Champion motorcyclist and truck racer, television presenter, practical joker or just plain survivor - Steve Parrish has been called them all. Parrish Times tracks his amazing journey over the last four decades, through a rollercoaster ride of emotions in surely the most dangerous and exhilarating sporting arena there is. In the 1970s Steve was competing for the world motorcycle championship with legendary team mate Barry Sheene on a Suzuki. After retiring in 1986, Steve managed a successful Yamaha factory team to three British Superbike Championship titles and started a truck-racing career, becoming the most successful truck racer ever. He also proved to be a natural commentator, first for BBC radio, then transferring to television with Sky, ITV and Eurosport. Against this backdrop are Steve's notorious pranks: posing as a medical doctor to allow John Hopkins to fly from Japan to the Australian GP; impersonating Barry Sheene in a qualifying session; owning a fire engine, a hearse, and an ambulance - parking it on double yellow lines with the doors open in visits to his local bank. It's a funny, hell-raising account of life - and death - in the fast lane that will keep readers enthralled to the end. Barry Sheene's final words to his best friend sum it up: 'Neither of us will die wondering.'

## **Two Wheels to Adventure**

On February 16 2016, motorcycle adventurer Charley Boorman suffered a major road traffic accident in Portugal. Having

spent the better part of his life on some form of motorbike, his world came crashing down after he was knocked off a Triumph Tiger Explorer, smashing his right ankle and causing severe damage to his left fibia and tibia. It was unclear if he would ever walk properly again, let alone ride a motorbike. Moving between past and present, Long Way Back recounts Charley's journey back of recovery, the ambulance ride, the numerous operations in a Portuguese hospital, the medivac aircraft flight back to London. In alternating chapters, as his inability to walk for several months provokes introspection, Boorman recounts his childhood, where his passion for motorbikes began, and the formative influences in his life - from his father, a touring film director, to his long-time friend Ewan McGregor, and Sean Connery's son Jason, who first introduced him to bikes. As Charley struggles to cope with this potentially life-changing situation, it is these touchstones who will give him strength on the long way back to health.

## **Great Motorcycle Tours of Europe**

This best-selling book is also “#1 book in motorcycle safety” (Nielsen BookScan) and essential reading for all motorcyclists regardless of their years of experience. Author David L. Hough, a revered motorcycle author, columnist, and riding-safety consultant, lays out a clear course for all riders who want to sharpen their handling skills and improve their rides. This second edition, expanded and now in full color, offers new riders and road warriors the exact kind of advice they need to be prepared for anything when on the road, how to avoid accidents, and how to handle the unexpected. Hough, who began motorcycling in the 1960s, tackles every imaginable topic—from the mechanics of the bike, selection of the right-sized bike, and basic riding skills to night riding, group outings, and advanced survival tactics. In the chapter called “Motorcycle Dynamics,” Hough spells out the equipment needed and basic skills required to control a bike, and specifically keeping the rider’s safety and ability to avoid potentially injurious or fatal crashes. The author is outspoken and direct when it comes to safety, and he emphasizes the importance of the rider’s braking abilities and spells out how to improve them. The chapter offers six tried-and-true techniques for quick-stop tactics, critical for every rider to understand and master. He also addresses other vital skills that riders need to evaluate and improve, such as turning, maintaining balance and stability, and steering. He defines, compares, and analyzes the ins and outs of steering and control: direct steering, countersteering, push

steering, out-tracking, coning, u-turns, and directional control. The chapter called "Cornering Habits" is a virtual master class in acceleration, deceleration, use of weight, throttle, leaning, and handling challenging terrain. Hough's skill as a photographer and illustrator adds a graphic element to his books that leads to immediate understanding of the concepts he explains. The detail offered in each section of the book can only come from decades on the road, and the author is the consummate instructor, assigning homework to the readers in the form of exercises to practice and improve specific techniques that he outlines and illustrates in the text. Any rider who would venture out on the road without David Hough's voice in his head takes an unnecessary risk with his own life. Proficient Motorcycling takes riders from long, snaking country roads right into the traffic of the big city, and Hough offers the best advice for riders dealing with the most challenging conditions, whether it's road construction, snap-jawed intersections, skateboarders, or suddenly slippery road surfaces. A critical section of the book offers riders advice on how to deal with automobiles, including aggressive car drivers, oblivious SUV drivers, or "blind" truck drivers. The book offers the kind of first-hand experience that can literally save riders' lives, as illustrated in the chapters "Booby Traps" and "Special Situations," which offer evasive tactics and advice to avoid and handle everything from slick surfaces, curbs, and construction plates to ferocious dogs, hazardous wildlife, and difficult weather conditions. The final chapter of the book, "Sharing the Ride," is geared toward experienced riders who travel together in groups or who travel with a second passenger on the bike. Topics covered are formation, packing for trips, communication between riders, sidecars, trikes, and more. The book concludes with a resources section of organizations, training schools, educational tools, and websites; a glossary of 80+ terms; and a complete index.

