The Coming of Age of the Profession

This literacy programme for juniors offers fiction, poetry and non-fiction reading and writing materials for shared, guided and group reading and writing, and teaching materials. Comets should capture the imagination of more able pupils, and software integrates ICT with literacy teaching.

In the Age of Distraction

The information age bombards us with data from so many souces and media outlets that we find it difficult to maintain control over what we want or what we need to think about. Urgo alerts us to the contours of such technological imprisonment. He argues against allowing ourselves to be controlled by the tools we have created, and, with thought-provoking analysis, urges that we assume positions of power over those things that demand our attention.

Essentials of Planning, Selecting, and Tailoring Interventions for Unique Learners

A Resource for Designing and Implementing Intervention Programs for At-Risk Learners This authoritative resource provides step-by-step procedures for planning, selecting, and tailoring interventions for at-risk learners with a unique focus on how to individualize interventions using actual case examples. In addition, this volume offers guidelines for gathering and interpreting data in a manner that assists in identifying targets for intervention and rich discussion and information relating to specific academic, cognitive, and behavioral manifestations of students with learning difficulties in reading, math, writing, and oral language. Practitioners will also recognize and learn how to intervene with students from underserved and mis-served populations who are at risk for learning failure including English-language learners and students from impoverished environments. Each chapter describes how specific difficulties interfere with classroom tasks and explain how to select, modify, or otherwise tailor an intervention based on that information. As with all volumes in the Essentials of Psychological Assessment series, this volume includes callout boxes highlighting key concepts, extensive illustrative material, and test questions. The companion CD-ROM provides additional worksheets, case studies, and handouts.

This new early literacy textbook (birth through age nine) focuses on creative literacy instruction through active participation of teachers, parents, and children -- providing preservice teachers with practical strategies and activities that can be adapted to meet the needs of diverse learners. It offers a comprehensive view of literacy development and instruction, including assessment, phonemic awareness, and emergent literacy, phonics, vocabulary, reading, writing, and arts integration

in diverse classrooms. The authors' holistic approach explains why and how reading and language arts should be taught from the perspective of the whole child, with an emphasis on creativity in a nurturing learning environment. Their unique perspective integrates the arts, educational psychology, and literacy instruction, represented throughout the text by the incorporation of the cognitive, socio-emotional, and physical parts of the self into a visual Holistic Model of Literacy. A Guided Reader to Early Years and Primary English draws on extracts from the published work of some of the most influential education writers to provide insight, guidance and clarity about key issues affecting early years practitioners and

primary English teachers. The book brings together key extracts from classic and contemporary writing and contextualises these in both theoretical and practical terms. The extracts are accompanied by a summary of the key ideas and issues raised, questions to promote discussion and reflective practice, and annotated further reading lists to extend thinking. Taking a thematic approach and including a short introduction to each theme, the chapters cover: Models of and approaches to early years and primary English; Speaking and listening in English lessons: story-telling, drama, 'booktalk' and debate; Reading and responding to texts in English lessons; Writing in English lessons: finding a 'voice'; Knowledge about language: grammar, spelling, punctuation and handwriting; The rich landscape of children's literature; Non-fiction in English lessons; Planning, assessing and recording children's progress: the learning cycle. Aimed at trainee and newly qualified teachers, those working towards Masters level qualifications and all those involved in the teaching of early years and primary English, this accessible, but critically provocative text will be an essential resource for those that wish to deepen their understanding of early years and primary English education.

Literacy World: Comets - Stage 4 Comprehension and Writing Pack

Mockery in Spanish Golden Age Literature takes a ground-breaking look at

seriousness and comicality by investigating burlesque mockery in a variety of 'high' and 'low' style genres produced by major writers like Miguel de Cervantes, Luis de G'ongora, Francisco de Quevedo and Salas Barbadillo during the Spanish Baroque. Examination of the foundations of burlesque mockery in sonnets, romances, theatrical interludes and Don Quixote opens ways of solving problems concerning burlesque laughter. This systematic investigation of burlesque mockery in the Spanish Golden Age addresses certain theoretical and historical issues of evaluation by presenting practical expositions of representative examples of the burlesque mode thereby exposing both burlesque mockery and the controversy that surrounds it.

