A disturbingly cautionary tale, *Is Anyone Responsible?* anchors with powerful evidence suspicions about the way in which television has impoverished political discourse in the United States and at the same time molds American political consciousness. It is essential reading for media critics, psychologists, political analysts, and all the citizens who want to be sure that their political opinions are their own. "Not only does it provide convincing evidence for particular effects of media fragmentation, but it also explores some of the specific mechanisms by which television works its damage. . . . Here is powerful additional evidence for those of us who like to flay television for its contributions to the trivialization of public discourse and the erosion of democratic accountability."—William A. Gamson, *Contemporary Sociology* "Iyengar's book has substantial merit. . . . [His] experimental methods offer a precision of measurement that media effects research seldom attains. I believe, moreover, that Iyengar's notion of framing effects is one of the truly important theoretical concepts to appear in recent years."—Thomas E. Patterson, *American Political Science Review*

Howling at the Moon

"The title of this volume is, of course, taken from 2 Kgs 6:1, where the prophetic group about Elisha point out that their accomodation is too cramped. It seemed an apt comment on the capacity of any proposed volume to house and adequate representation of the work that has recently been done on Israelite prophecy. To this I now have to add the all-too-ironic confession that the so-called pre-classical prophets (including Elisha and his colleagues) could not be accomodated in the present volume. Let no one complain about being misled by the subtitle when the title is so honest there are thirty-six items of varying legnth, and they divide almost equally between journal articles and excerpts from volumes (some of thes of composite authorship). Naturally, they represent one individual's selection from within his personal reading, and this itself accounts for only a fraction of the vast scholarly output on the prophets, whether since 1875 or since 1975 It will be apparent at several places in the volume that I take with great seriousness the study of Near Eastern (non-Israelite) prophecy as background to the Israelite phenomenon, so that the first short section ("The Near Eastern Background") was unavoidable."--Editor's preface.

Cindy Bentley: Spirit of a Champion celebrates the life of one of Wisconsin's most inspirational leaders and activists. Born with an intellectual disability as the result of fetal alcohol syndrome, Cindy Bentley spent much of her childhood at the Southern Wisconsin Center for the Developmentally Disabled. No one expected her to learn the skills necessary to live on her own. To everyone's surprise, including her own, she did that and much more. With the encouragement of a teacher at Southern Center, Cindy realized she had a deep passion for sports, and the discipline to train and compete. She began participating in Special Olympics, and gained confidence as she worked with teammates to earn medals in tennis, track and field, and even snowshoeing. Chosen as a Global Messenger for the Special Olympics International in 2000, Cindy has had dinner at the White House with two different American presidents, traveled around the world, and given speeches in front of thousands of people. In these pages, young readers will learn what gives Cindy her champion spirit, and why she gave away some of her gold medals. Today, Cindy is still competing in Special Olympics. She also continues to advocate for people with disabilities, and helped to start People First, a statewide organization that encourages those with disabilities to speak up for their rights.

by patients or by anyone who is bothered by tinnitus. It accompanies the two Progressive Tinnitus Management books -- the Counseling Guide and Clinical Handbook for Audiologists. This third edition of the workbook has been extensively revised and expanded to include new sections describing key components of Cognitive-Behavioral Therapy (CBT).. A DVD and CD are included with the workbook. The DVD contains four interactive videos, all of which are captioned. The first two videos show the education that is provided to patients during the first and second sessions of PTM Level 3 Group Education (this video is different from the one for the PTM clinical handbook-the workbook version is designed for individual viewing at home while the handbook version is designed for group viewing in the clinical setting). The third and fourth videos on the DVD provide demonstrations of two relaxation techniques-deep breathing and imagery. These relaxation videos can be used to supplement the Level 3 Group Education. The 76-minute audio CD contains a tutorial of how sound can be used to manage tinnitus, followed by samples of different sounds. Clinicians can use the CD to supplement the PTM counseling.

