### The Hertfordshire Yeomanry Regiments, Royal Artillery

The Austronesian-speaking population of the world are estimated to number more than 270 million people, living in a broad swathe around half the globe, from Madagascar to Easter Island and from Taiwan to New Zealand. The seventeen papers in this volume provide a general survey of these diverse populations focusing on their common origins and historical transformations. The papers examine current ideas on the linguistics, prehistory, anthropology and recorded history of the Austronesians.

The next century will see more than half of the world's 6,000 languages become extinct, and most of these will disappear without being adequately recorded. Written by one of the leading figures in language documentation, this fascinating book explores what humanity stands to lose as a result. Explores the unique philosophy, knowledge, and cultural assumptions of languages, and their impact on our collective intellectual heritage Questions why such linguistic diversity exists in the first place, and how can we can best respond to the challenge of recording and documenting these fragile oral traditions while they are still with us Written by one of the leading figures in language documentation, and draws on a wealth of vivid examples from his own field experience Brings conceptual issues vividly to life by weaving in portraits of individual 'last speakers' and anecdotes about linguists and their discoveries

Jakarta based Andreas Harsono is one of the most knowledgeable, experienced, high-profile and courageous of reporters and commentators on contemporary Indonesian society. Race, Islam and Power: Ethnic and Religious Violence in Post-Suharto Indonesia is the result of Harsono's fifteen year project to document how, in post-Suharto Indonesia, race and religion have come to be increasingly prevalent within the nation's politics. From its westernmost island of Sabang to its easternmost city of Merauke in West Papua, from Miangas Island in the north, near the Philippines border, to Ndana Island, close to the coast of Australia, Harsono reveals the particular cultural identities and localised political dynamics of this internally complex and riven nation. This informed personal travelogue is essential reading for Indonesia watchers and anyone seeking a better understanding of contemporary Indonesia. A passionate seeker of human rights protections, civil liberties, democracy, media freedom, multiculturalism and environmental protection, Harsono reminds us that Indonesians 'still have not found the light at the end of the tunnel'.

Twice a princess, twice exiled, Neslishah Sultan had an eventful life. When she was born in Istanbul in 1921, cannons were fired in the four corners of the Ottoman Empire, commemorative coins were issued in her name, and her birth was recorded in the official register of the palace. After all, she was an imperial princess and the granddaughter of Sultan Vahiddedin. But she was the last member of the imperial family to be accorded such honors: in 1922 Vahiddedin was deposed and exiled, replaced as caliph--but not as sultan--by his brother (and Neslishah's other grandfather) Abdülmecid; in 1924 Abdülmecid was also removed from office, and the entire imperial family, including three-year-old Neslishah, was sent into exile. Sixteen years later on her marriage to Prince Abdel Moneim, the son of the last khedive of Egypt, she became a princess of the Egyptian royal family. And when in 1952 her husband was appointed regent for Egypt's infant king, she took her place at the peak of Egyptian society as the country's first lady, until the abolition of the monarchy the following year. Exile followed once more, this time from Egypt, after the royal couple faced charges of treason. Eventually Neslishah was allowed to return to the city of her birth, where she died at the age of 91 in 2012. Based on original documents and extensive personal interviews, this account of one woman's extraordinary life is also the story of the end of two powerful dynasties thirty years apart.

The distance between natural foods and what the average American family puts on their dinner table grows wider every year. In *Foodture We Trust*, the author explores the role that politics and profit play in over-processing all nutritional value out of foods, turning the Creator's abundant, widely varied gift into an indigestible sludge that only marginally resembles the original design. Learn the history of the genetic engineering of food; misappropriation of scientific studies to support the profits of big business; the effort to convince the American public it needs drugs created for diseases that never existed before; and legislation aimed at outlawing natural foods, processes, and remedies for the sake of protecting profits. Gain a scientific understanding of the benefits of natural foods, and learn about evidence that the bureaucracy responsible for protecting the health and nutrition of Americans is dedicated to destroying them instead. For thirty years Heinz Gisel traveled the world innovating cutting-edge medical technology and providing doctors with new instruments to treat illness. As the CEO of medical laser companies, he learned that funding disease fighting technology was difficult, but not for devices used in elective procedures, plastic surgery, aesthetic treatments and vision correction. He observed that many people seeking such treatments would be better served rejuvenating from the cellular level, starting with nutrition. But most people had either forgotten how to balance their diet with lifestyle, or they didn't know to begin with. The author invested years into nutrition research and technology development for analyzing disease susceptibility of presumed healthy people. After opening clinics in various countries, it surfaced that many clients who thought to be healthy were at the brink of a major health challenge, which they could forestall by simple lifestyle modifications and by making conscientious food choices.

## **Dashing Through the Snow**

This book investigates why women choose 'birth outside the system' and makes connections between women's right to

choose where they birth and violations of human rights within maternity care systems. Choosing to birth at home can force women out of mainstream maternity care, despite research supporting the safety of this option for low-risk women attended by midwives. When homebirth is not supported as a birthplace option, women will defy mainstream medical advice, and if a midwife is not available, choose either an unregulated careprovider or birth without assistance. This book examines the circumstances and drivers behind why women nevertheless choose homebirth by bringing legal and ethical perspectives together with the latest research on high-risk homebirth (breech and twin births), freebirth, birth with unregulated careproviders and the oppression of midwives who support unorthodox choices. Stories from women who have pursued alternatives in Australia, Europe, Russia, the UK, the US, Canada, the Middle East and India are woven through the research. Insight and practical strategies are shared by doctors, midwives, lawyers, anthropologists, sociologists and psychologists on how to manage the tension between professional obligations and women's right to bodily autonomy. This book, the first of its kind, is an important contribution to considerations of place of birth and human rights in childbirth.

