The Songwriting Secrets Of The Beatles

The Beatles. The Rolling Stones. The Who. The Kinks. Jefferson Airplane. Joe Cocker. Quicksilver Messenger Service. The Yardbirds. Harry Nilsson. At the heart of their music, and of hundreds of others, was one man with a piano: Nicky Hopkins. This is the definitive work on rock music's greatest session player, and one of its unsung heroes.

John Lennon

Thirty years after The Beatles split up, the music of Lennon, McCartney, Harrison and Starr lives on. What exactly were the magical ingredients of those legendary songs? Why are they still so influential for today's bands? This groundbreaking book sets out to explore The Beatles' songwriting techniques in a clear and readable style. It is aimed not only at musicians but anyone who has ever enjoyed the work of one of the most productive and successful songwriting partnerships of the 20th Century. Author Dominic Pedler explores the chord sequences, melodies, harmonies, rhythms and structures of The Beatles' self-penned songs, while challenging readers to enhance their appreciation of the lyrics themselves with reference to the musical context. Throughout the book the printed music and lyrics of The Beatles' songs appear alongside the text, illustrating the author's explanations. *The Songwriting Secrets Of The Beatles* is an essential addition to Beatles literature - a new and perceptive analysis of both the music and the lyrics written and performed by what Paul McCartney still calls 'a really good, tight little band'.

Fur Elise (Sheet Music)

The greatest true-crime story in music history, as only James Patterson can tell it. With the Beatles, John Lennon surpasses his youthful dreams, achieving a level of superstardom that defies classification. "We were the best bloody band there was,"

he says. “There was nobody to touch us.” Nobody except the original nowhere man, Mark David Chapman. Chapman once worshipped his idols from afar—but now harbors grudges against those, like Lennon, whom he feels betrayed him. He’s convinced Lennon has misled fans with his message of hope and peace. And Chapman’s not staying away any longer. By the summer of 1980, Lennon is recording new music for the first time in years, energized and ready for it to be “(Just Like) Starting Over.” He can’t wait to show the world what he will do. Neither can Chapman, who quits his security job and boards a flight to New York, a handgun and bullets stowed in his luggage. The greatest true-crime story in music history, as only James Patterson can tell it. Enriched by exclusive interviews with Lennon’s friends and associates, including Paul McCartney, *The Last Days of John Lennon* is the thrilling true story of two men who changed history: One whose indelible songs enliven our world to this day—and the other who ended the beautiful music with five pulls of a trigger.

Great Beatles' Songs

This book is a survey and analysis of how deep learning can be used to generate musical content. The authors offer a comprehensive presentation of the foundations of deep learning techniques for music generation. They also develop a conceptual framework used to classify and analyze various types of architecture, encoding models, generation strategies, and ways to control the generation. The

five dimensions of this framework are: objective (the kind of musical content to be generated, e.g., melody, accompaniment); representation (the musical elements to be considered and how to encode them, e.g., chord, silence, piano roll, one-hot encoding); architecture (the structure organizing neurons, their connexions, and the flow of their activations, e.g., feedforward, recurrent, variational autoencoder); challenge (the desired properties and issues, e.g., variability, incrementality, adaptability); and strategy (the way to model and control the process of generation, e.g., single-step feedforward, iterative feedforward, decoder feedforward, sampling). To illustrate the possible design decisions and to allow comparison and correlation analysis they analyze and classify more than 40 systems, and they discuss important open challenges such as interactivity, originality, and structure. The authors have extensive knowledge and experience in all related research, technical, performance, and business aspects. The book is suitable for students, practitioners, and researchers in the artificial intelligence, machine learning, and music creation domains. The reader does not require any prior knowledge about artificial neural networks, deep learning, or computer music. The text is fully supported with a comprehensive table of acronyms, bibliography, glossary, and index, and supplementary material is available from the authors' website.

Your Song (Sheet Music)

(Signature Licks Guitar). This book/audio pack offers a unique and thorough examination of twelve of Hendrix's greatest compositions. Performance notes, outlining chord voicings, scale use, and unusual techniques are included for each song. Songs include: Foxey Lady * Hey Joe * Little Wing * Purple Haze * and more.

John Coltrane - Omnibook for Bass Clef Instruments

This book offers a highly accessible introduction to natural language processing, the field that supports a variety of language technologies, from predictive text and email filtering to automatic summarization and translation. With it, you'll learn how to write Python programs that work with large collections of unstructured text. You'll access richly annotated datasets using a comprehensive range of linguistic data structures, and you'll understand the main algorithms for analyzing the content and structure of written communication. Packed with examples and exercises, Natural Language Processing with Python will help you: Extract information from unstructured text, either to guess the topic or identify "named entities" Analyze linguistic structure in text, including parsing and semantic analysis Access popular linguistic databases, including WordNet and treebanks Integrate techniques drawn from fields as diverse as linguistics and artificial

intelligence This book will help you gain practical skills in natural language processing using the Python programming language and the Natural Language Toolkit (NLTK) open source library. If you're interested in developing web applications, analyzing multilingual news sources, or documenting endangered languages -- or if you're simply curious to have a programmer's perspective on how human language works -- you'll find Natural Language Processing with Python both fascinating and immensely useful.

Pitch Perfect, Pitch Perfect 2, and Vocalosity. Combine Deke's expertise with that of directors Ben Spalding and Brody McDonald, add a foreword by Ben Folds, throw in advice from contributors like Peter Hollens, and you have the most comprehensive volume ever created on the subject of contemporary a cappella singing. Sections include: * Setting the Stage * Getting the Band Together * Arranging * Preparing * Technology * Making a Name * and more!

The Beatles Sheet Music Collection

A lifetime of letters, collected for the first time, from the legendary The Beatles musician and songwriter John Lennon John Lennon is one of the world's greatest-ever song writers, creator of 'Help!', 'Lucy in the Sky with Diamonds', 'Imagine' and dozens more. Now, his letters have been collected and published, illuminating as never before the intimate side of a private genius. Hunter Davies, author of the only authorised biography of The Beatles, has tracked down almost three hundred of Lennon's letters and postcards - to relations, friends, fans, strangers, lovers and even to the laundry. Some of the letters are tender, informative, funny, angry and abusive, and some are simply heart-breaking - from his earliest surviving thank-you note, written when he was ten, to his last scribbled autograph given on 8 December 1980, the day he was shot, aged forty.

The Last Days of John Lennon

Geoff Emerick became an assistant engineer at the legendary Abbey Road Studios in 1962 at age fifteen, and was present as a new band called the Beatles recorded their first songs. He later worked with the Beatles as they recorded their singles "She Loves You" and "I Want to Hold Your Hand," the songs that would propel them to international superstardom. In 1964 he would witness the transformation of this young and playful group from Liverpool into professional, polished musicians as they put to tape classic songs such as "Eight Days A Week" and "I Feel Fine." Then, in 1966, at age nineteen, Geoff Emerick became the Beatles' chief engineer, the man responsible for their distinctive sound as they recorded the classic album Revolver, in which they pioneered innovative recording techniques

that changed the course of rock history. Emerick would also engineer the monumental Sgt. Pepper and Abbey Road albums, considered by many the greatest rock recordings of all time. In Here, There and Everywhere he reveals the creative process of the band in the studio, and describes how he achieved the sounds on their most famous songs. Emerick also brings to light the personal dynamics of the band, from the relentless (and increasingly mean-spirited) competition between Lennon and McCartney to the infighting and frustration that eventually brought a bitter end to the greatest rock band the world has ever known.

You Are My Sunshine Sheet Music
