teaching, or co-teaching, is a powerful way to support the learning of students with diverse learning needs. But how do you know when you're doing it right? And if you're not, what can you do about that? Authors Wendy W. Murawski and Wendy W. Lochner introduce the Collaborative Teaching Improvement Model of Excellence (CTIME), a continuous improvement model that embraces personalized professional learning to ensure that teachers meet the core competencies for co-teaching without burning out along the way. Incorporating a systematic application of collaborative groups, data analysis, microteaching, feedback, and collegial support, CTIME is the culmination of the best research in the field. As Murawski and Lochner walk you through their data-driven, no-fail model of co-teaching, you'll learn about

- The CTIME process and how it works.
- Co-teaching core competencies measured schoolwide and at the classroom level.
- Assessment of progress toward mastery.
- Co-teaching action plans.
- Professional learning communities and schoolwide improvement.
- Co-teaching communities of practice and microteaching.
- Co-teaching facilitation, feedback, and reflection.

Offering a practical approach to achieving mastery of the co-teaching core

competencies, this book provides dozens of strategies, resources, and templates that can be used by district-level administrators, principals, and co-teaching teams. If you're ready to examine your co-teaching practices to make sure you're achieving the best possible outcomes for your students, then *Beyond Co-Teaching Basics* is for you.

Modular Kaizen is a development of necessity. Improvement has to happen on the fly in our rapidly changing world. This book is about using the resources, people, and schedules already in place to get things done. Modular Kaizen is the counterpoint to a kaizen blitz, in which team members are confined in a room to hammer out an opportunity or a solution to some problem. In the hectic, interrupt-driven environment of many organizations, it is simply not possible to remove critical players from normal operations for any length of time. Grace Duffy draws on 40 years of experience to incorporate techniques, innovations, and lessons learned in pursuit of effective continuous and breakthrough improvement. Part I provides the conceptual model along with steps and tools for process and system improvement in an extremely busy and interrupt-driven workplace. Part II offers three case studies—from manufacturing, healthcare, and aerospace—to show how the techniques work in real time. If you are looking for proven approaches to integrating quality improvement into daily work, this is your book. It is written for those of us who have to “get it done,” not just talk about it. So roll up your sleeves and dig in.

The June 2019 OMB Circular No. A-11 provides guidance on preparing the FY 2021 Budget and instructions on budget execution. Released in June 2019, it's printed in two volumes. This is Volume I. Your budget submission to OMB should build on the President's commitment to advance the vision of a Federal Government that spends taxpayer dollars more efficiently and effectively and to provide necessary services in support of key National priorities while reducing deficits. OMB looks forward to working closely with you in the coming months to develop a budget request that supports the President's vision. Most of the changes in this update are technical revisions and clarifications, and the policy requirements are largely unchanged. The summary of changes to the Circular highlights the changes made since last year. This Circular supersedes all previous versions. We print the paperback book so you don't have to. First you gotta find a good clean (legible) copy and make sure it's the latest version (not always easy). Some documents found on the web are missing some pages or the image quality is so poor, they are difficult to read. If you find a good copy, you could print it using a network printer you share with 100 other people (typically its either out of paper or toner). If it's just a 10-page document, no problem, but if it's 250-pages, you will need to punch 3 holes in all those pages and put it in a 3-ring binder. Takes at least an hour. It's much more cost-effective to just order the bound paperback from Amazon.com This book includes original commentary which is copyright material. Note that government documents are in the public domain. We print these paperbacks as a service so you don't have to. Managing to Change the World

This book will be a substantial revision, which will reflect the new version of the ISO 13485:2016. This represents the standard protocols that all medical device manufacturers must follow, in the fabrication of their products. It will focus on changes in the structure of the quality management system; change in the documentation for quality management systems and finally, present the different methods of implementation of the standard requirements within the organization. This new version was initiated in 2016, thus all appropriate enterprises using the old standard must convert to the new version, now available. The Second Edition will clarify, explain and demonstrate the new version.

Literacy lies at the heart of student understanding and achievement. Yet too many educators mistakenly assume that the reading, writing, speaking, and thinking

skills that students developed in elementary school are sufficient for the sophisticated learning tasks they face in middle and high school. The result? Disappointing test scores, high dropout rates, and students unprepared for higher education, citizenship, and the world of work. Taking Action on Adolescent Literacy: An Implementation Guide for School Leaders presents a structured approach to using literacy as a lever for overall school improvement. Literacy instruction is not an "add-on," authors Judith L. Irvin, Julie Meltzer, and Melinda Dukes insist; it's an ongoing essential. All adolescent students, no matter what their level of achievement, can benefit from direct instruction in reading, writing, speaking, and thinking. And all secondary school leaders can improve students' literacy and learning by following the five action steps outlined in this book: (1) develop and implement a literacy action plan, (2) support teachers to improve literacy instruction, (3) use data to make curricular decisions, (4) build capacity for shared leadership, and (5) creatively allocate resources to support the literacy plan. The book also offers strategies to help educators integrate literacy and learning across the content areas, provide targeted interventions for students who are struggling the most, and develop a supportive school environment that involves parents, community members, and district leaders. Practical tools, helpful resources, and vignettes based on the authors' extensive work in school districts nationwide make this an indispensable guide for principals, central office administrators, literacy coaches, department chairs, and other school leaders committed to helping students succeed.

Change Management: the people side of change is an introduction to change management for managers and executives. Project leaders and consultants can use this new book with their organizations and clients to introduce change management to front-line managers and top-level executives involved in change. Specifically, managers and executives will understand the broader perspective around change management and understand their role in the process. Written by Jeff Hiatt and Tim Creasey, the editors of the Change Management Learning Center, this book takes 7 years of research with more than 1000 companies, white papers and change management models, and combines this knowledge into an easy-to-read guide for managing change. Multiple case studies and examples make this book a quick-read for managers and executives that need a basic understanding of change management.
