Contributions to Education

WALNECK'S CLASSIC CYCLE TRADER, JUNE 1991

A compilation of engaging and insightful papers from the prestigious 2009 Plant Design Symposium, the volume is a sequel to Mineral Processing Plant Design, Practice, and Control, an industry standard published in 2002. Both books are indispensable texts for university-level instruction, as well as valuable guides for operators considering new construction, plant renovation, or expansion. You'll learn the role of innovation, how to finance and conduct feasibility studies, and how to reduce your plant's carbon footprint.

Documents of the Senate of the State of New York

Innovations in Professional Education for Speech and Language Therapy

The API Individual Certification Programs (ICPs) are well established worldwide in the oil, gas, and petroleum industries. This Quick Guide is unique in providing simple, accessible and well-structured guidance for anyone studying the API 510 Certified Pressure Vessel Inspector syllabus by summarizing and helping them through the syllabus and providing multiple example questions and worked answers. Technical standards are referenced from the API 'body of knowledge' for the examination, i.e. API 510 Pressure vessel inspection, alteration, rerating; API 572 Pressure vessel inspection; API RP 571 Damage mechanisms; API RP 577 Welding; ASME VIII Vessel design; ASME V NDE; and ASME IX Welding qualifications. Provides simple, accessible and well-structured guidance for anyone studying the API 510 Certified Pressure Vessel Inspector syllabus Summarizes the syllabus and provides the user with multiple example questions and worked answers Technical standards are referenced from the API 'body of knowledge' for the examination

Comminution, Theory and Practice

The methods by which a student becomes a speech and language therapist have developed since the 1970s and have been influenced by different models of higher and professional education. Although it is comparatively easy to change an aspect of course content, for example to increase the number of learning hours on autism, the means by which the student learns to become a competent professional in

practice are more complex. This text discusses some of the exciting ways we are examining issues in professional education. It covers actual content (for example the introduction of dysphagia to the curriculum), new methods for learning (problem-based learning and information technology developments), how speech and language therapists develop competence and what is critical in the transition to becoming a qualified therapist. The longstanding placement problem is addressed by innovative work using different professional learning models, such as peer placements and school-based placements. The reader is provided with detailed practical advice about how to approach these models. The book represents some of the current work in universities and speech and language services in the UK and reveals the creativity and commitment to an expanding subject area.
