Peterson's Colleges in New England 2007

Peterson's Graduate Programs in Ocean Engineering, Paper & Textile Engineering, and Telecommunications contains a wealth of information on colleges and universities that offer graduate degrees in these fields. The profiled institutions include those in the United States, Canada, and abroad that are accredited by U.S. accrediting bodies. Up-to-date data, collected through Peterson's Annual Survey of Graduate and Professional Institutions, provides valuable information on degree offerings, professional accreditation, jointly offered degrees, part-time and evening/weekend programs, postbaccalaureate distance degrees, faculty, students, degree requirements, entrance requirements, expenses, financial support, faculty research, and unit head and application contact information. Readers will find helpful links to in-depth

descriptions that offer additional detailed information about a specific program or department, faculty members and their research, and much more. In addition, there are valuable articles on financial assistance, the graduate admissions process, advice for international and minority students, and facts about accreditation, with a current list of accrediting agencies.

Counselors and Mentors Handbook on Federal Student Aid 2006-07

Federal Student Aid uses the data on your FAFSA to calculate an Expected Family Contribution (EFC). The EFC is an indicator of your family's financial strength to pay for education after high school. Your school will subtract your EFC from your total cost of attendance. The result is your financial need. The EFC is not the amount of money that your family must provide. Rather, you should think of the EFC as an index that the college will use to determine how much financial aid (grants, loans, or work-study) you would receive if you were to attend that school. Your application results are transmitted to the school(s) listed on your FAFSA, and the school(s) uses the EFC amount to determine the amount of financial aid that you are eligible to receive. Many states and schools also use the FAFSA data to award aid from their programs. Some states and schools also may require you to complete additional applications. Completing and submitting a FAFSA is free, whether you file electronically or on paper.

Revised edition of a classic bestseller, previous editions have sold over 100,000 copies, that helps college-bound students write great application essays. This new edition of the classic bestseller is a treasure for students who want to write vivid, distinctive essays and personal statements to support their college applications. The College Application Essay builds on what students have already learned in high school to strengthen their writing skills, and then applies those lessons to college applications in particular. In a friendly, conversational tone, the guide helps students find their voice and be "heard" on paper by emphasizing both the thinking process and the technical work of writing. This revised edition includes dozens of current essay questions and topics, with multiple response strategies; advice from admissions directors and guidance professionals, who offer wisdom and insights about how applicants' essays are evaluated; and sample essays written by real students. A new guide for parents shows how they can support - without interfering in - the writing process.

Writing an amazing college admission essay is easier than you think! So you're a high school senior given the task of writing a 650-word personal statement for your college application. Do you tell the story of your life, or a story from your life? Do you choose a single moment? If so, which one? The options seem endless. Lucky for you, they're not. College counselor Ethan Sawyer (aka The College Essay Guy) will show you that there are only four (really, four!) types of college admission essays. And all you have to do to figure out which type is best for you is answer two simple questions: 1. Have you experienced significant challenges in your life? 2. Do you know what you want to be or do in the future? With these questions providing the building blocks for your essay, Sawyer guides you through the rest of the process, from choosing a structure to revising your essay, and answers the big questions that have probably been keeping you up at night: How do I brag in a way that doesn't sound like bragging? and How do I make my essay, like, deep? Packed with tips, tricks, exercises, and sample essays from real students who got into their dream schools, College Essay Essentials is the only college essay guide to make this complicated process logical, simple, and (dare we say it?) a little bit fun.

This paper presents a WWC (What Works Clearinghouse) Quick Review of the report "The Role of Simplification and Information in College Decisions: Results from the H&R Block FAFSA Experiment". The study examined whether assistance in filling out the Free Application for Federal Student Aid (FAFSA) increases the likelihood of filing the FAFSA, college enrollment, and financial aid receipt. The authors analyzed data on about 17,000 individuals in 156 H&R Block tax preparation offices in Ohio and North Carolina. The research described in this report is consistent with WWC evidence standards with reservations. [The following study is the focus of this "Quick Review": Bettinger, E., Long, B., Oreopoulos, P.,

This publication is intended for financial aid administrators and counselors who help students begin the student aid process--filing the Free Application for Federal Student Aid (FAFSA), verifying information, and making corrections and other

changes to the information reported on the FAFSA. This guide contains the following chapters: (1) The Application Process: FAFSA to ISIR, which explains that the laws governing the FSA programs require that a person apply for aid with a form provided by the Department of Education and that no fee be charged for processing it. Students can fill out a paper FAFSA or they can apply electronically; (2) Filling Out the FAFSA, which provides guidance that supplements the application instructions, and discusses some of the more difficult questions that may arise; (3) Expected Family Contribution (EFC), which describes the EFC formula in detail; (4) Verification, which provides a list and discussion of required verification items; and (5) Corrections, Updates, and Adjustments, which recognizes that there are situations where the original application information may need to be changed such as when errors need to be corrected, when dependency status, or household size changes, or when an aid administrator makes an adjustment based on professional judgment. A Verification Worksheet is included in this document.

