Engraving by hand is the oldest art of mankind and one that still flourishes today. With a simple message the precious metal engraver can give a unique personality to an otherwise commonplace cigarette box, goblet or compact. Despite the singular character of the craft very few practical books have been written on engraving precious and other materials employed by the jeweller; in fact none have been published in the United Kingdom for many years. "Engraving on Precious Metals" is for professionals and others who wish to learn hand engraving as a hobby or trade, and reveals many previously undisclosed practices of the commercial engraver which help to make his skill quite astonishing. All aspects of the craft are covered exhaustively, including the relatively modern innovation of the high-class machine engraver. This machine is particularly useful for repeat monograms and designs which are afterwards filled, because the template that guides the machine can be cut by hand.

Illustrated throughout with over 250 drawings, the book gives practical hints for use in the workshop, while artistic matters are covered extensively in chapters on lettering design and layout, monograms, nameplates and ornamentation. A basic knowledge of ancillary crafts can be found in the sections on piercing, polishing, soldering and inlaying, and the use of unusual materials such as ivory, wood or plastic is also discussed. The final chapter contains a wide selection of different styles of lettering which are numbered for easy reference, and can be used by the retailer to indicate styles to customers and engravers.

"The Universal self-instructor is nothing less than it pretends to be: an Epitome of Forms, especially adapted for purposes of self-instruction and general reference in the various departments of Education, Commerce, Law, Home, Society, and Amusements. Every young man and young woman ; every business man, farmer, and mechanic ; every housewife and lady of society ;--in fact every intelligent member of the community should have it within reach for consultation on those numerous minor matters that a well-educated person is supposed to know. The Reading Public has been amply supplied for years with reference books of every description, but the present volume may be said to occupy a field peculiarly its own, as the people have never before been furnished with a publication embracing in a single volume such a quantity of practical information, and treating the wants of every-day life in a lucid, instructive and agreeable manner. Such articles as Elocution, Penmanship, Book-keeping, Letter-writing, Mercantile Law, Music, Stenography, Phrenology, Agriculture, Social Etiquette, Out-door Sports, In-door Amusements, Physical Culture, The Domestic Circle, Household Receipts, Parliamentary Law, etc., have been prepared by writers of reputation and large experience in the special subjects given them for treatment"--Preface.
