Built from the ground up to focus on what matters to students in today's high-tech, globalized world, Dean Karlan and Jonathan Morduch's Economics represents a new generation of products, optimized for digital delivery and available with the best-in-class adaptive study resources in McGraw-Hill's LearnSmart Advantage Suite. Engagement with real-world problems is built into the very fabric of the learning materials as students are encouraged to think about economics in efficient, innovative, and meaningful ways. Drawing on the authors' experiences as academic economists, teachers, and policy advisors, a familiar curriculum is combined with material from new research and applied areas such as finance, behavioral economics, and the political economy, to share with students how what they're learning really matters. This modern approach is organized around learning objectives and matched with sound assessment tools aimed at enhancing students' analytical and critical thinking competencies. Students and faculty will find content that breaks down barriers between what goes on in the classroom and what is going on in our nation and broader world. By teaching the right questions to ask, Karlan and Morduch provide readers with a method for working through decisions they'll face in life and ultimately show that economics is the common thread that enables us to understand, analyze, and solve problems in our local communities and around the world.

Your English Language Learners are counting on you to collaborate effectively. The Common Core State Standards have increased the pressure on English Language Learners. And with the EL population increasing every day, schools need proven systems for ensuring that the students of the future are able to thrive. In practice, this is a challenge for educational leaders. The most promising solution is the collaborative approach pioneered by this book's authors—America's leading authorities on collaboration and co-teaching for EL achievement. Honigsfeld and Dove's resources for collaboration and co-teaching include Templates for creating EL profiles that will enable you to address their unique needs Prompts for Professional Learning activities (for teams or individuals) and further reading The latest research findings on best instructional practices that benefit ELs This is your concise, comprehensive guide to creating a powerful collaborative program to benefit your ELs. Start implementing it today and watch the outcomes improve.

In the title story, Lucinda hatches a clever plan to get her boyfriend back and is crushed when she ultimately realizes that it's impossible to force a guy to love you. Like all young people, she ignores the advice of her mom and learns that lesson—and many more—the hard way. In this bilingual collection of ten short stories for young people, kids deal with both serious and humorous consequences after they ignore their parents' suggestions and disobey rules. At a friend's house on New Year's Eve, Raymond plays with fireworks even though he promised his parents he wouldn't. Kids on a track team search for a mysterious naked woman with embarrassing results. And two girls in a wax museum are in for a surprise when they ignore the signs about touching the figures. These short and accessible contemporary stories are alternately amusing and poignant as they explore issues relevant to today's youth. Teens deal with everything from grandparents suffering from dementia to difficult customers at a first job. And in one story, a young girl grieves the loss of her baby, a miscarriage her mom calls a "blessing." These stories highlight the emotional tailspins of living in a complicated world.
