Fixing Law Schools

In an ideal world, the laws of Congress--known as federal statutes--would always be clearly worded and easily understood by the judges tasked with interpreting them. But many laws feature ambiguous or even contradictory wording. How, then, should judges divine their meaning? Should they stick only to the text? To what degree, if any, should they consult aids beyond the statutes themselves? Are the purposes of lawmakers in writing law relevant? Some judges, such as Supreme Court Justice Antonin Scalia, believe courts should look to the language of the statute and virtually nothing else. Chief Judge Robert A. Katzmann of the U.S. Court of Appeals for the Second Circuit respectfully disagrees. In *Judging Statutes*, Katzmann, who is a trained political scientist as well as a judge, argues that our constitutional system charges Congress with enacting laws; therefore, how Congress makes its purposes known through both the laws themselves and reliable accompanying materials should be respected. He looks at how the American government works, including how laws come to be and how various agencies construe legislation. He then explains the judicial process of interpreting and applying these laws through the demonstration of two interpretative approaches, purposivism (focusing on the purpose of a law) and textualism (focusing solely on the text of the written law). Katzmann draws from his experience to show how this process plays out in the real world, and concludes with some suggestions to promote understanding between the courts and Congress. When courts interpret the laws of Congress, they should be mindful of how Congress actually functions, how lawmakers signal the meaning of statutes, and what those legislators expect of courts construing their laws. The legislative record behind a law is in truth part of its foundation, and therefore merits consideration.

The Case against Education

The former special assistant for legislative affairs to President Clinton, president of the American Constitution Society, and author of the "damn fine" (Elle) Under the Bus shows how the left can undo the right's damage and take the country back. Despite representing the beliefs of a minority of the American public on many issues, conservatives are in power not just in Washington, DC, but also in state capitals and courtrooms across the country. They got there because, while progressives fought to death over the nuances of policy and to bring attention to specific issues, conservatives focused on simply gaining power by gaming our democracy. They understood that policy follows power, not the other way around. Now, in a sensational new book, Caroline Fredrickson—who has had a front-row seat on the political drama in DC for decades while working to shape progressive policies as special assistant for legislative affairs to President Clinton, chief of staff to Senator Maria Cantwell, deputy chief of staff to Senator Tom Daschle, and president of the American Constitution Society—argues that it's time for progressives to focus on winning. She shows us how we can learn from the right by having the determination to focus on judicial elections, state power, and voter laws without stooping to their dishonest, rule-breaking tactics. We must be ruthless in thinking through how work to change the rules of the game to regain power, expand the franchise, end voter suppression, win judicial elections, and fight for transparency and fairness in our political system, and Fredrickson shows us how.

The General Theory of Employment, Interest, and Money, written by legendary author John Maynard Keynes is widely considered to be one of the top 100 greatest books of all time. This masterpiece was published right after the Great Depression.

It sought to bring about a revolution, commonly referred to as the 'Keynesian Revolution', in the way economists thought—especially challenging the proposition that a market economy tends naturally to restore itself to full employment on its own. Regarded widely as the cornerstone of Keynesian thought, this book challenged the established classical economics and introduced new concepts. 'The General Theory of Employment, Interest, and Money' transformed economics and changed the face of modern macroeconomics. Keynes' argument is based on the idea that the level of employment is not determined by the price of labour, but by the spending of money. It gave way to an entirely new approach where employment, inflation and the market economy are concerned.

Kingdom Thoughts

Journalist Walls grew up with parents whose ideals and stubborn nonconformity were their curse and their salvation. Rex and Rose Mary and their four children lived like nomads, moving among Southwest desert towns, camping in the mountains. Rex was a charismatic, brilliant man who, when sober, captured his children's imagination, teaching them how to embrace life fearlessly. Rose Mary painted and wrote and couldn't stand the responsibility of providing for her family. When the money ran out, the Walls retreated to the dismal West Virginia mining town Rex had tried to escape. As the dysfunction escalated, the children had to fend for themselves, supporting one another as they found the resources and will to leave home. Yet Walls describes her parents with deep affection in this tale of unconditional love in a family that, despite its profound flaws, gave her the fiery determination to carve out a successful life. -- From publisher description.

