Parallel Curriculum Units for Science, Grades 6-12

A realistic approach to assessing student behavior, staff morale, and school climate and creating a proven-to-work character development program that can dramatically turn around student behavior.

Using Analogies in Middle and Secondary Science Classrooms

Jumpstarters for Energy Technology, Grades 4 - 12

Acknowledging the importance of national standards, offers case studies, tips, and tools to encourage student curiosity and improve achievement in science.

Evolution Education Around the Globe

Download Free Life Science Grade 12 Human Evolution Assignment

Offers more than 40 teacher-friendly, ready-to-use analogies for science classrooms and shows teachers how to select analogies for instruction, gauge their impact, and improve their effectiveness.

Science Curriculum Resource Handbook

Science, engineering, and technology permeate nearly every facet of modern life and hold the key to solving many of humanity's most pressing current and future challenges. The United States' position in the global economy is declining, in part because U.S. workers lack fundamental knowledge in these fields. To address the critical issues of U.S. competitiveness and to better prepare the workforce, A Framework for K-12 Science Education proposes a new approach to K-12 science education that will capture students' interest and provide them with the necessary foundational knowledge in the field. A Framework for K-12 Science Education outlines a broad set of expectations for students in science and engineering in grades K-12. These expectations will inform the development of new standards for K-12 science education and, subsequently, revisions to curriculum, instruction, assessment, and professional development for educators. This book identifies three dimensions that convey the core ideas and practices around which science and engineering education in these grades should be built. These three dimensions are: crosscutting concepts that unify the study of science through their common application across science and engineering; scientific and engineering practices; and disciplinary core ideas in the physical sciences, life sciences, and earth and space sciences and for engineering, technology, and the applications of science. The overarching goal is for all high school graduates to have sufficient knowledge of science and engineering to engage in public discussions on science-related issues, be careful consumers of scientific and technical information, and enter the careers of their choice. A Framework for K-12 Science Education is the first step in a process that can inform state-level decisions and achieve a research-grounded basis for improving science instruction and learning across the country. The book will guide standards developers, teachers, curriculum designers, assessment developers, state and district science administrators, and educators who teach science in informal environments.

Products for Life Science Research

Which Degree in Britain

Breathe new life into science learning with this powerful guidebook that shows how to create more thoughtful curriculum and differentiate lessons to benefit all students.

X-kit FET Grade 12 LIFE SCIENCE

Connect students in grades 5 and up with science using Understanding the Human Body. This 80-page book presents basic information about the complex human body without overwhelming students with medical jargon. It makes the study of the human body even more fascinating with Far Out Facts, fun tidbits of information that keep students on their toes. The book includes a number of Web sites that provide students the opportunity to further explore various body systems and concepts. This book supports National Science Education Standards.

The Human Life Review

Study and Master Life Sciences Grade 11 CAPS Teacher's File

While the coerced human experiments are notorious among all the atrocities under National Socialism, they have been marginalised by mainstream historians. This book seeks to remedy the marginalisation, and to place the experiments in the context of the broad history of National Socialism and the Holocaust. Paul Weindling bases this study on the reconstruction of a victim group through individual victims' life histories, and by weaving the victims' experiences collectively together in terms of different groupings, especially gender, ethnicity and religion, age, and nationality. The timing of the experiments, where they occurred, how many victims there were, and who they were, is analysed, as are hitherto under-researched aspects such as Nazi anatomy and executions. The experiments are also linked, more broadly, to major elements in the dynamic and fluid Nazi power structure and the implementation of racial policies. The approach is informed by social history from below, exploring both the rationales and motives of perpetrators, but assessing these critically in the light of victim narratives.

Teaching High School Science Through Inquiry

This workbook was developed to support Crossing Over, a pilot research programme for training teachers in contemporary science education (a project of the Human Sciences Research Council and the Africa Genome Initiative). The project aimed to equip educators with the necessary skills and knowledge to deal with changes in the Natural Sciences and Life Sciences curricula. The workbook provides key content necessary for teaching concepts recently introduced in these curricula: comparative functioning, relationships and the development of change, or evolution. This is an interactive, well-illustrated workbook that helps teachers to build their own understanding of genes, the mechanisms of inheritance and selection - the basic principles of evolution. It is divided into two parts, with the first intended to supplement the work of General Education and Training (GET) teachers, and the second providing support for Further Education and Training (FET) teachers.

Keep It Simple, Make It Real

Study and Master Life Sciences Grade 12 CAPS Study Guide

Catalog of Copyright Entries. Third Series

Connect students in grades 4 and up with science using Jumpstarters for Energy Technology: Short Daily Warm-Ups for the Classroom! This 48-page resource explores new energy technologies, such as solar energy, geothermal energy, biomass fuels, and hydroelectricity. It includes five warm-ups per reproducible page, answer keys, and suggestions for use.

Exploring Our Biomes

Compendium of Higher Education

This study gives statistical and evidential illustration to what influences student choices and behavioral patterns as well as trends in the youth market in South Africa.

Human Activity and the Environment, 2000

A comprehensive guide to full-time degree courses, institutions and towns in Britain.

