The inspection and evaluation of bridges in Indiana is critical to ensure their safety to better serve the citizens of the state. Part of this evaluation includes bridge load rating. Bridge load rating, which is a measure of the safe load capacity of the bridge, is a logical process that is typically conducted by utilizing critical information that is available on the bridge plans. For existing, poorly-documented bridges, however, the load rating process becomes challenging to adequately complete because of the missing bridge information. Currently, the Indiana Department of Transportation (INDOT) does not have a prescribed methodology for such bridges. In an effort to improve Indiana load rating practices INDOT commissioned this study to develop a general procedure for load rating bridges without plans. The general procedure was developed and it was concluded that it requires four critical parts. These parts are bridge characterization, bridge database, field survey and inspection, and bridge load rating. The proposed procedure was then evaluated on two bridges in Indiana that do not have plans as a proof of concept. As a result, it was concluded that load rating of bridges without plans can be successfully completed using the general procedure. A flowchart describing the general procedure was created to make the load rating process more user-friendly. Additional flowcharts that summarize the general procedure for different type of bridges were also provided.

Cornell University is fortunate to have as its historian a man of Morris Bishop's talents and devotion. As an accurate record and a work of art possessing form and personality, his book at once conveys the unique character of the early university—reflected in its vigorous founder, its first scholarly president, a brilliant and eccentric faculty, the hardy student body, and, sometimes unfortunately, its early architecture—and establishes Cornell's wider significance as a case history in the development of higher education. Cornell began in rebellion against the obscurantism of college education a century ago. Its record, claims the author, makes a social and cultural history of modern America. This story will undoubtedly entrance Cornellians; it will also charm a wider public. Dr. Allan Nevins, historian, wrote: "I anticipated that this book would meet the sternest tests of scholarship, insight, and literary finish. I find that it not only does this, but that it has other high merits. It shows grasp of ideas and forces. It is graphic in its presentation of character and idiosyncrasy. It lights up its story by a delightful play of humor, felicitously expressed. Its emphasis on fundamentals, without pomposity or platitude, is refreshing. Perhaps most important of all, it achieves one goal that in the history of a living university is both extremely difficult and extremely valuable: it recreates the changing atmosphere of time and place. It is written, very plainly, by a man who has known and loved Cornell and Ithaca for a long time, who has steeped himself in the traditions and spirit of the institution, and who possesses the enthusiasm and skill to convey his understanding of these intangibles to the reader." The distinct personalities of Ezra Cornell and first president Andrew Dickson White dominate the early chapters. For a vignette of the founder, see Bishop's description of "his" first buildings (Cascadilla, Morrill, McGraw, White, Sibley): "At best," he writes, "they embody the character of Ezra Cornell, grim, gray, sturdy, and economical." To the English historian, James Anthony Froude, Mr. Cornell was "the most surprising and venerable object I have seen in America." The first faculty, chosen by President White, reflected his character: "his idealism, his faith in social emancipation by education, his dislike of dogmatism, confinement, and inherited orthodoxy"; while the "romantic upstate gothic" architecture of such buildings as the President's house (now Andrew D. White Center for the Humanities), Sage Chapel, and Franklin Hall may be said to "portray the taste and Soul of Andrew Dickson White." Other memorable characters are Louis Fuertes, the beloved naturalist; his student, Hugh Troy, who once borrowed Fuertes' rhinoceros-foot wastebasket for illicit if hilarious purposes; the more noteworthy and the more eccentric among the faculty of succeeding presidential eras; and of course Napoleon,

the campus dog, whose talent for hailing streetcars brought him home safely—and alone—from the Penn game. The humor in *A History of Cornell* is at times kindly, at times caustic, and always illuminating.

This thesis addresses the evolving field of measurement science, specifically that of mass spectrometry (MS) and ion mobility spectrometry (IMS) based techniques. It focuses on the design, construction and implementation of low-cost, easy-to-manufacture measurement tools that are used in modern settings such as airport security screening. Advances in these technologies often involve minimal performance enhancement at ever-increasing cost, which in turn limits accessibility to versatile measurement tools. This problem is addressed using desktop 3D printers along with widely available materials for the production of novel ion lenses and an IMS instrument with a performance comparable to that of many commercial systems. Baird's findings are a source of inspiration for scientists exploring this emerging field./div