In this volume, we examine the ways student services professionals in institutions of higher education can best meet the needs of adult learners. Most of the discussion here is situated in four-year colleges and universities, although we recognize that community colleges play a large role in the higher education of adults. However, we made the decision to focus on four-year and post-graduate institutions because we believe that these institutions often are focused on traditional-aged students despite growing adult enrollments, and are most in need of guidance about how to serve this ever-growing population. Students in higher education often are defined as "adult learners" or "non-traditional students" if they are 25 twenty-five years of age or older, and, more significantly, if they have taken on what we consider adult roles and responsibilities, such as caring for children and other family members, working full-time, or participating heavily in community activities. Adult students typically are not focused on campus life in the same way that younger, "traditional-aged" students are. Therefore, our theories of the importance of the campus experience outside the classroom to student development usually do not hold for adults. Yet, adults can and do learn and develop through their engagement in formal higher education. Adults bring experiences and wisdom into the classroom, and receive a learning experience that informs their own professional and personal practices. This is the 102nd issue of the quarterly journal *New Directions for Student Services*.

Simpler

Simpler government arrived four years ago. It helped put money in your pocket. It saved hours of your time. It improved your children's diet, lengthened your life span, and benefited businesses large and small. It did so by issuing fewer regulations, by insisting on smarter regulations, and by eliminating or improving old regulations. Cass R. Sunstein, as administrator of the most powerful White House office you've never heard of, oversaw it and explains how it works, why government will never be the same again (thank goodness), and what must happen in the future. Cutting-edge research in behavioral economics has influenced business and politics. Long at the forefront of that research, Sunstein, for three years President Obama's "regulatory czar" heading the White House Office of Information and Regulatory Affairs, oversaw a far-reaching restructuring of America's regulatory state. In this highly anticipated book, Sunstein pulls back the curtain to show what was done, why Americans are better off as a result, and what the future has in store. The evidence is all around you, and more is coming soon. Simplified mortgages and student loan applications. Scorecards for colleges and universities. Improved labeling of food and energy-efficient appliances and cars. Calories printed on chain restaurant menus. Healthier food in public schools. Backed by historic executive orders ensuring transparency and accountability, simpler government can be found in new initiatives that save money and time, improve health, and lengthen lives. *Simpler: The Future of Government* will transform what you think government can and should accomplish.

If you pick up this book, you want your college or university application process to be smooth and successful. This process is a journey that is bound to change your life forever. Successful journeys begin with visions. Without a vision for your life and goals for achievement, you may end up wandering aimlessly from school to school-and, you risk not being satisfied on your eventual graduation day. Getting admitted to schools you choose begins with a vision that can be realized-a vision that puts you on that perfect college campus. You are probably excited and anxious at the thought of completing all the requirements and the prospect of being in college. Relax. Many have survived this process. In fact, you will read about students who got into top colleges with nothing but a vision and the right tools for a great application. This book gives you that set of tools, ignites your vision, and makes the whole application process successful. As you read each section, you will realize that the process is more than meets the eye, but you will soon be on your way to a smooth process-one that takes your vision and makes it real.

The Student Guide, Financial Aid From The U.S. Department Of Education, 2003-2004

