Introduction to Information Systems, Fourth Canadian

Understanding Canadian Public Administration offers excellent coverage of all the important and significant areas of public administration. While still providing a background of the theory and practice of public administration in Canada, the new fourth edition has been updated to reflect political changes in recent years. New topics - such as the financial crisis, the proroguing crisis of 2008/2009, Aboriginal Self-Government, and the Public Service Renewal Action Plan- have been added. Content on departmental organizations, agents of Parliament, political staff, and Human Resources Management have also been updated. In discussing these new topics, as well as information from the previous edition, Understanding Canadian Public Administration remains an easily accessible introductory text that is neither encyclopaedic nor esoteric. It provides you with an overview of essential theoretical issues in the field and then uses that theoretical grounding to examine the actual practice of public administration. The text compares the roles of the private and public sectors and examines the impact that the latter has had on the former. From a practical approach, it analyzes how public policy is actually set within the context of the Canadian federal state.

- Baltzan; M: *Information Systems* is a visual, magazine format designed to engage your students from the start! Saturated with fascinating, sometimes hard-to-believe real examples will keep them reading throughout the course. Baltzan's approach discusses various business initiatives first and how technology supports those initiatives second. The premise for this unique approach is that business initiatives drive technology choices in a corporation. Therefore, every discussion addresses the business needs first and addresses the technology that supports those needs second. This approach takes the difficult and often intangible MIS concepts, brings them down to the student's level, and applies them using a hands-on approach to reinforce the concepts. A derivative of the Baltzan; *Business Driven Technology* version, this *M: Information Systems* provides the foundation that will enable students to achieve excellence in business, whether they major in operations management, manufacturing, sales, marketing, etc. *M: Information Systems* is designed to give students the ability to understand how information technology can be a point of strength in an organization.