Author Joseph D. Harrington has written an informative and insightful history of the Nisei (Second-generation Japanese Americans), working for the U.S. armed forces in the Pacific during World War II. This is no whitewashed narrative, as it exposes U.S. internment camps, prejudices, and the frustrations of patriotic Japanese-Americans who wanted to fight for their country, but were initially rebuffed. As the book relates, not all Nisei were in favor of fighting, and even those that did encountered another kind of prejudice at first, from Hawaiian-born Nisei who more than occasionally felt that continental Japanese-Americans just didn't measure up, linguistically-speaking. Like other children of immigrants, the Nisei were, to a large extent, caught between Japanese tradition and U.S. culture. The concept of honor, an essential element in Japanese-American family life, ended up serving U.S. military interests well. The author has done an outstanding job of uncovering names and telling little-known stories. Especially fascinating are the ones that describe the analytical acumen of Nisei translators.

The true story of the American West on film, through its shooting stars and the directors who shot them Howard Hughes explores the Western, running from John Ford's "Stagecoach" to the revisionary "Tombstone". Writing with panache and fresh insight, he explores 27 key films, and draws on production notes, cast and crew biographies, and the films' box-office success, to reveal their place in western history. He shows how through reinvention and resurrection, this genre continually postpones the big adios and avoids ending up in Boot Hill permanently. Major films covered include the best from genre giants John Ford, Howard Hawks and John Wayne, plus classics "High Noon", "Shane", "The Magnificent Seven" and "Butch Cassidy and the Sundance Kid". "Stagecoach to Tombstone" makes many more stops along the way, examining well-known blockbusters and lowly B-movie oaters alike. It examines comedy westerns, adventures 'south of the border', singing cowboys and the varied depiction of Native Americans on screen. Hughes also engagingly charts the genre's timely renovation by Sam Peckinpah ("Ride the High Country" and "The Wild Bunch"), Sergio Leone ("Once Upon a Time in the West") and Clint Eastwood ("The Outlaw Josey Wales" and "Unforgiven"). Presented too are the best of western trivia, a filmography of essential films - and ten aficionados and critics, including Alex Cox, Christopher Frayling, Philip French and Ed Buscombe, give their verdict on the best in the west.

They enslaved humanity three thousand years ago. Tall, strong, perfect, superhuman and near immortal they rule from their glittering palaces in the eternal city in the centre of the world. They are called Those Above by their subjects. They enforce their will with fire and sword. Twenty five years ago mankind mustered an army and rose up against them, only to be slaughtered in a terrible battle. Hope died that day, but hatred survived. Whispers of another revolt are beginning to stir in the hearts of the oppressed: a woman, widowed in the war, who has dedicated her life to revenge; the general, the only man to ever defeat one of Those Above in single combat, summoned forth to raise a new legion; and a boy killer who rises from the gutter to lead an uprising in the capital. Those Above is the first of an extraordinary new fantasy epic by the author of the acclaimed Low Town series that will sweep the reader into a wholly alien, wholly recognizable world of rebellion and revenge, of love and of death, of intrigue and pitiless war.

Burleigh, the Story of a Pottery narrates the history of Staffordshire earthenware manufacturers Burgess, Dorling & Leigh Ltd, recounting the efforts made by the family firm to develop and sustain a successful business through the variable trading conditions of Britain's ceramics industry. The company's roots stretch back to 1862 when, as Burgess & Leigh, they

took over a small pottery manufactory, established in 1851, in Burslem, 'mother town' of the Potteries. The company's earliest products were chiefly domestic table- and toilet wares, decorated with popular underglaze blue transfer printed patterns, such as Asiatic Pheasant. A successful export trade led to the building in 1888 of the Middleport Pottery, described as 'the model pottery of Staffordshire'. In 1903, under the dynamic leadership of Edmund Leigh, the company launched the global brand name by which the company's products are still known today, Burleigh Ware. Unhappily, the recessions affecting Staffordshire's ceramic industry during the 1990s led to the five-generation family firm of Burgess & Leigh going into receivership and for a time the future of the Middleport Pottery was under threat. Fortunately, William and Rosemary Dorling, owners of The China Box Company, were able to rescue the business. Now operating as Burgess, Dorling & Leigh Ltd, the company enters a new and exciting phase of its life in the twenty-first century. It is committed to restoring and preserving not only the Grade II listed Victorian Middleport Pottery, but also the traditional skills of English pottery manufacture which earned Burgess & Leigh its worldwide reputation.