More students are enrolling in college than ever before, and the returns to a college degree are significant, including higher wages, lower unemployment rates, better health outcomes and inter-generational improvements. In 2012, college graduates on average earned \$17,500 more annually than a high school graduate (Taylor, Parker, Morin, Fry, Patten & Brown, 2014). Broad access institutions, which include community colleges and nonselective four-year institutions, represent the majority of college students and institutions. But the number of students completing college degrees has not risen as quickly as college enrollment, especially for certain groups. Low-income and minority students are less likely to complete degrees, even after controlling for student characteristics (Bailey & Dynarski, 2011). My dissertation is comprised of three papers examining financial aid at California community colleges. California has a long history of public support for higher education. California's 1965 Master Plan defined public higher education segments with the commitment for providing public higher education for all willing and able students, including the University of California (UC)—reserved for the State's top one-eighth of high school graduates, California State University (CSU)—reserved for the State's top one-third of high school graduates, and the California Community College (CCC) systems—reserved for anyone “capable of benefiting from instruction”. Each of my three papers uses administrative data on the census of all community college students in California collected by the California Community College Chancellor's Office. California's community college system is the largest in the nation with 113 institutions serving over 2.1 million students each year. Nationwide, over 10 million students enrolled in a community college in 2012, representing 37 percent of all college students (National Center for Education Statistics, 2015). But in California, the share of students enrolling in community college is much higher; 60 percent of all California college students were enrolled in a community college in 2012 (National Center for Education Statistics, 2015). The first paper of this dissertation provides a descriptive landscape of financial aid at California community colleges, including trends in financial aid receipt, differences in student characteristics of aid recipients and combinations of financial aid programs. Historically, the California Community College system had the lowest two-year fees in the nation, but fees have more than doubled since 2002 (Ma, Baum, Pender & Bell, 2015). Results from this descriptive work reveal a complex picture of financial aid receipt among California community college students. The second paper closely examines the effect of requiring the Free Application for Federal Student Aid (FAFSA) at one community college campus on a variety of

outcomes. In 2002, Barstow Community College began requiring the FAFSA for all students applying for the state fee waiver program. To estimate the effect of this policy change on Pell Grant receipt, I use a difference-in-differences approach comparing Barstow to a similar nearby college before and after the policy change. Results show that the policy change had negative effects on FAFSA submission, fee waiver receipt and Pell-eligibility for all students in the first year after the policy change. But analysis for two years after the program was enacted indicates that the negative effects might be short-term, and could possibly rebound after the policy is in place for longer. These results provide valuable insight into the effects of FAFSA's complexity and institutional policies on financial aid receipt. Finally, the third paper of this dissertation examines the effects of the Year-round Pell Grant program. Pell recipients are typically only eligible for one award per year. However, in 2008, Congress authorized the Year-round Pell Grant, which allowed students to receive a second Pell Grant in the same fiscal year. This paper uses a difference-in-differences approach to estimate the effect of the Year-round Pell Grant on California community college summer enrollment. Overall, results from this paper show that the Year-round Pell Grant had a positive significant effect on short-term summer enrollment, with larger effects for the lowest-income Pell Grant recipients and students with higher enrollment intensity. There is interest in reinstating the program, but there is very limited research on the effects of the initial program. This paper provides evidence of how the Year-round Pell Grant increased community college summer enrollment. Overall, this dissertation contributes to the limited research on take-up and effects of financial aid at the two-year level. Given the large numbers of students who begin their postsecondary schooling at community colleges, many of them low-income, it is useful to investigate the effects of financial aid at these broad access institutions. California is an ideal setting for this study because over 20 percent of the nation's community college students are in California, and its 113 campuses represent an enormous amount of institutional diversity.

There is concern about the length and complexity of the Free Application for Fed. Student Aid (FAFSA) and the statutory

need analysis formula used to determine aid eligibility. A study group examined options and implications in simplifying the financial aid process. It focused on: (1) identifying ways to shorten the FAFSA and make it less burdensome to complete; (2) identifying changes to the statutory need analysis formula that would reduce the amount of financial info. required by the FAFSA without causing redist. of fed. and state student aid; and (3) determining how any changes to the FAFSA and the statutory need analysis formula could be implemented. This summary captures the ideas and themes that emerged at the panel and during interviews.

Getting a graduate degree is definitely a smart move. According to the U.S. Census Bureau, the average salary for a college graduate is less than \$28,000. But, this figure rises to \$37,000 for master's degree recipients and to more than \$66,000 for those with doctoral or professional degrees. However, graduate school is expensive. It can cost \$20,000 or more to complete a master's degree and up to \$75,000 to finish some doctoral or professional degrees. That's more than most students can afford to pay on their own. Where can they turn for help? Reference Service Press provides the answer to that question in a unique three-volume series, which describes thousands of funding sources available specifically to support study and research on the graduate school level. Each volume is sold separately and deals with a different discipline: the social sciences, the sciences, and the humanities. In *Money for Graduate Students in the Social Sciences*, more than 1,000 funding opportunities are described in detail. And, it's easy to use the directory. No straight alphabetical listing of programs here; instead, you'll be able to customize your search by zeroing in on entries grouped by both level (master's or doctoral) and purpose (study or research). You can even access the programs by specific subject, title, sponsor, residency requirements, tenability, and deadline date. Now, in one place, you can find all the programs that are available to help you pay for a master's or doctoral degree in accounting, advertising, anthropology and ethnology, business administration, demography and statistics, economics, education, geography, international relations, law, library/information science, marketing, political science, psychology, sociology, or any other social science.
