"Gibbons begins with a strong theoretical underpinning for her practice, drawing on a functional model of language, sociocultural theories of learning, and current research on second-language development. After supporting her view that the regular curriculum offers the best language-learning environment for young ESL students, Gibbons demonstrates the ways in which content areas provide a context for the teaching of English skills, from speaking and listening to reading and

writing. These skills can be integrated in the learning of diverse subjects as Gibbons illustrates with a wide range of teaching and learning activities across the curriculum, supplemented with programming and assessment formats and checklists."--BOOK JACKET.
