Hans Giebernath lives among the dull and respectable townsfolk of a sleepy Black Forest village. When he is discovered to be an exceptionally gifted student, the entire community presses him onto a path of serious scholarship. Hans dutifully follows the regimen of study and endless examinations, his success rewarded only with more crushing assignments. When Hans befriends a rebellious young poet, he begins to imagine other possibilities outside the narrowly circumscribed world of the academy. Finally sent home after a nervous breakdown, Hans is revived by nature and romance, and vows never to return to the gray conformity of the academic system.

language:EN-US;} The Birdsong Papers, which appeared in 1896 as Die Akten des Vogelsangs, was Wilhelm Raabe's next-to-last completed narrative. What might be called an anti-Bildungsroman, it is widely considered to be the work that secures Raabe's place as a precursor of German modernist fiction writers. Its tone is critical of late-nineteenth-century society, both German and American, with its industrial expansion, urbanization, pursuit of wealth, and erosion of conventional values; but this critical tone also produces an uneasy tension for its narrator, Karl Krumhardt, a high-ranking bureaucrat with a stake in the stability of that society. It is against that social-critical background that Krumhardt's Papers record a coming to terms with a subject - his longtime friend Velten Andres - whose life both fascinates and profoundly unsettles him. Velten is intelligent, imaginative, idealistic, and full of promise; but he cares nothing about his gifts, chooses self-imposed seclusion over conformity, and carries his individualism to what Jeffrey L. Sammons calls 'a kind of spectacular irrelevance in the conduct of life'. With this translation of Die Akten des Vogelsangs, the first into English, a major work by one of the most respected German writers of the nineteenth century is made accessible to a new, international readership.

### **When Dreams Came True**

Detective Philip Trent investigates the mysterious murder of a leading financier. Despite the title, Trent's Last Case is the first novel in which the gentleman sleuth

Philip Trent appears. The novel is a whodunit with a place in detective fiction history because it is the first major sendup of that genre: Not only does Trent fall in love with one of the primary suspects—usually considered a no-no—he also, after painstakingly collecting all the evidence, draws all the wrong conclusions! This novel was much praised, numbering Dorothy L. Sayers among its admirers, and with its labyrinthine and mystifying plotting can be seen as the first truly modern mystery. It was adapted as a film in 1920, 1929, and 1952. The success of the work inspired him, after 23 years, to write a sequel, Trent's Own Case.

Originally created in 2007, this is a comprehensive study of the nineteenth-century German poet Heinrich Heine. Anthony Phelan examines the complete range of Heine's work, from the early poetry and 'Pictures of Travel' to the last poems, including personal polemic and journalism. Phelan provides original and detailed readings of Heine's major poetry and throws fresh light on his virtuoso political performances that have too often been neglected by critics. Through his critical relationship with Romanticism, Heine confronted the problem of modernity in startlingly original ways that still speak to the concerns of post-modern readers. Phelan highlights the importance of Heine for the critical understanding of modern literature, and in particular the responses to Heine's work by Adorno, Kraus and Benjamin. Heine emerges as a figure of immense European significance, whose writings need to be seen as a major contribution to the articulation of modernity.

Trees derive their food and solid substance in part from the air and in part from the soil. The solid part of their bodies is made up of cellulose, which consists largely of carbon (44 per cent of its weight), with hydrogen and oxygen added in almost the same proportions as in water. The carbon is derived from the carbonic acid of the air, which enters into the leaves and, under the influence of light, air, and water, is there decomposed; the oxygen is exhaled; the carbon is retained and combined with elements derived from the water, forming compounds, such as starch, sugar, etc., which are used as food materials, passing down the tree through its outer layers to the very tips of the roots, making new wood all along the branches, trunk, and roots. This process of food preparation, called "assimilation," can be carried on only in the green parts, and in these only when exposed to light and air; hence foliage, air, and light at the top are essential prerequisites for tree growth, and hence, other conditions being favorable, the more foliage and the better developed it is, and the more light this foliage has at its disposal for its work, the more vigorously will the tree grow.

for full orchestra Prologo e Fantasia was commissioned by Mstislav Rostropovitch and the National Symphony Orchestra in Washington D.C., first performed in London by Rostropovitch and the National Symophony Orchestra. The work consists of three sections. The first movement forms the Prologo, which is slightly reminiscent of the French Overture. The Fantasia opens briskly with characteristic Waltonian energy, and leads, after a climax, into the thematically connected final section Fuga finta (or 'make-believe fugue').

