The report addresses the urgent and growing threat of terrorist travel by Americans to Syria and Iraq. Despite the government's efforts to control this travel, hundreds of Americans have attempted to reach the conflict zones to join the jihadists. Using numerous briefings, interviews, site visits, and document analysis, the Task Force makes thirty-two key findings dealing with government strategy, identification of terrorists, and disruption of foreign fighter travel, including: Key Finding 1: The United States lacks a comprehensive strategy for combating terrorist and foreign fighter travel. Key Finding 14: State and local law enforcement personnel continue to express concern that they are not provided with the appropriate security clearances to assist with counterterrorism challenges. Key Finding 25: "Broken travel" and other evasive tactics are making it harder to track foreign fighters. Key Finding 29: Gaping security weaknesses overseas—especially in Europe—are putting the U.S. homeland in danger by making it easier for aspiring foreign fighters to migrate to terrorist hotspots and for jihadists to return to the West. Introductory remarks by security experts accompany the text and place these findings and recommendations in their proper context, explaining the critical need for effective strategy in combating terrorist travel from the United States.

Iraq is a nation in crisis bordering on civil war. The country now faces growing violence, a steady rise in Sunni Islamist extremism, an increasingly authoritarian leader that favors Iraq's Sunnis, and growing ethnic tension between Arabs and Kurds. The recent Iraqi election offers little promise that it can correct the corruption, the weaknesses in its security forces, and the critical failures in governance, economic development, and leadership. The problems Iraq faces in 2014 are a legacy of mistakes made during and after the U.S.-led invasion in 2003, but increasingly the nation is dealing with the self-inflicted wounds of its leaders who abuse human rights, repress opposing factions, and misuse the Iraqi police and security forces to their own end.

Your truck-loving boy or girl will get excited about counting when they get to count trucks! This colorful book has ten cartoon illustrations of trucks with simple descriptions, such as "2 Two tow trucks." There are cement mixers, pickup, garbage, and delivery trucks, lunch wagons and food trucks, forklifts, fire trucks, and tractors. There are also simple questions, like "How many apartment windows can you count?" Although many children aged 2 to 5 know their numbers, they get confused when trying to count objects. Help them practice with these fun pictures. You can have your preschooler or toddler point to each vehicle and count. The numbers are from 1 to 10. Be sure to check out all the fun books in the Let's Count Series. They are a great way to help your child or grandchild learn to count.

The Law Library presents the complete text of the Vehicle Identification Number Requirements (US National Highway Traffic Safety Administration Regulation) (NHTSA) (2018 Edition). Updated as of May 29, 2018 Based on concerns that the supply of unique available Vehicle Identification Numbers is diminishing, NHTSA is proposing to amend the agency's Vehicle Identification Number (VIN) regulation. The amendment would ensure that there will be a sufficient number of unique manufacturer identifiers and VINs for the current 17-character VIN system to use for at least another 30 years. This NPRM also proposes other changes to the VIN requirements, such as proposing to require that certain vehicle characteristics of low speed vehicles (LSVs) must be reflected in the VIN of LSVs. This rulemaking also responds to a petition for rulemaking from SAE International (SAE). This ebook contains: - The complete text of the Vehicle Identification Number Requirements (US National Highway Traffic Safety Administration Regulation) (NHTSA) (2018 Edition) - A dynamic table of content linking to each section - A table of contents in introduction presenting a general overview of the structure

From the bestselling author of *Lawrence in Arabia*, a piercing account of how the contemporary Arab world came to be riven by catastrophe since the 2003 United States invasion of Iraq. In 2011, a series of anti-government uprisings shook the Middle East and North Africa in what would become known as the Arab Spring. Few could predict that these convulsions, initially hailed in the West as a triumph of democracy, would give way to brutal civil war, the terrors of the Islamic State, and a global refugee crisis. But, as New York Times bestselling author Scott Anderson shows, the seeds of catastrophe had been sown long before. In this gripping account, Anderson examines the myriad complex causes of the region's profound unraveling, tracing the ideological conflicts of the present to their origins in the United States invasion of Iraq in 2003 and beyond. From this investigation emerges a rare view into a land in upheaval through the eyes of six individuals—the matriarch of a dissident Egyptian family; a Libyan Air Force cadet with divided loyalties; a Kurdish physician from a prominent warrior clan; a Syrian university student caught in civil war; an Iraqi activist for women's rights; and an Iraqi day laborer-turned-ISIS fighter. A probing and insightful work of reportage, *Fractured Lands* offers a penetrating portrait of the contemporary Arab world and brings the stunning realities of an unprecedented geopolitical tragedy into crystalline focus.