Parents And The Dynamics Of Child Rearing

Show biz memoir at its name-dropping, bridge-burning, profane best: the music industry's most outspoken, outrageous, and phenomenally successful executive delivers a rollicking memoir of pop music's heyday. During the 1970s and '80s the music business was dominated by a few major labels and artists such as Michael Jackson, Bruce Springsteen, the Rolling Stones, Bob Dylan, Billy Joel, Paul Simon, Barbra Streisand and James Taylor. They were all under contract to CBS Records, making it the most successful label of the era. And, as the company's president, Walter Yetnikoff was the ruling monarch. He was also the most flamboyant, volatile and controversial personality to emerge from an industry and era defined by sex, drugs and debauchery. Having risen from working-class Brooklyn and the legal department of CBS, Yetnikoff, who freely admitted to being tone deaf, was an unlikely label head. But he had an uncanny knack for fostering talent and intimidating rivals with his appalling

behavior—usually fueled by an explosive combination of cocaine and alcohol. His tantrums, appetite for mind-altering substances and sexual exploits were legendary. In Japan to meet the Sony executives who acquired CBS during his tenure, Walter was assigned a minder who confined him to a hotel room. True to form, Walter raided the minibar, got blasted and, seeing no other means of escape, opened a hotel window and vented his rage by literally howling at the moon. In *Howling at the Moon*, Yetnikoff traces his journey as he climbed the corporate mountain, danced on its summit and crashed and burned. We see how Walter became the father-confessor to Michael Jackson as the King of Pop reconstructed his face and agonized over his image while constructing *Thriller* (and how, after it won seven Grammys, Jackson made the preposterous demand that Walter take producer Quincy Jones's name off the album); we see Walter, in maniacal pursuit of a contract, chase the Rolling Stones around the world and nearly come to blows with Mick Jagger in the process; we get the tale of how Walter and Marvin Gaye—fresh from the success of "Sexual Healing"—share the same woman, and of how Walter bonds with Bob Dylan because of their mutual Jewishness. At the same time we witness Yetnikoff's clashes with Barry Diller, David Geffen, Tommy Mottola, Allen Grubman and a host of others. Seemingly, the more Yetnikoff feeds his cravings for power, sex, liquor and cocaine, the more profitable CBS becomes—from \$485 million to well over \$2 billion—until he finally succumbs, ironically, not to substances, but to a corporate coup. Reflecting on the sinister cycle that left his career in tatters and CBS flush with cash, Yetnikoff emerges with a hunger for

redemption and a new reverence for his working-class Brooklyn roots. Ruthlessly candid, uproariously hilarious and compulsively readable, *Howling at the Moon* is a blistering *You'll Never Eat Lunch in this Town Again* of the music industry.

Dragon's Soul

Sound & Vision

J. D. Bernal's monumental work, *Science in History*, was the first full attempt to analyse the reciprocal relations of science and society throughout history, from the perfection of the flint hand-axe to the hydrogen bomb. In this remarkable study he illustrates the impetus given to (and the limitations placed upon) discovery and invention by pastoral, agricultural, feudal, capitalist, and socialist systems, and conversely the ways in which science has altered economic, social, and political beliefs and practices. In this first volume Bernal discusses the nature and method of science before describing its emergence in the Stone Age, its full formation by the Greeks and its continuing growth (probably influenced from China) under Christendom and Islam in the Middle Ages. Andrew Brown, Bernal's biographer, with a nice sense of paradox, has said of him, he 'was steeped in history, in part because he was always thinking about the future.' He goes on to say, '*Science in History* is an encyclopaedic, yet individual and colourful account of the emergence of science from pre-historic times. There is detailed coverage of the scientific revolution

