Hard Labor

This book informs readers of the needs and rationale for the integration of medical and dental care and information with an international perspective as to how and where medical and dental care separated into specific domains. It provide high level guidance on issues involved with care and data integration and how to achieve an integrated model of health care supported by integrated HIT. A patient typically expects that a visit to a dentist can usually be resolved immediately. This expectation places a premium on instant, accurate, thorough, and current information. The state-of-the-art of fully integrated (dental-medical) electronic health record (EHR) is covered and this is contrasted with the current state of dental-medical software. While dentists in the US Veterans Health Administration (VHA), the US Indian Health Service (IHS), or the US military, for example, have access to fully integrated health records, most US clinicians still gather information from separate sources via fax or phone calls. The authors provide an in-depth discussion of the role of informatics and information science in the articulation of medical and dental practices and clinical data with the focus on applied clinical informatics to improve quality of care, practice efficiency, coordination and continuity of care, communication between physicians and dentists and to provide a more comprehensive care for the patients. Lastly, the book examines advances in medical and dental research and how these may affect dentistry in the future. Most new advances in healthcare research are information-intensive.

The CRPG Book: A Guide to Computer Role-Playing Games

In recent years, great attention has been paid to polyphenols due to their positive effects on health. One of the most widely-studied phenolic compounds is resveratrol. This molecule, which is naturally present in some foods, shows beneficial effects on various physiological and biochemical processes, thus

representing a potential tool for the prevention or the treatment of diseases highly prevalent in our society. Several of these beneficial effects have been observed in human beings, but others only in pre-clinical studies so far, and therefore, it is mandatory to continue with the scientific research in this field. Indeed, new knowledge concerning these issues could enable the development of novel functional foods or nutraceuticals, incorporating resveratrol, suitable for preventing or treating diseases such as cancer, cardiovascular diseases, obesity, dislipemia, insulin resistance and diabetes, liver diseases, etc.

The Lights and Shadows of Freemasonry

Prepare yourself: How things are made is changing. The digital and physical are uniting, from innovative methods to sense and understand our world to machines that learn and design in ways no human ever could; from 3D printing to materials with properties that literally stretch possibility; from objects that evolve to systems that police themselves. The results will radically change our world--and ourselves. The Future of Making illustrates these transformations, showcasing stories and images of people and ideas at the forefront of this radical wave of innovation. Designers, architects, builders, thought leaders--creators of all kinds--have contributed to this look at the materials, connections, and inventions that will define tomorrow. But this book doesn't just catalog the future; it lays down guidelines to follow, new rules for how things are created, that make it the ultimate handbook for anyone who wants to embrace the true future of making.

Blueprint for Action provides a framework for understanding the dynamics of organizational change in early care and education settings. It helps administrators move beyond a "quick fix" notion of center improvement by serving as a guide for organizational analysis and action. The book details a comprehensive method for assessing program strengths and areas in need of improvement. The heart of this approach is an individualized model of supervision and staff development. Woven throughout the text are numerous vignettes connecting the concepts to real-life situations experienced by early childhood administrators. The book includes 26 assessment tools and 12 worksheets that directors can adapt for use in their own programs.

"Lorraine Heath's books are always magic." —Cathy Maxwell With Passions of a Wicked Earl, USA Today and New York Times bestseller Lorraine Heath kicks off a new series of delightfully sinful historical romance novels featuring "London's Greatest Lovers." The first romantic adventure involving the titled and rakish sons of a scandalous Dowager Duchess and their tales of passion, pleasure, and love, Passions of a Wicked Earl concerns the innocent and unfairly disgraced young wife of the first brother and her brazen attempts to win back the dashing rogue's heart...by any means necessary!

Closing the Gap

This book provides an in-depth exploration of the field of augmented reality (AR) in its entirety and sets out to distinguish AR from other inter-related technologies like virtual reality (VR) and mixed reality (MR). The author presents AR from its initial philosophies and early developments, to its current technologies and its impact on our modern society, to its possible future developments; providing readers with the tools to understand issues relating to defining, building, and using our perception of what is represented in our perceived reality, and ultimately how we assimilate and react to this information. Augmented Reality: Where We Will All Live can be used as a comprehensive guide to the field of AR and provides valuable insights for technologists, marketers, business managers, educators and academics who are interested in the field of augmented reality; its concepts, history, practices and the science behind this rapidly advancing field of research and development.

Artificial Intelligence in Education

This study affords an entirely new view of the nature of modern popular entertainment. American vaudeville is here regarded as the carefully elaborated ritual serving the different and paradoxical myth of the new urban folk. It demonstrates that the compulsive myth-making faculty in man is not limited to primitive ethnic groups or to serious art, that vaudeville cannot be dismissed as meaningless and irrelevant simply because it fits neither the criteria of formal criticism or the familiar patterns of anthropological study. Using the methods for criticism developed by Susanne K. Langer and others, the author evaluates

American vaudeville as a symbolic manifestation of basic values shared by the American people during the period 1885-1930. By examining vaudeville as folk ritual, the book reveals the unconscious symbolism basic to vaudeville-in its humor, magic, animal acts, music, and playlets, and also in the performers and the managers -- which gave form to the dominant American myth of success. This striking view of the new mass man as a folk and of his mythology rooted in the very empirical science devoted to dispelling myth has implications for the serious study of all forms of mass entertainment in America. The book is illustrated with a number of striking photographs.

