Thinking in Java

Is American English in decline? Are regional dialects dying out? Is there a difference between men and women in how they adapt to linguistic variations? These questions, and more, about our language catapulted Robert MacNeil and William Cran—the

authors (with Robert McCrum) of the language classic *The Story of English*—across the country in search of the answers. *Do You Speak American?* is the tale of their discoveries, which provocatively show how the standard for American English—if a standard exists—is changing quickly and dramatically. On a journey that takes them from the Northeast, through Appalachia and the Deep South, and west to California, the authors observe everyday verbal interactions and in a host of interviews with native speakers glean the linguistic quirks and traditions characteristic of each area. While examining the histories and controversies surrounding both written and spoken American English, they address anxieties and assumptions that, when explored, are highly emotional, such as the growing influence of Spanish as a threat to American English and the special treatment of African-American vernacular English. And, challenging the purists who think grammatical standards are in serious deterioration and that media saturation of our culture is homogenizing our speech, they surprise us with unpredictable responses. With insight and wit, MacNeil and Cran bring us a compelling book that is at once a celebration and a potent study of our singular language. Each wave of immigration has brought new words to enrich the American language. Do you recognize the origin of 1. blunderbuss, sleigh, stoop, coleslaw, boss, waffle? Or 2. dumb, ouch, shyster, check, kaput, scram, bumper? Or 3. phoey, pastrami, glitch, kibbitz, schnozzle? Or 4. broccoli, espresso, pizza, pasta, macaroni, radio? Or 5. smithereens, lollapalooza, speakeasy, hooligan? Or 6. vamoose, chaps, stampede, mustang, ranch, corral? 1. Dutch 2.

Little Squire was born in an Irish meadow on an early spring day. The colt was beautifully formed with strong, straight legs and a pretty head. But due to his small size, it was unlikely he would be more than a nice child's riding pony. By the following spring, the yearling was separated from his mother and turned

out to pasture with the other weanlings. Little Squire wasn't happy to be away from his dam so he charged the high stone wall and cleared it easily. Little Squire had just shown an astonishing side of himself that would eventually bring him greatness. Over time, the young horse traded hands, crossed an ocean, and ended up on the American show-jumping circuit. That was when he met another diminutive Irish immigrant, Mickey Walsh. The two were inseparable until, at Mickey's request, Little Squire was retired at the top of his game, and while he was still sound. He went out in a blaze of glory, though, ending his last performance with Mickey by jumping a six-foot-two fence — rider-less — in front of a packed arena. During the war-torn 30s, Little Squire had given people something to cheer about. From the Trade Paperback edition.

Project Mustang is a complete guide to restoring America's favorite muscle car, written by auto-restoration guru Larry Lyles, a regular contributor to Auto Restorer magazine. In this detailed 23-chapter volume, Lyles walks the car owner from the in-depth inspection of the vehicle and the beginning of the teardown to re-covering the seats and replacing the frame rail...and every step in between. The car restored for the project in the book is a 1968 California Special Mustang. The chapter titles themselves speak for what a straightforward DIY manual Lyles has written, as he details the step-by-step procedure of bringing a very cool rod back to life. Beginning the teardown, exterior and interior; repairing the sheet metal, door, and deck up; removing the major parts (driveshaft, engine, transmission, front suspension, steering system, etc.); removing old paint and replacing rust floors; no-weld rust repair; perfecting the metal; working with plastic body filler; priming and sanding; refinishing the components and underside, the door, interior, trunk, and body; wiring the car and installing the doors; applying the coatings, rebuilding the suspension, and

installing the brake lines; installing the vinyl top cover, the headliner, and the glass; rebuilding and installing the engine; installing the front sheet metal, emblems, bumpers, stripes, carpet, and console; recovering the seats; and replacing the frame rails. Each step in every chapter is photographed as the author progresses along, with captions to spell out exactly what has to happen. The book offers helpful advice about choice of tools and tips to make even beginners feel confident about tackling the many steps involved. With nearly forty years experience in repairing, rebuilding, and restoring classic cars (and lots of non-classic ones!), Lyles emphasizes the reader's need to organize his or her project by determining the course of the project, researching suppliers, making lists of parts and their conditions, creating spreadsheets of estimated and actual costs, and photographing each component as a reference for later in case the restoration goes off track. Each chapter ends with a "notes" page for the reader to record his or her progress, making this manual a practical workbook as well. When the reader gets to the final pages of the book and reads the sections "Start the Engine" and "Test Drive the Car," there will be a true sense of accomplishment. An appendix of part suppliers and an index complete the book.

It had incredible endurance, fantastic maneuverability and excellent high-altitude performance, and served throughout World War II and beyond. This aircraft is one that holds a great deal of interest for many modellers around the world. This book takes the modeller from the aircraft's beginnings to the ultimate manifestation of this elegant and deadly bird, the F-82 G/H Twin Mustang. The P-47 Thunderbolt, affectionately nicknamed the 'Jug', was one of the most famous fighter aircraft of World War II. Used as both a high-altitude escort fighter and a low-level fighter-bomber, it quickly gained a reputation for being tough and resilient. Many different air forces operated this plane, and it sported a wide range of camouflage schemes, finishes and markings, including stunning nose art. Modellers

have been well served with Thunderbolt kits over the years, right up to the latest highly accurate releases. This book takes a step-by-step approach to modelling a wide variety of P-47 types in 1/48-scale, from 'Razorbacks' in USAAF colours to RAF T-bolts in the Far East. It provides expert advice on conversions (including a Bubbletop to a P-47M), adding aftermarket items, detailing, and ways to achieve top quality weathering and finishes.

A COMBAT ACE'S ACCOUNT OF PILOTING THE GREATEST SINGLE-SEAT FIGHTER IN WORLD WAR II

World War II marked the end of an era; fighter pilots still flew by the seat of their pants, and George Loving recaptures the exhilarating world of aerial combat in all its stark terror and fiery glory. His first fighter was the famed Spitfire, hero of the Battle of Britain. By 1943, however, it was obsolescent and did not match up well against the first-line German Messerschmitts and Focke-Wulfs. Yet Loving survived 101 combat missions flying the Spitfire. In the spring of 1944, Loving's 31st Fighter Group started flying P-51 Mustangs and was transferred to the new Fifteenth Air Force to escort heavy-bomber formations on long-range strategic strikes across southern Europe, including southeastern Germany. In the flak-filled skies over Ploesti, Vienna, Bucharest, Munich, and Stuttgart, where a number of the war's fiercest air battles took place, Lieutenant Loving flew head-to-head against some of the Luftwaffe's top fighter aces. By the time George Loving completed his 151st, and final, combat mission on August 21, 1944, he had risen from a lowly second lieutenant and untested wingman to captain, group leader, and Mustang ace. Loving's gripping account captures the savage action he experienced in all its intensity. From the Paperback edition.

With an updated Afterword by the author This is the

epic saga of the American automobile industry's rise and demise, a compelling story of hubris, missed opportunities, and self-inflicted wounds that culminates with the president of the United States ushering two of Detroit's Big Three car companies—once proud symbols of prosperity—through bankruptcy. With unprecedented access, Pulitzer Prize winner Paul Ingrassia takes us from factory floors to small-town dealerships to Detroit's boardrooms to the White House. Ingrassia answers the big questions: Was Detroit's self-destruction inevitable? What were the key turning points? Why did Japanese automakers manage American workers better than the American companies themselves did?