of the Enlightenment, the Industrial Age and the first two-thirds of the twentieth century. . . The writing flows and is devoid of the tortured idioms that mar so many academic histories of science. After reading it, it is easy to agree with C. P. Snow's orotund observation that Bernal was the last man to know science. Faber Finds are reissuing the illustrated four volume edition first published by Penguin in 1969. The four volumes are: Volume 1: The Emergence of Science, Volume 2: The Scientific and Industrial Revolutions, Volume 3: The Natural Sciences in Our Time, Volume 4: The Social Sciences: Conclusion. 'This stupendous work . . . is a magnificent synoptic view of the rise of science and its impact on society which leaves the reader awe-struck by Professor Bernal's encyclopaedic knowledge and historical sweep.' A trace element (TE) is a chemical element presented below ~ 0.1 wt. % and required in minute quantities to maintain proper physical functioning. TE analysis in clinical samples (plasma, urine, cerebro-spinal fluid, full-term placenta, hair, nails, buccal mucosa, semen, biopsy specimens) has received increasing attention. Based on 62 sources, current effort presents comparative knowledge about the attempts to accurately trace TE in clinical samples through Vis/NIR, PIXE, TXRF, GFAAS, ICP-MS. It informs the need for further research adjustments to reveal the reciprocal states of certain TE (Cu/Zn, Ca/Mg, Fe/ Pb) in correlation with their real-time counts in both maternal and neonatal umbilical cord plasma, and in relation to augmented oxidative stress. This would help to achieve consistency in interpreting obstetrical complications (preeclampsia, prematurity, or gestational diabetes). Generated hypotheses should target plausible mechanisms behind TE alterations and their stage-sensitive measures in gynecological cancer. New prospects are discussed in management and prognosis of endometriosis and premature ovarian failure (POF).

The familiar yellow Technical Instruction series from Bosch have long proved one of their most popular instructional aids. They provide a clear and concise overview of the theory of operation, component design, model variations, and technical terminology for the entire Bosch product line, and give a solid foundation for better diagnostics and servicing. Clearly written and illustrated with photos, diagrams and charts, these books are equally at home in the vocational classroom, apprentice's toolkit, or enthusiast's fireside chair. If you own a European car, you have Bosch components and systems. Each book deals with a single system, including a clear explanation of that system's principles. They also include circuit diagrams, an explanation of the Bosch model numbering system, and a glossary of technical terms. This reference book provides extensive information on state-of-the-art diesel fuel-injection technology. Designed to be a single reference source for diesel engine and fuel-injection systems, Diesel Fuel Injection provides detailed descriptions of the

A Touch of Truth

This book has been developed from its earlier and far less formal presentment as the proceedings of a symposium entitled The Biochemistry of S-Adenosylmethionine as a Basis for Drug Design that was held at the Solstrand Fjord Hotel in Bergen, Norway on June 30-July 4, 1985. The purpose of the symposium was to bring together scientists from various disciplines (biochemistry, pharmacology, virology, immunology, chemistry, medicine, and so on) to discuss the recent advances that have been made in our understanding of the biological roles of S adenosylmethionine (AdoMet) and to discuss the feasibility of utilizing AdoMet-dependent enzymes as targets for drug design. Thus the information provided herein will be of value not only to basic scientists involved in elucidating the role of AdoMet in biology, but also to medicinal chemists who are using this basic knowledge in the process of drug design. The volume should also be of interest to pharmacologists and clinicians involved in biological evaluation of

potential therapeutic agents arising from the efforts of the biochemists and medicinal chemists. Each plenary speaker at the symposium was requested to submit a chapter reviewing recent contributions of their discipline to our base of knowledge about the biological role of AdoMet. Topics covered in this volume include protein and phospholipid methylations (Section A), nucleic acid methylations (Section B), the regulation of AdoMet, S-adenosylhomocysteine, and methylthioadenosine metabolism (Section C), clinical aspects of AdoMet (Section D), and the design, synthesis, and biological evaluation of trans methylation inhibitors (Section E).

Research into parent-child relationships is a diverse field of inquiry, attracting investigators from a variety of disciplines and subdisciplines. This book integrates and synthesizes the literature by focusing on issues concerning the parent. The text is organized around four key questions: What determines parental behavior? What are the effects of parenting on children? What makes some parents more effective than others? Why do some parents maltreat their children? George Holden adopts a dynamic rather than a static perspective on parenting. This dynamic approach reflects parents' capacity to modify their behavior as they respond to changes in their children and in their own lives. Throughout the text, historical antecedents as well as methodological and theoretical issues are highlighted. Although the book is designed for advanced courses focusing on the parent child relationship, it also provides a good overview for those interested in current research concerning parenting.
