For use in introductory and advanced undergraduate courses, the book covers a broad range of topics in the field, including: personality, motivation, groups, power, and leadership. Firstly, the book analyzes organizational behavior from the perspective of the individual actor, focusing on themes such as the differences in personality and their manifestations in the organization environment; attitudes, perceptions, and the evaluation of performance and problem solving, motivation to work, stress, emotions, and organizational well-being. Secondly, the authors focus on the relationships among actors. They analyze the conditions of effectiveness of workgroups, decisions, communications, and conflict, and conclude with themes tied to power and leadership. Lastly, the authors focus their attention on the wider organization and management structures, people, culture, and change.