"Over the past several years, a series of extraordinary cutting edge developments have taken place in Golden Age Spanish studies. Important new issues have been addressed--and conceived--in innovative ways: questions of gender and sexuality; concepts of self and other; political and social contexts of literary production and reception. While these investigations have already begun to have a significant impact on our current reconceptualization of culture in general and Spanish culture in particular, they have until now been somewhat overly dispersed, even fragmented--in large part because of their very nature as rethinkings, as experimental. The present volume constitutes a collective examination of these kinds of key cultural issues within the historically specific context of Golden Age Spain, configured around the central question of authority."--Marina S. Brownlee, from the Preface. In a wide-ranging series of essays, the contributors to this volume bring recent critical and theoretical perspectives to bear on our understanding of culture in Golden Age Spain, focusing on the related notions of authority, authorship, selfhood, and tradition in Spanish culture. This book will appeal to Hispanists and comparatists interested in contemporary perspectives on the literature and culture of medieval and Renaissance Spain as well as to medievalists and Renaissance specialists interested in Spanish literature. Contributors: La Schwartz Lerner, Jos Regueiro, Edward H. Friedman, Mary Malcolm Gaylord, Marina S. Brownlee, Paul Julian Smith, Harry Sieber, Robert ter Horst, Ruth

El Saffar, Anthony J. Cascardi, Diana de Armas Wilson, Walter Cohen, Joan Ramn Resina, Hans Ulrich Gumbrecht.

Coming of Age

Techniques and theory for processing otoliths from tropical marine fish have developed only recently due to an historic misconception that these organisms

could not be aged. Otoliths are the most commonly used structures from which daily, seasonal or annual records of a fish's environmental history are inferred, and are also used as indicators of migration patterns, home range, spatial distribution, stock structure and life history events. A large proportion of projects undertaken on tropical marine organisms involve removal and processing of calcified structures such as otoliths, statoliths or vertebrae to retrieve biological, biochemical or genetic information. Current techniques and principles have evolved rapidly and are under constant modification and these differ among laboratories, and more particularly among species and within life history stages. Tropical fish otoliths: Information for assessment, management and ecology is a comprehensive description of the current status of knowledge about otoliths in the tropics. This book has contributions from leading experts in the field, encompassing a tropical perspective on daily and annual ageing in fish and invertebrates, microchemistry, interpreting otolith microstructure and using it to back-calculate life history events, and includes a treatise on the significance of validating periodicity in otoliths.

Creative Literacy in Action: Birth through Age Nine

The book is designed to enable students to become intelligent consumers of educational research in order to help create effective and accountable learning environments. Written in a very clear and user-friendly style, this text focuses on understanding the intent of the researcher, the procedures, and the results so that students can use appropriate research findings to inform school change. This text emphasizes how responses to the accountability movement in schools can be focused around using and understanding scientific inquiry. It balances quantitative and qualitative research methodology and discusses action research and mixed methods in detail. Principles for conducting research and criteria for evaluating its overall credibility are presented in a concise manner. Students are shown how to analyze and evaluate research, and judge the usefulness of the findings for educational practice. In addition, students are shown how this knowledge can translate to their own classrooms.

Part book, part CD-ROM, Coming of Agemarks a new age in curriculum development, offering innovative new ideas for transforming advanced writing courses. Together, these essays describe and offer concrete examples of curriculum that incorporates discipline-based theory and history, that situates writers in public discourse, and that fully prepares students for careers as writers. Because Coming of Ageis intended to instigate direct, immediate curriculum and pedagogical action, it is ideally suited to the book/CD-ROM format that the authors call print-linked publishing. The theoretical framework is presented in the solid, stable medium of print. Part I proposes the move from "advanced composition" to "advanced writing," and along with Part II, argues for what the undergraduate writing curriculum should accomplish. The generative course descriptions and program recommendations are presented in the interactive medium of a CD-ROM. Here you'll find Parts III and IV, which explain and demonstrate how to accomplish

these goals, discuss ways to implement such curriculum, and provide concrete suggestions from a variety of campuses that have done so. The CD-ROM also features a full list of course descriptions for each selection. All of the electronic material can be downloaded as you compose your own curriculum and course proposals.
