In this updated edition, Kathryn Neeb continues to squarely address mental health within the scope of practical/vocational nursing, emphasizing that LPN/LVNs most commonly care for patients with psychiatric problems in general patient care settings rather than in specialized psychiatric facilities. This targeted approach, along with her accessible, friendly

writing style, meets the legal licensing needs for the role of the LPN/LVN thus making Fundamentals of Mental Health Nursing the leader in the LPN educational market.

The clear, concise, and cutting-edge medical-surgical nursing content in *Medical-Surgical Nursing: Concepts & Practice, 2nd Edition* provides the solid foundation you need to pass the NCLEX Examination and succeed as a new nurse. It builds on the fundamentals of nursing and covers roles, settings, health care trends, all body systems and their disorders, emergency and disaster management, and mental health nursing. Written by noted authors Susan deWit and Candice Kumagai, *Medical-Surgical Nursing* reflects current national LPN/LVN standards with its emphasis on safety as well as complementary and alternative therapies.

### **Medical-Surgical Nursing - E-Book**

An exceptional health resource addressing professional practice issues in complementary and alternative medicine *Clinical Decision Making in Complementary & Alternative Medicine* differs from other medical texts by introducing a systematic clinical framework for the practice of complementary and alternative medicine. While comparable titles may explore the use or efficacy of specific complementary and alternative medicine

interventions, this indispensable textbook highlights evidence-based interventions, while helping practitioners apply them within a clinical decision making framework. Clinical Decision Making in Complementary & Alternative Medicine is a one-of-a-kind health reference for clinicians, students and educators alike. Divided into two parts – theoretical foundation and practical application – the book includes case studies on health conditions such as acne, irritable bowel syndrome and migraine. Clinical Decision Making in Complementary & Alternative Medicine is also unique in that it:

- focuses on evidence-based practice while also paying attention to the underlying philosophy of complementary and alternative medicine
- includes learning objectives and activities to consolidate reader knowledge and help lecturers teaching complementary and alternative medicine students
- enables complementary and alternative medicine practitioners to systematically assess, diagnose, treat and evaluate client-centred health problems in accordance with the established art, science and philosophy of complementary and alternative medicine
- guides practitioner thinking, assessment and care – all of which may help increase professional autonomy and accountability, improve client outcomes and quality of care, and reduce errors in decision making

"[This book] has been honed into an elegant compendium. This outstanding work should be widely read ñ it is perhaps the best example of an integrative approach to gerontology." Score: 94, 4 stars ñ Doody's "Physical Change & Aging has been a well-respected resource for caregivers ever since it was published in 1978. This updated version carries on the tradition of providing valuable information on the aging process and age-related health issues." ñ Former First Lady Mrs. Rosalynn Carter This sixth edition of a classic multidisciplinary text for students of gerontology continues to offer practical, reader-friendly information about the physical changes and common pathologies associated with the aging process. It places special emphasis on the psychological and social implications of these changes in the lives of older adults. The book is distinguished by its thorough focus on anatomy and physiology and common health problems pertaining to each body system. It emphasizes the positive

aspects of aging and demonstrates how the elderly population can gain greater personal control, through lifestyle changes and preventive health strategies, toward the goal of optimal aging. This sixth edition has been thoroughly updated to present new research findings that differentiate "normal" aging from actual pathology and includes substantially updated information on diagnosis and treatment. It incorporates new data from healthy older adults demonstrating that the aging process is not necessarily as devastating as earlier research had indicated. The book provides new data and guidelines on risk factors, nutrition, preventive measures, interventions, and commonly prescribed medications, and includes expanded treatment of complementary and alternative therapies. Also included is an updated discussion of grief, ethical issues, and funeral options. The book reinforces information with practical applications of aging data. Written for students of gerontology, social work, human services, nursing, medicine, occupational and physical therapy, counseling, and elder law, it presents information that is clearly understandable for those without an extensive background in biology or medicine. Additionally, the book is a useful practitioner's guide and an easily understandable book for family caregivers. THIS SIXTH EDITION INCLUDES NEW INFORMATION ON: Diagnosis and treatment Behaviors and interventions that promote more control over an individual's aging process Genetic/DNA theories Dementia and Parkinson's disease Immunotherapy Lifelong health disparities Animal-assisted therapy Prayer and meditation Pharmacogenetics Geragogy (self-directed learning) Caregiver health as a public

health issue Natural funerals (biodegradable caskets, burial urns, dying at home)