The authors hadn't intended to put themselves in danger but that's what happened as they interviewed an unprecedented thirty-two battle-hardened defectors about the gritty details of life inside ISIS. With unparalleled breadth, depth and access, ISIS Defectors: Inside Stories of the Terrorist Caliphate offers a compelling view of ISIS from men, women and teens now in hiding, having escaped the most brutal terrorist group in recent history. They were fighters and commanders, wives of fighters-living and dead, female enforcers, and Cubs of the Caliphate, including a child who volunteered and almost got sent as a suicide bomber at age thirteen. They discuss motivations for joining and defecting, and delve into news-making topics: coercing children to become suicide bombers; brides of ISIS and the brutal female morality police; Yazidi and Sunni sex slaves held in massive compounds where fighters use them at will; privilege bestowed on foreign fighters; prisoners kept for the sole purpose of beheading by new inductees. The defectors shared a startling array of photos and videos from personal

cell phones and many are included in the digital version of this book. An unexpected subplot unfolded when Dr. Yayla found himself tailed by ISIS, and Dr. Speckhard barely missed two suicide attacks. But the authors are not deterred. As counter-terrorism experts with specialties in research psychology and law enforcement, they see ISIS as more than a terrorist group. ISIS is a brand that falsely sells dignity and purpose, justice and the restoration of glory-to vulnerable recruits-masterfully recruiting some 30,000 members online. It's the biggest influx of foreign fighters to a terrorist haven in history. Using the defectors own words, the authors intend to break the ISIS brand. They have videotaped these interviews to edit them into short clips, memes and tweets for an online counter-offensive. Speckhard and Yayla state that disillusioned ISIS defectors are the most influential tool for countering ISIS propoganda. The persuasive voices of these defectors and the resulting videos will soon invade ISIS chat rooms where their propoganda thrives. With over one thousand active investigations in the U.S. across all 50 states, discrediting ISIS ideology is essential to stopping it.

One of the early pioneers in the manufacture of trucks, Sterling is synonymous with rugged well-engineered trucks with a reputation for reliable service in off-road, heavy-duty applications—mining, construction, and logging. Distinctive engineering hallmarks included wood-lined frames and the continued use of chain drive long after its abandonment by other manufacturers. Established in Milwaukee, Wisconsin, production of Sternberg trucks began in 1907, becoming Sterling in 1915. Acquired by the White Motor Company in 1951, Sterling-White production ended in 1953. This Photo Archive chronicles this unique truck through large-format archival photographs and detailed captions.

Preserving New York is the largely unknown inspiring story of the origins of New York City's nationally acclaimed landmarks law. The decades of struggle behind the law, its intellectual origins, the men and women who fought for it, the forces that shaped it, and the buildings lost and saved on the way to its ultimate passage, span from 1913 to 1965. Intended for the interested public as well as students of New York City history, architecture, and preservation itself, over 100 illustrations help reveal a history richer and more complex than the accepted myth that the landmarks law sprang from the wreckage of the great Pennsylvania Station. Images include those by noted historic photographers as well as those from newspaper accounts of the time. Forgotten civic leaders such as Albert S. Bard and lost buildings including the Brokaw Mansions, are unveiled in an extensively researched narrative bringing this essential episode in New York's history to future generations tasked with protecting the city's landmarks. For the first time, the story of how New York won the right to protect its treasured buildings, neighborhoods and special places is brought together to enjoy, inform, and inspire all who love New

York.

This is a print on demand edition of a hard to find publication. Explores whether sufficient data exists to examine the temporal and spatial relationships that existed in terrorist group planning, and if so, could patterns of preparatory conduct be identified? About one-half of the terrorists resided, planned, and prepared for terrorism relatively close to their eventual target. The terrorist groups existed for 1,205 days from the first planning meeting to the date of the actual/planned terrorist incident. The planning process for specific acts began 2-3 months prior to the terrorist incident. This study examined selected terrorist groups/incidents in the U.S. from 1980-2002. It provides for the potential to identify patterns of conduct that might lead to intervention prior to the commission of the actual terrorist incidents. Illustrations.