The volume provides a field-analytical methodology for researching knowledge-based sociopolitical processes of transnationalization. Drawing on seminal work by Pierre Bourdieu, we apply concepts of practice, habitus, and field to phenomena such as cross-national social trajectories, international procedures of evaluation, standardization, and certification, or supranational political structures. These transnational phenomena form part of general political struggles that legitimate social relationships in and beyond the nation-state. Part 1 on methodological foundations discusses the consequences of Bourdieu's epistemology and methodology for theorizing and investigating transnational phenomena. The contributions show the importance of field-theoretical concepts for post-national insights. Part 2 on investigating political fields presents exemplary case studies in diverse research areas such as colonial imperialism, international academic rankings, European policy fields, and local school policy. While focusing on their research objects, the contributions also give an insight into the mechanisms involved in processes of transnationalization. The volume is an invitation for sociologists, political scientists, and scholars in adjacent research areas to engage with reflexive and relational research practice and to further develop field-theoretical thought.

## **Kansas Troubles**

Originally published in 1983, this book presents both the technical and political information necessary to evaluate the emerging threat to world security posed by recent advances in uranium enrichment technology. Uranium enrichment has played a relatively quiet but important role in the history of efforts by a number of nations to acquire nuclear weapons and by a number of others to prevent the proliferation of nuclear weapons. For many years the uranium enrichment industry was dominated by a single method, gaseous diffusion, which was technically complex, extremely capital-intensive, and highly inefficient in its use of energy. As long as this remained true, only the richest and most technically advanced nations could afford to pursue the enrichment route to weapon acquisition. But during the 1970s this situation changed dramatically. Several new and far more accessible enrichment techniques were developed, stimulated largely by the anticipation of a rapidly growing demand for enrichment services by the world-wide nuclear power industry. This proliferation of new techniques, coupled with the subsequent contraction of the commercial market for enriched uranium, has created a situation in which uranium enrichment technology might well become the most important contributor to further nuclear weapon proliferation. Some of the issues addressed in this book are: A technical analysis of the most important enrichment techniques in a form that is relevant to analysis of proliferation risks; A detailed projection of the world demand for uranium enrichment services; A summary and critique of present institutional non-proliferation arrangements in the world enrichment industry, and An identification of the states most likely to pursue the enrichment route to acquisition of nuclear weapons.

## Cafe Racers of the 1960s

Go on the ride of your life with the racing legend himself \*\*with a thrilling NEW CHAPTER on John's dramatic 2017 crash\*\* 'Then I was there myself, just another face in the crowd, watching the bikes fly by. The smells, the noise and the speed were all there for me to experience. It was like a massive injection in my head and it just blew my mind. I knew within seconds that I was going to be a TT racer. I didn't know how or what I was going to have to do to achieve this, and my dad wasn't going to be keen. Everyone around me was aware of the dangers, but from that moment I knew I had to do it.' John McGuinness is one of the all-time giants of road racing, with a huge host of victories to his name. But his easy humour and down-to-earth attitude off the bike have always kept people guessing: what's the truth about the man inside the helmet, that has kept him at the top of such a sport for over 20 years? His autobiography tells the whole story, from his humble beginnings in Morecambe and getting his first bike at the age of 3, to working as a bricklayer and cockle fisherman before deciding to follow his dream, and finally to his many victories in the most dangerous sporting event on the planet. He tells of what it takes to be a champion in such an exacting sport, and to keep winning even though all logic tells you to stop -

and when so many of your fellow racers are paying the ultimate price for doing it. This thrilling autobiography gets into the head of the man who stares death in the face, and doesn't even flinch.
