Macbeth

The autobiography of Evelyn Glennie, the world's first full-time virtuoso percussionist who, since the age of 12, has been profoundly deaf. It describes her upbringing on a remote Scottish farm, her childhood battles against being sent to a school for the deaf and the initial reluctance of the Royal Academy of Music even to interview her. After three outstanding years as a student, culminating in being awarded the prestigious Shell/LSO Gold Medal for Percussion and Piano, we are taken to her triumphant entry on to the professional music stage, worldwide tours, the excitement of recording her first album, and the honour of a solo concert and the 1989 Prom Season.

The End of Sorrow

One of the great Shakespearean tragedies, Macbeth is a dark and bloody drama of ambition, murder, guilt, and revenge. Prompted by the prophecies of three mysterious witches and goaded by his ambitious wife, the Scottish thane Macbeth

murders Duncan, King of Scotland, in order to succeed him on the throne. This foul deed soon entangles the conscience-stricken nobleman in a web of treachery, deceit, and more murders, which ultimately spells his doom. Set amid the gloomy castles and lonely heaths of medieval Scotland, Macbeth paints a striking dramatic portrait of a man of honor and integrity destroyed by a fatal character flaw and the tortures of a guilty imagination.

MyMaths: for Key Stage 3: Student Book 3C

Classic light comedy, fully sustained in the spirit of the plays of this genre. As is characteristic of the dramaturgy of this epoch, the obviousness of the incipient intrigue does not spoil the general charm of the play at all, and the onslaught of free irony and elegant juggling with words and meanings delivers true enjoyment. The plot tells about the creation of a union of two pairs, very different from each other. The wedding of the first couple has already been discussed, and preparations are underway. The second couple still does not even realize that a sharp reversal of fate will happen soon.

Alfie only feels comfortable when he's drawing comics in the attic—but soon his safe haven will be off limits Alfie is perfectly content to spend his time drawing alone in the attic. Nobody bothers him, and he has his door sealed tight against interruption. Up under the roof, he illustrates amazing cartoon strips about heroes and space adventures, from "Super Caterpillar" to "Super Bird"—even though his own life is anything but exciting. One day, Alfie's mom calls him from the attic to tell him his older brother Bubba will be moving home and will take over the attic as his own apartment. Suddenly Alfie's private world is turned inside out, and he'll

need to find a new “home,” even if that means spending time around his weird, argumentative family. This ebook features an illustrated biography of Betsy Byars including rare images from the author’s personal collection.

Twelfth Night; Or, What You Will

Understanding Mathematics for Young Children

In the sweltering summer of 1858 the stink of sewage from the polluted Thames was so offensive that it drove Members of Parliament from the chamber of the House of Commons. Sewage generated by a population of over two million Londoners was pouring into the river and was being carried to and fro by the tides. The Times called the crisis "The Great Stink". Parliament had to act - drastic measures were required to clean the Thames and to improve London's primitive system of sanitation. The great engineer entrusted by Parliament with this enormous task was Sir Joseph Bazalgette, and this book is a fascinating account of his life and work. Bazalgette's response to the challenge was to conceive and build the system of intercepting sewers, pumping stations and treatment works that serves London to this day. In the process he cleansed the River Thames of the capital's sewage and helped to banish cholera, which in the mid-nineteenth century carried off over 40,000 Londoners. But this successful scheme was only one element in Bazalgette's wider contribution to the development of the Victorian capital. He also reclaimed land from the Thames to construct the Victoria, Albert and Chelsea Embankments, built bridges across the Thames at Putney, Battersea and Hammersmith, and created many notable new thoroughfares including Charing Cross Road, Northumberland Avenue and Shaftesbury Avenue. Stephen Halliday's enthralling social and personal history gives a vivid insight into Bazalgette's achievements and the era in which he worked and lived. The author traces the origins of Bazalgette's family in revolutionary France, the confusing sanitation system that he inherited from medieval and Tudor times and his heroic battle with politicians, bureaucrats and huge engineering problems to transform the face and health of the world's largest city.

Is God a Mathematician?

Bestselling author and astrophysicist Mario Livio examines the lives and theories of history’s greatest mathematicians to ask how—if mathematics is an abstract construction of the human mind—it can so perfectly explain the physical world. Nobel Laureate Eugene Wigner once wondered about “the unreasonable effectiveness of mathematics” in the formulation of the laws of nature. Is God a

Mathematician? investigates why mathematics is as powerful as it is. From ancient times to the present, scientists and philosophers have marveled at how such a seemingly abstract discipline could so perfectly explain the natural world. More than that—mathematics has often made predictions, for example, about subatomic particles or cosmic phenomena that were unknown at the time, but later were proven to be true. Is mathematics ultimately invented or discovered? If, as Einstein insisted, mathematics is “a product of human thought that is independent of experience,” how can it so accurately describe and even predict the world around us? Physicist and author Mario Livio brilliantly explores mathematical ideas from Pythagoras to the present day as he shows us how intriguing questions and ingenious answers have led to ever deeper insights into our world. This fascinating book will interest anyone curious about the human mind, the scientific world, and the relationship between them.