The Languages and Linguistics of the New Guinea Area: A Comprehensive Guide is part of the multi-volume reference work on the languages and linguistics of all major regions of the world. The island of New Guinea and its offshore islands is arguably the most diverse and least documented linguistic hotspot in the world - home to over 1300 languages, almost one fifth of all living languages, in more than 40 separate families, along with numerous isolates. Traditionally one of the least understood linguistic regions, ongoing research allows for the first time a comprehensive guide. Given the vastness of the region and limited previous overviews, this volume focuses on an account of the families and major languages of each area within the region, including brief grammatical descriptions of many of the languages. The volume also includes a typological overview of Papuan languages, and a chapter on Austronesian-Papuan contact. It will make accessible current knowledge on this complex region, and will be the standard reference on the region. It is aimed at typologists, endangered language specialists, graduate and advanced undergraduate students, and all those interested in linguistic diversity and understanding this least known linguistic region.

About The Book: The Engineering Chemistry course for undergraduate students is designed to strengthen the fundamentals of chemistry and then build an interface of theoretical concepts with their industrial/engineering

applications. This book is structured keeping in view the objective of the course and is intended as a textbook for first year B.Tech/B.E. students of all engineering disciplines. The book aims to impart in-depth knowledge of the subject and highlight the role of chemistry in the field of engineering. The lucid explanation of the topics will help students understand the fundamental concepts and apply them to design engineering materials and solve problems related to them. An attempt has been made to logically correlate the topic with its application. The extension of fundamentals of electrochemistry to energy storage devices such as commercial batteries and fuel cells is one such example. The layout for a topic is designed after detailed study and analysis of the syllabi of various technical universities. The chapter for each topic begins with clearly defined learning objectives, followed by introduction of subtopics, their precise and adequate explanation supported with ample illustrations and diagrams. Solved examples are given at the end of relevant subtopics to strengthen the concepts. The chapters conclude with a set of review and practice questions.

NEW YORK TIMES BESTSELLER Now in paperback—Peggy Orenstein, author of the groundbreaking New York Times bestseller *Girls & Sex*, turns her focus to the sexual lives of young men. “Eye-opening.... Every few pages, the boy world cracks open a little bit.... Even in the most anxiety-provoking moments of *Boys & Sex*, it’s clear that Orenstein believes in the goodness of boys and the men they can become, and she believes in us, as parents, to raise them” (New York Times Book Review). Peggy Orenstein’s *Girls & Sex* broke ground, shattered taboos, and launched conversations about young women’s right to pleasure and agency in sexual encounters. It also had an unexpected effect on its author: Orenstein realized that talking about girls is only half the conversation. Boys are subject to the same cultural forces as girls—steeped in the same distorted media images and binary stereotypes of female sexiness and toxic masculinity—which equally affect how they navigate sexual and emotional relationships. In *Boys & Sex*, Peggy Orenstein dives back into the lives of young people to once again give voice to the unspoken, revealing how young men understand and negotiate the new rules of physical and emotional intimacy. Drawing on comprehensive interviews with young men, psychologists, academics, and experts in the field, *Boys & Sex* dissects so-called locker room talk; how the word “hilarious” robs boys of empathy; pornography as the new sex education; boys’ understanding of hookup culture and consent; and their experience as both victims and perpetrators of sexual violence. By surfacing young men’s experience in all its complexity, Orenstein is able to unravel the hidden truths, hard lessons, and important realities of young male sexuality in today’s world. The result is a provocative and paradigm-shifting work that offers a much-needed vision of how boys can truly move forward as better men.

This paper looks at the Aceh conflict since 1976 and more specifically the insurgent Free Aceh Movement??GAM. It aims to provide a detailed ideological and organizational ?map? of this organization in order to increase the understanding of its history, motivations, and organizational dynamics. Consequently this paper analyzes GAM?s ideology, aims, internal structure, recruitment, financing, weapons procurement, and its military capacity. The focus of this study is on the recent past, as the fall of Suharto not only allowed the Indonesia government to explore avenues other than force to resolve the Aceh conflict, but also provided GAM with the opportunity to make some changes to its strategy and to transform itself into a genuinely popular movement. It will be argued here that the key to understanding GAM in the post-Suharto era and the movement?s decisions, maneuvers and statements during the three years of intermittent dialogue can be found in the exiled leadership?s strategy of internationalization. This strategy shows that for GAM the negotiations, above all, were not a way to find common ground with Jakarta but a means to compel the international community to pressure the Indonesian government into ceding independence. This is the second publication in Policy Studies, a peer-reviewed East-West Center Washington series that presents scholarly analysis of key contemporary domestic and international political, economic, and strategic issues affecting Asia in a policy relevant manner.
