John Bollinger is a giant in today's trading community. His Bollinger Bands sharpen the sensitivity of fixed indicators, allowing them to more precisely reflect a market's volatility. By more accurately indicating the existing market environment, they are seen by many as today's standard—and most reliable—tool for plotting expected price action. Now, in *Bollinger on Bollinger Bands*, Bollinger himself explains how to use this extraordinary technique to compare price and indicator action and make sound, sensible, and profitable trading decisions. Concise, straightforward, and filled with instructive charts and graphs, this remarkable book will be essential reading for all serious traders, regardless of market. Bollinger includes his simple system for implementation, and techniques for combining bands and indicators.

This book is a contribution to the building of a knowledge base for the effectiveness of M&E-Systems in the field of development management. The primary focus is to contribute to the clarification of what rigorous frameworks would apply to understand and meaningfully measure M&E-System effectiveness. The book has the aim of translating outcomes from Dr. Ba's thesis research on M&E-System effectiveness into an actionable contribution to better reach

development practitioners and managers. The book is mainly devoted to development managers and M&E experts who wish to find superior ways of managing M&E-Systems for improved decision-making and measured risk-taking in moving development policies and programs towards the greater freedom and welfare of people mainly in Africa. The book focuses on M&E-System effectiveness and how it influences the dynamic capabilities of development organizations and institutions in managing development programs and projects. The book presents the challenges in seeking an effective M&E-System, examines the gaps and limits in assessing it, and finally proposes ways to rigorously measure its effectiveness. The book may also contribute to the scientific and professional discussions on what would be the meaningful framework to better understand the success factors that underlie an effective M&E-System and also how they help improve development management.

How data science and the analysis of networks help us solve the puzzle of unintended consequences. Social life is full of paradoxes. Our intentional actions often trigger outcomes that we did not intend or even envision. How do we explain those unintended effects and what can we do to regulate them? In *Decoding the Social World*, Sandra González-Bailón explains how data science and digital traces help us solve the puzzle of unintended consequences—offering the

solution to a social paradox that has intrigued thinkers for centuries. Communication has always been the force that makes a collection of people more than the sum of individuals, but only now can we explain why: digital technologies have made it possible to parse the information we generate by being social in new, imaginative ways. And yet we must look at that data, González-Bailón argues, through the lens of theories that capture the nature of social life. The technologies we use, in the end, are also a manifestation of the social world we inhabit. González-Bailón discusses how the unpredictability of social life relates to communication networks, social influence, and the unintended effects that derive from individual decisions. She describes how communication generates social dynamics in aggregate (leading to episodes of “collective effervescence”) and discusses the mechanisms that underlie large-scale diffusion, when information and behavior spread “like wildfire.” She applies the theory of networks to illuminate why collective outcomes can differ drastically even when they arise from the same individual actions. By opening the black box of unintended effects, González-Bailón identifies strategies for social intervention and discusses the policy implications—and how data science and evidence-based research embolden critical thinking in a world that is constantly changing.

"A sexy new romance about a small-town woman who

saves the life of a mysterious man, and finds herself unexpectedly thrown into a whirlwind love affair, featuring bestselling author K. A. Tucker's signature "well-constructed, pulse-pounding suspense" (USA TODAY). Twenty-four-year-old truck stop waitress and single mother Catherine Wright has simple goals: to give her five-year-old daughter a happy life and to never again be the talk of the town in Balsam, Pennsylvania: population two thousand outside of tourist season. And then one foggy night, on a lonely road back from another failed attempt at a relationship, Catherine saves a man's life. It isn't until after the police have arrived that Catherine realizes exactly who it is she has saved: Brett Madden, hockey icon and media darling. Catherine has already had her fifteen minutes of fame and the last thing she wants is to have her past dragged back into the spotlight, only this time on a national stage. So she hides her identity. It works. For a time. But when she finds the man she saved standing on her doorstep, desperate to thank her, all that changes. What begins as an immediate friendship quickly turns into something neither of them expected. Something that Catherine isn't sure she can handle; something that Catherine is afraid to trust. Because how long can an extraordinary man like Brett be interested in an ordinary woman like Catherine before the spark fades?"--

If you're like most managers and things keep you up

at night, now you can turn to a book that's designed especially for you! But you won't find talking rabbits or princesses here. (There is a cow, but it doesn't jump.) Henry Mintzberg has culled forty-two of the best posts from his widely read blog and turned them into a deceptively light, sneakily serious compendium of sometimes heretical reflections on management. The moral here is this: managers need to leave their castles and find out what's actually going on in their kingdoms. And like real bedtime stories, these essays have metaphors galore. So prepare to grow strategies like weeds and organize like a cow. Discover the maestro myth of managing, find the soft underbelly of hard data, and learn why downsizing is bloodletting and your board should be a bee. Mintzberg writes, "Just try not to be outraged by anything you read, because some of my most outrageous ideas turn out to be my best. They just take a while to become obvious."

Over the past decade, social networks have completely changed corporate communication modes, including commercial communication. Despite beginning as purely personal, social networks have become business tools, used for collecting and sharing information and strengthening links between companies and their clients. How can sales forces take advantage of this new situation? This is what the two authors, Sylvie Lachkar and Hervé Kabla, examine in this guide for both sales engineers and their managers, marketing teams and company management. Combining theoretical and practical presentations, this book features real life examples taken from multiple sectors such as services, industry, engineering, software and education. It will

not only serve to strengthen your sales expertise, but will also help you use your network to serve your commercial performance. Sylvie Lachkar has worked her way up the ranks of the major technology companies (software publishers, manufacturers, consulting firms) over the past 25 years, in marketing, management partner, business development and training roles. She now runs the SAP Social Selling program for EMEA (Europe, Middle-East, Africa). For the last two years, she has worked in Europe, supporting sales teams in their use of social media. She is an expert in networking, and therefore knows how to use social networks to their full, powerful, potential. Hervé Kabla is president of Be Angels, a social media and digital agency that helps several B2C and B2B companies in developing their social media strategies. He appears regularly at conferences or training sessions on social selling. A blogger and ingeneer, he is the co-author of 'Mastering digital marketing like a Boss'.

"Looking at Mindfulness collects classic and esoteric paintings, from Rembrandt to Hopper to Magritte, and offers a lucid commentary on the inner workings of each. André describes the dynamic on the canvas, and turns to the viewer's own reactions, exploring the connection between what we see and what we feel. Moving beyond the art on the page, André teaches us what it means to consider our surroundings, our daily interactions and obligations, and their effect on our inner well-being. The paintings are a visual and tangible first step to understanding mindfulness and the benefits of living in the moment. In practicing mindfulness, within ourselves and out in the world, each of us can make immediate, meaningful, and permanent changes in our well-being and the well-being of others" -- Amazon.com.