Issues in Life Sciences: Cellular Biology: 2011 Edition

Florida Schools

Issues in Life Sciences: Cellular Biology / 2011 Edition is a ScholarlyEditions™ eBook that delivers timely, authoritative, and comprehensive information about Life Sciences—Cellular Biology. The editors have built Issues in Life Sciences: Cellular Biology: 2011 Edition on the vast information databases of ScholarlyNews.™ You can expect the information about Life Sciences—Cellular Biology in this eBook to be deeper than what you can access anywhere else, as well as consistently reliable, authoritative, informed, and relevant. The content of Issues in Life Sciences: Cellular Biology: 2011 Edition has been produced by the world's leading scientists, engineers, analysts, research institutions, and companies. All of the content is from peer-reviewed sources, and all of it is written, assembled, and edited by the editors at ScholarlyEditions™ and available exclusively from us. You now have a source you can cite with authority, confidence, and credibility. More information is available at <http://www.ScholarlyEditions.com/>.

The American Biology Teacher

Crossing Over

Recording for the Blind & Dyslexic, Catalog of Books

Study & Master Life Sciences Grade 11 has been especially developed by an experienced author team for the Curriculum and Assessment Policy Statement (CAPS). This new and easy-to-use course helps learners to master essential content and skills in Life Sciences. The innovative Teacher's File includes: • guidance on the teaching of each lesson for the year • answers to all activities in the Learner's Book • assessment guidelines • photocopiable templates and resources for the teacher

Settling for Less

This edited book provides a global view on evolution education. It describes the state of evolution education in different countries that are representative of geographical regions around the globe such as Eastern Europe, Western Europe, North Africa, South Africa, North America, South America, Middle East, Far East, South East Asia, Australia, and New Zealand. Studies in evolution education literature can be divided into three main categories: (a) understanding the interrelationships among cognitive, affective, epistemological, and religious factors that are related to peoples' views about evolution, (b) designing, implementing, evaluating evolution education curriculum that reflects contemporary evolution understanding, and (c) reducing antievolutionary attitudes. This volume systematically summarizes the evolution education literature across these three categories for each country or geographical region. The individual chapters thus include common elements that facilitate a cross-cultural meta-analysis. Written for a primarily academic audience, this book provides a much-needed common background for future evolution education research across the globe.

Which Degree Guide

Comparing science content in the National Assessment of Educational Progress (NEAP) 2000 and Trends in International Mathematics and Science Study (TIMSS) 2003 assessments technical report.

Provides information for students wishing to narrow their choice of course before turning to prospectuses - saving them precious time when they need it most. Grouped by study field, this volume is divided into subject chapters with courses arranged alphabetically by title and institution.

Curriculum Development Library

A Framework for K-12 Science Education

Human Resources in Science and Technology

Life Sciences, Grade 10

Journal of Geoscience Education

Study & Master Life Sciences Grade 10 has been especially developed by an experienced author team for the Curriculum and Assessment Policy Statement (CAPS). This new and easy-to-use course helps learners to master essential content and skills in Life Sciences. The comprehensive Learner's Book includes: * an expanded contents page indicating the CAPS coverage required for each strand * a mind map at the beginning of each module that gives an overview of the contents of that module * activities throughout that help develop learners' science knowledge and skills as well as Formal Assessment tasks to test their learning * a review at the end of each unit that provides for consolidation of learning * case studies that link science to real-life situations and present balanced views on sensitive issues. * 'information' boxes providing interesting additional information and 'Note' boxes that bring important information to the learner's attention

Victims and Survivors of Nazi Human Experiments

Which Degree?

Canadians recognize the importance of a clean and healthy environment. We understand that the capacity of the environment to supply materials and absorb wastes is finite. But to be effective at reducing our collective impact on the environment we need systematic, accessible and relevant information. Without such information, we are unable to understand and respond to environmental change. Human activity and the environment 2000 meets this need with a collection of environmental statistics, brought together from many sources. The report provides a statistical picture of Canada's environment with special emphasis on human activity and its relationship to natural systems' air, water, soil, plants and animals. The fact that much of Canada's economy is supported by the wealth of its natural resources raises questions about the sustainability of our resource use. Can we maintain air, water and soil quality? Can we continue to extract renewable and non-renewable resources at current rates? Are we implementing conservation and recycling measures? This edition of Human activity and the environment provides extensive data on population, economic activities, the environment and the links among these key elements. Analysis and interpretation support the statistics and help readers make sense of these complex interactions -- STC BiblioCat.

Application Training

Build reference skills for students in grades 4 and up using Research: Ready-to-Go Topics for Building Reference Skills. This 64-page book is perfect for classroom centers, unit launches, small- and large-group activities, and take-home assignments. The activities can be used in any order and with the ongoing curriculum. Students write reports, prepare presentations, and delve into related topics from science, history, geography, math, geology, and everyday themes.

Research, Grades 6 - 12

This concise handbook offers over 100 ready-to-use performance lists, holistic rubrics, and analytic rubrics appropriate for K-12 science classroom programs.