A Wrinkle in Time is the winner of the 1963 Newbery Medal. It was a dark and stormy night—Meg Murry, her small brother Charles Wallace, and her mother had come down to the kitchen for a midnight snack when they were upset by the arrival of a most disturbing stranger. "Wild nights are my glory," the unearthly stranger told them. "I just got caught in a downdraft and blown off course. Let me sit down for a moment, and then I'll be on my way. Speaking of ways, by the way, there is such a thing as a tesseract." A tesseract (in case the reader doesn't know)

is a wrinkle in time. To tell more would rob the reader of the enjoyment of Miss L'Engle's unusual book. *A Wrinkle in Time*, winner of the Newbery Medal in 1963, is the story of the adventures in space and time of Meg, Charles Wallace, and Calvin O'Keefe (athlete, student, and one of the most popular boys in high school). They are in search of Meg's father, a scientist who disappeared while engaged in secret work for the government on the tesseract problem.

Dare to Repair

Why we need to stop wasting public funds on education Despite being immensely popular—and immensely lucrative—education is grossly overrated. Now with a new afterword by Bryan Caplan, this explosive book argues that the primary function of education is not to enhance students' skills but to signal the qualities of a good employee. Learn why students hunt for easy As only to forget most of what they learn after the final exam, why decades of growing access to education have not resulted in better jobs for average workers, how employers reward workers for costly schooling they rarely ever use, and why cutting education spending is the best remedy. Romantic notions about education being "good for the soul" must yield to careful research and common sense—*The Case against Education* points the way.

Your Financial Revolution

An urgent plea for much needed reforms to legal education The period from 2008 to 2018 was a lost decade for American law schools. Employment results were terrible. Applications and enrollment cratered. Revenue dropped precipitously and several law schools closed. Almost all law schools shrank in terms of students, faculty, and staff. A handful of schools even closed. Despite these dismal results, law school tuition outran inflation and student indebtedness exploded, creating a truly toxic brew of higher costs for worse results. The election of Donald Trump in 2016 and the subsequent role of hero-lawyers in the "resistance" has made law school relevant again and applications have increased. However, despite the strong early returns, we still have no idea whether law schools are out of the woods or not. If the Trump Bump is temporary or does not result in steady enrollment increases, more schools will close. But if it does last, we face another danger. We tend to hope that crises bring about a process of creative destruction, where a downturn causes some businesses to fail and other businesses to adapt. And some of the reforms needed at law schools are obvious: tuition fees need to come down, teaching practices need to change, there should be greater regulations on law schools that fail to deliver on employment and bar passage. Ironically, the opposite has happened for law schools: they suffered a harrowing, near-death experience and the survivors look like they're going to exhale gratefully and then go back to doing exactly what led them into the crisis in the first place. The urgency of this book is to convince law school stakeholders (faculty, students, applicants, graduates, and regulators) not to just return to business as usual if the Trump Bump proves to be permanent. We have come too far, through too much, to just shrug our shoulders and move on.

The Glass Castle

Should we pay children to read books or to get good grades? Should we allow corporations to pay for the right to pollute the atmosphere? Is it ethical to pay people to test risky new drugs or to donate their organs? What about hiring mercenaries to fight our wars? Auctioning admission to elite universities? Selling citizenship to immigrants willing to pay? In *What Money Can't Buy*, Michael J. Sandel takes on one of the biggest ethical questions of our time: Is there something wrong with a world in which everything is for sale? If so, how can we prevent market values from reaching into spheres of life where they don't belong? What are the moral limits of markets? In recent decades, market values have crowded out nonmarket norms in almost every aspect of life—medicine, education, government, law, art, sports, even family life and personal relations. Without quite realizing it, Sandel argues, we have drifted from having a market economy to being a market society. Is this where we want to be? In his *New York Times* bestseller *Justice*, Sandel showed himself to be a master at illuminating, with clarity and verve, the hard moral questions we confront in our everyday lives. Now, in *What Money Can't Buy*, he provokes an essential discussion that we, in our market-driven age, need to have: What is the proper role of markets in a democratic society—and how can we protect the moral and civic goods that markets don't honor and that money can't buy?