Pathways to Well-Being

This reference work will serve as a convenient, state-of-the-art and comprehensive resource on the pathogenesis, diagnosis, and treatment of glomerular diseases. Clinical approaches, modalities and challenges are provided, along with new developments since the publication of Kidney Disease Improving Global Outcomes (KDIGO): Glomerulonephritis. Chapters dedicated to glomerular diseases will mirror the current classification schemes used by Nephrologists and Pathologists and will include definition and natural history, epidemiology, clinical manifestations, pathology, diagnosis, differential diagnosis, treatment (algorithms when appropriate), prognosis and future prospects and current direction of research. Contributing authors will consist of internationally renowned glomerulonephritis experts, renal pathologists and clinical nephrologists who are engaged in the management of glomerular diseases in clinical pediatric and internal medicine practices. Glomerulonephritis will fill a considerable knowledge gap for general nephrologists, providers involved with the care of patients with glomerular diseases, and researchers. It should also be of value to medical students, interns, residents and fellows, as well as all clinicians engaged in medical education.

This practical guide provides a focus on the implementation of healthcare simulation operations, as well as the type of professional staff required for developing effective programs in this field. Though there is no single avenue in which a person pursues the career of a healthcare simulation technology specialist (HSTS), this book outlines the extensive knowledge and variety of skills one must cultivate to be effective in this role. This book begins with an introduction to healthcare simulation, including personnel, curriculum, and physical space. Subsequent chapters address eight knowledge/skill domains core to the essential aspects of an HSTS. To conclude, best practices and innovations are provided, and the benefits of developing a collaborative relationship with industry stakeholders are discussed. Expertly written text throughout the book is supplemented with dozens of high-quality color illustrations, photographs, and tables. Written and edited by leaders in the field, *Comprehensive Healthcare Simulation: Operations, Technology, and Innovative Practice* is optimized for a variety of learners, including healthcare educators, simulation directors, as well as those looking to pursue a career in simulation operations as healthcare simulation technology specialists.

Passions of a Wicked Earl

This book focuses on solar energy and its applications in Iraq and its neighboring countries. Iraq suffers from electricity shortages and faces many challenges to meet and overcome current and future increases in electrical demand. Although Iraq relies primarily on petroleum as an energy source, many scientists agree that the future of energy efficiency and safety will rely heavily on the implementation of green and renewable energies. This book is aimed at researchers, policymakers, and students and discusses how PV systems can be successfully implemented in order to reduce dependency on fossil fuel resources. Contains case studies and

examples to enhance practical application of the technologies presented; Presents actual adopted Iraqi PV projects; Explains the use and application of photovoltaic cells.

Closing the Gap is an ISTE book series designed to reflect the contributions of multiple stakeholders seeking to ensure that digital equity is achieved on campuses, in classrooms, and throughout education. In this series, authors Nicol R. Howard, Sarah Thomas, and Regina Schaffer offer historical and philosophical insights while exploring challenges and solutions unique to teacher preparation programs, pre-service and in-service teachers, and instructional coaches. The first book in the series, Closing the Gap: Digital Equity Strategies for Teacher Prep Programs, includes: a discussion of historical placement of "digital equity" content in teacher education programs; research- and evidence-based vignettes from teacher educators, higher education deans, and department coordinators demonstrating best practices; examples of ISTE Standards in action; practical tips for preparing future teachers to navigate the process; positive applications of digital equity; and a hypothesis for the future direction of digital equity in teacher education. This book will inform teacher education programs and future research, providing positive examples and recommendations for educational technology leaders and educators on moving toward digital equity in K12 and teacher education.

Old Town Spring's historic streets may set the scene for a quaint shopping village, but they also serve as byways for one of the most haunted towns in Texas. A perfectionist past the end, Uncle Charlie still fusses around the historic Wunsche Brothers Caf☞, the oldest commercial structure in the area. The spirit of a girl who died in a barn still plays with her group of friends in Doering Court, while a

headless switchman runs after phantom trains trying to prevent a collision. Her path lit by unknown lights in the sky, author Cathy Nance leads the way through Old Town Spring's spookiest sites.

Rifling Through My Drawers

Drawing Futures brings together international designers and artists for speculations in contemporary drawing for art and architecture. Despite numerous developments in technological manufacture and computational design that provide new grounds for designers, the act of drawing still plays a central role as a vehicle for speculation. There is a rich and long history of drawing tied to innovations in technology as well as to revolutions in our philosophical understanding of the world. In reflection of a society now underpinned by computational networks and interfaces allowing hitherto unprecedented views of the world, the changing status of the drawing and its representation as a political act demands a platform for reflection and innovation. Drawing Futures will present a compendium of projects, writings and interviews that critically reassess the act of drawing and where its future may lie. Drawing Futures focuses on the discussion of how the field of drawing may expand synchronously alongside technological and computational developments. The book coincides with an international conference of the same name, taking place at The Bartlett School of Architecture, UCL, in November 2016. Bringing together practitioners from many creative fields, the book discusses how drawing is changing in relation to new technologies for the production and dissemination of ideas.

