Introduction to Financial Accounting

This text is intended for a first course in introductory financial accounting. It was updated to reflect current International Financial Reporting Standards (IFRS). For example, it reflects the recent change in IAS38, para. 98, allowing the use of multiple methods in amortizing intangible assets. It focuses on core Introductory Financial Accounting topics that match prerequisite requirements for students advancing to Intermediate Financial Accounting. Excluded are advanced topics that are covered in Intermediate Financial Accounting, such as leases and bond amortization. The text takes a corporate approach (vs. beginning with a sole proprietorship emphasis and then converting to a corporate approach); this consistency throughout the book reduces confusion for the introductory student. The book covers all essential topics: the accounting cycle, merchandising, assigning costs to inventory, cash and receivables, property, plant and equipment, debt financing, equity financing, statement of cash flows, financial statement analysis, and proprietorships and partnerships. Additionally, this version of the open text is supported by Lyryx Learning, offering at an affordable price editorial services to develop and adapt the content, formative online assessment, course supplements, and daily support to both the students and

instructors.

Managerial Accounting

Based on United States generally accepted accounting principles, this textbook was written by David Annand, EdD, MBA, CPA, CA, and Professor of Accounting in the Faculty of Business at Athabasca University. It was adapted by Teresa Thompson of Mission College, Santa Clara CA. The material also includes multiple ancillary student resources: a solutions manual for all text questions, a full index, and a student workbook. Students can print outlines for answers to any questions as they need them and fill in responses manually. All of this material is able to be printed on demand in whole or in part. The text and solutions manual are also available as a combined .pdf file for onscreen viewing. The material is fully bookmarked. All questions and problems are hyper-linked to related solutions. In addition there are links to randomly-generated Excel® problems at the end of each chapter. These cover key concepts, and provide unlimited practice and feedback. Instructor resources include an assignment and exam bank, and PowerPoint® slides. All text, solutions manual, and student workbook material is available in .docx format for instructors to customize if desired. The material is freely-adaptable and shareable under a CC-BY-SA-NC licence. A comprehensive, end-of-term case is also available (Jensen Wholesalers Corp.). This requires students to prepare 18 different year-end adjusting entries and all four types of financial statements, and calculation and analysis of 16 different financial statement ratios. Tailored solutions are provided for instructors. An example is included on this webpage. Unique versions can be created for any number of individual students or groups. This case, and the assignment and exam bank are available upon request to davida@athabascau.ca.

Principles of Accounting Volume 1 - Financial Accounting

This text offers a real-world approach to financial accounting theory, terminology, and procedures. Students learn how to comprehend a typical corporate annual report and to use accounting as a tool in understanding how economic events affect business. Simple concepts are introduced early and revisited at more advanced levels as students gain sophistication and understanding, and concepts are made concrete at every step with actual, current company illustrations. An extensive selection of supplements help students move beyond the text for hands-on experience with the real world of financial accounting.

Idiot's Guides: Introductory Accounting

Accounting is the score keeping system in the “game” of business, and you won’t do well in any “game” if you don’t understand how the score is kept. If you’re a practicing manager, MBA student, or a non-accounting business major, this book will do more than help you stay in the game. Inside, United States financial reporting standards are compared and contrasted with international financial reporting standards, and the authors detail how management’s choice of accounting methods and their required estimates in reporting transactions and events impact financial statements, both immediately and in the future. Unlike typical accounting books, journal entries are not used to illustrate topical coverage. This unique book exclusively provides you with a decision-making perspective by using the accounting equation format to directly illustrate financial statement effects of transactions and events. Most of the topics addressed in this book are typically studied by accounting majors in the two course “intermediate” accounting sequence, but the text also includes discussion of consolidations—a topic generally covered in the “advanced” accounting course. Intermediate accounting textbooks alone typically exceed well over 1,500 pages. By exclusively applying a user’s perspective, and limiting topical content to areas relevant for decision making, this book allows non-accountants to acquire the requisite underlying knowledge in a concise, easy to understand text.

Financial Accounting

"Introductory Financial Accounting, 9e" provides a unique and perfect blend of robust financial statement analysis with early statement of cash flows coverage. It is directed at those who will analyze real financial statements, and make business decisions based upon that analysis. Real statements are used throughout (Starbucks). Statement of Cash Flows comes earlier in this book than most. Material is focused on analysis of financial statements -- ratios introduced early and often, special " Portfolio" section provides a " road map" to financial statement analysis, and special section in end-of-chapter problems focuses on analyzing financial statements (using Starbucks financial statements). Features strong coverage of statement of cash flows (Ch 5) --an essential financial statement, one of growing importance, and should be regarded as a basic statement. For financial accountants.

Accounting

Financial accounting is the branch of accounting thought and practice concerned with preparing and providing information for external users of financial statements. This textbook helps students to understand the concepts that underpin the application of accounting theory to solve accounting problems. This international edition includes extracts from financial statements, definitions of key terms and exam examples. Unlike other textbooks, the author provides analysis of why accountants do what they do, and not just how. With such a wealth of accounting models and diagrams intertwined with this analysis, this book guides the reader through all the practicalities and concepts of financial accounting. Additional online questions, exercises and problems provide an opportunity to put this new-found knowledge into practice along the

way. This book is an essential guide for students new to accountancy, and an equally useful tool for more experienced students and researchers.

Introduction to Financial Accounting - Third Edition

Financial Accounting

Financial accounting is generally thought of as a very precise science. This book seeks to dispel this myth. Even absent fraudulent manipulation, information contained in financial statements can be woefully misleading and incomplete. Written primarily for non-accounting students, small business owners, and advisers to small business, the book demonstrates how accounting information contained in financial statements both informs and misinforms statement users.
