Her family was so isolated from mainstream society that there was no one to ensure the children received an education, and no one to intervene when one of Tara's older brothers became violent. When another brother got himself into college, Tara decided to try a new kind of life. Her quest for knowledge transformed her, taking her over oceans and across continents, to Harvard and to Cambridge University. Only then would she wonder if she'd traveled too far, if there was still a way home. "Beautiful and propulsive . . . wide range of historical sites all within a day's drive of San Francisco. This book may also be useful for a teacher or parent who is looking for an educational field trip which ties in with the child's curriculum in a history, literature, or science class. Others may find it interesting to learn more about the Native Americans or pioneer settlers in a local community. So, whether you are just curious about what is inside that old historical house in your neighborhood, want to know how a specific historical event played out in your area, or are just looking for an interesting day trip, this book has something for you. Many people are familiar with the more famous sites in California. It is not uncommon to see tourists make a trip to see all of the California missions or Gold Rush towns, but there are also scores of lesser-known sites within the Bay Area that highlight a particular historical event or offer a comprehensive overview of the history of that town or region. More than just a tour guide, the book is broken into sections with essays that acquaint the reader with the history that is covered by the representative museums or sites. DiGiacomo goes beyond the traditional city, county, state, and national museums and historic sites that feature famous people, historic homes and events. He also covers museums devoted to agriculture, business, Hispanic California, immigration, military posts, mining, Native Americans, transportation, sports, as well as science and technology. He thoughtfully includes key information on each museum such as its location, web address, hours of operation, cost, and what a visitor can expect to encounter. Over 220 historical sites are listed.

now stands, many students spend great portions of their lives feeling inferior if they struggle, invisible if they already know the material, problematic if they're not a child of the dominant culture, and perverse if they question the school agenda. This book explores how school leaders can develop responsive, personalized, and differentiated classrooms.

Differentiation is simply a teacher attending to the learning needs of a particular student or small group of students, rather than teaching a class as though all individuals in it were basically alike. Expert educators teach individuals the most important things in the most effective ways. No single approach works with all students. Classrooms function best when teachers and students join to develop multiple avenues to learning. Until every student is growing and successful, our own growth is unfinished. The authors show how school leaders can encourage and support growth in our classrooms.