With her inimitable wit and outspoken views, Clarissa Dickson Wright opens her diary and takes us on a journey around Britain with this unrivalled collection of stories and anecdotes from her ever-eventful life. As celebrated cook and champion of the countryside, Clarissa's year includes being propositioned by a burly greyhound courser, meeting the Chairman of the Sandringham branch of the WI, a fishing terrier called Kipper and taking on the Health & Safety officials at a rain-drenched County Show. Criss-crossing the country she introduces us to long-forgotten traditions and colourful local festivals as she meets up with extraordinary characters and friends old and new. Entertaining, poignant, but never politically correct, *RIFLING THROUGH MY DRAWERS* is a breath of fresh air and proves once again why Clarissa is one of the nation's true treasures.

American Vaudeville as Ritual

Elizabeth Ann Scarborough's *The Godmother* puts a new twist on contemporary fantasy with the assertion that fairy godmothers exist here and now, and they have magical power that allows them to intervene in real-world problems. What if someone wished a fairy godmother would help the entire city of Seattle? An overworked, overstressed social worker named Rose Samson does just that when she makes an idle wish on a mustard seed. Felicity Fortune of "Godmothers Anonymous" shows up to help. Rose Samson is neither fashion model beautiful, nor a twit, and she happily joins forces with Felicity Fortune, a "Godmother" who demonstrates that Grimm's fairy tales are still relevant in our humdrum modern world. Fairy godmothers are on a magical budget, so every possible way they can get human beings or animals to assist one another, they will try, rather than using up their magical means. Felicity encounters many strangely familiar situations: a pretty stablehand named Cindy Ellis is mistreated by her cruel stepsisters. A rock star's daughter, scared of the supermodel her dad married, runs away from home and meets seven Vietnam veterans at an encounter session and retreat. One of them might be a big bad wolf, who knows? In all their experiences, Rose and Felicity try to blend their magical aid with realistic human initiative and social responsibility. Scarborough's fully realized settings, with the humor built into the mix of magical solutions and grim reality, make this work an entertaining and compelling read.

Blueprint for Action

Many blended learning initiatives start from the top down and are designed for specific populations or make drastic changes to a school's learning structure. But any K-12 classroom teacher can find ways to leverage blended learning within the four walls of their classroom, regardless of the constructs of their learning environment. All they need is a willingness to rethink their role in the classroom -- moving from content deliverer to architect of learning. In *The Perfect Blend*, you'll

learn how to create a "homemade recipe" for effective blended learning within your classroom. Rather than focusing on finding and implementing a specific established model, author Michele Eaton shows teachers how to embrace the flexibility of blended learning to take an active role as a designer of learning in the classroom and, in the process, helping students find their voices as advocates for their education.

Comprehensive Healthcare Simulation: Operations, Technology, and Innovative Practice

We all want lives filled with balance, ease and contentment -- but how do we get there? In *Pathways to Well-Being*, authors Susan Brooks-Young and Sara Armstrong share steps to increasing well-being and discuss how six elements -- gratitude, positivity, focus, empathy, kindness and movement -- impact daily life. All of us, especially educators, influence those around us -- in our schools, in our communities and ultimately throughout the world. When we work toward supporting well-being for ourselves and others, our lives are enriched immensely. In *Pathways to Well-Being*, you'll find suggestions for how to address the unexpected consequences of technology use and increase positive connections, which ultimately lead to enhanced well-being. The book includes an overview of each of the six elements of well-being with connections to the applicable ISTE Standards for Educators and the ISTE Standards for Education Leaders; real-world connections to help readers answer questions such as: "How does the topic relate to everyday life?" and "What can I do to incorporate what I've learned into what I do at work and at home to make my life, and the lives of those around me, better?"; information on the positive and negative aspects of technology related to overall well-being; reflection questions to help readers make healthy changes; and additional resources such as research, articles, books and websites.

Generating Electricity Using Photovoltaic Solar Plants in Iraq

Civil Engineer's Reference Book, Fourth Edition provides civil engineers with reports on design and construction practices in the UK and overseas. It gives a

concise presentation of theory and practice in the many branches of a civil engineer's profession and it enables them to study a subject in greater depth. The book discusses some improvements in earlier practices, for example in surveying, geotechnics, water management, project management, underwater working, and the control and use of materials. Other changes covered are from the evolving needs of clients for almost all forms of construction, maintenance and repair. Another major change is the introduction of new national and Euro-codes based on limit state design, covering most aspects of structural engineering. The fourth edition incorporates these advances and, at the same time, gives greater prominence to the special problems relating to work overseas, with differing client requirements and climatic conditions. Chapters 1 to 10 provide engineers, at all levels of development, with 'lecture notes' on the basic theories of civil engineering. Chapters 11 to 44 cover the practice of design and construction in many of the fields of civil engineering. Civil engineers, architects, lawyers, mechanical engineers, insurers, clients, and students of civil engineering will find benefit in the use of this text.