### **Self's Murder**

A new edition of the delightful 1924 memoir by James' s longtime secretary, with a biographical essay and excerpts from her diaries Theodora Bosanquet was Henry James's secretary from 1907 until his death in 1916, one of the most significant periods of his long writing career. Her memoir Henry James at Work, originally published by Leonard and Virginia Woolf's Hogarth Press in 1924, recounts Bosanquet's association with James and provides a lively and engaging commentary on James's milieu, preferences, and attitudes, as well as on his process of writing and revision. Bosanquet is an intelligent and observant witness and reporter, and her objective and comparatively unbiased point of view makes the memoir especially valuable. This enlarged and annotated edition rescues Bosanquet from the shadows of literary history and shows her to be a fascinating figure in her own right, a skilled writer and editor, an early feminist, and a contemporary of the Bloomsbury literary community. The book is enhanced by an essay about Bosanquet and her circle, and fascinating snippets from her diaries and letters, now in the Harvard University archives. Soon after Henry James hired Theodora Bosanquet in 1907, the well-educated and dedicated Bosanquet became

indispensable to James. In addition to the memoir *Henry James at Work* she published two other books, critical studies on Harriet Martineau and Paul Valéry. Following James' s death she became Executive Secretary of the International Federation of University Women and traveled extensively in support of the women' s suffrage movement. From 1935 to 1958 she was literary editor, then director, of the publication *Time and Tide*. Lyall H. Powers is Professor of English Emeritus at the University of Michigan and author of numerous books, including *Alien Heart: The Life and Work of Margaret Laurence*. Praise for *Henry James at Work*: “ She' s savvy, she' s snappy, and there' s usually a touch of sass . . . . [T]his ‘ salty, hearty’ lady . . . worked so hard to keep ‘ a lonely old artist man’ — Henry James— from being interrupted.” — Larry McMurtry “ I' m sure [your book] ought to have a success with anyone who cared for Henry James and his work, and I think we are very lucky to get it.” — Letter from Virginia Woolf to Theodora Bosanquet, 1924 “ It's fascinating to encounter, in the era just before high modernism, a female intellectual like Bosanquet— one as fully engaged in the life of ideas and cultural production as her male counterparts— making as much of her putatively secondary status as she possibly could. The book is important as a primary document in its own right as well as a gloss on the methods and material of the magisterial James.” — Jonathan Freedman, University of Michigan

The month was June, that glorious rose-month which gladdened England before war-clouds darkened the summer sky. As the hour was nine o'clock, it is highly probable that many thousands of men were then strolling out into many thousands of gardens in precisely similar conditions; but, given youth, good health, leisure, and a fair amount of money, it is even more probable that few among the smaller number thus roundly favored by fortune looked so perplexed as Grant. Moreover, his actions were eloquent as words. A spacious French window had been cut bodily out of the wall of an old-fashioned room, and was now thrown wide to admit the flower-scented breeze. Between this window and the right-hand angle of the room was a smaller window, square-paned, high above the ground level, and deeply recessed - in fact just the sort of window which one might expect to find in a farm-house built two centuries ago, when light and air were rigorously excluded from interiors.

During his stay in Italy, Heinrich Heine (1797-1856) visited Florence, with which he was delighted beyond measure. The literary outcome of this visit was the well-known fantastic and brilliant "Florentine Nights." It is a series of brilliant pictures

united by a very slight thread of connection; it is charming in its vague and uneventful wandering, with its strong suggestion of the great original, the Arabian Nights, and its still stronger contrast. In addition, in this love-tale occur some of the best examples of Heine's biting vein.
